Maternity Home

MATERNITY HOME — 153 Granite. Terms, including everything, \$4.00 per day. 162-1f

Lumber Figures Show Increase

PORTLAND, Ore., April 11.—An increase of nearly nine per cent over the 1925 figure of lumber cut in Oregon and Washington was revealed by the forest service and board of census in their annual estimates.

In 1925 approximately 11,243,000,000 board feet was cut while in 1926, 12,258,000,000 board feet was the output.

Oregon's increase according to the estimate, was about 5 per cent, or 7,832,000,000 feet.

Information was based on identical mills representing 65 per cent of the total output of the two states.

Oregon and Washington are said to be furnishing about one-third of the total lumber cut of the United States.

FOR RENT — Houses

FOR RENT—1-2 acre of garden and all kinds of fruit and nut trees with 6 room furnished house garage and chicken run. Close to high school and normal school. Brown & Rice, 63 N. Main. 187-2

Student Workers Get Better Grades

BERKELEY, Cal., April 11.—(UP)—The student who is forced to get out and "dig" for a living outside school hours, makes better grades than the youth who gets his education out of father's pocketbook. And the harder the working student has to work the better grades he makes.

A comprehensive study of conditions at the University of California over a considerable period of time has revealed that of 1954 men who work enrolled at the university, 1348 are making better than average grades.

The average grade of non-working students stood at 1.20; those working 2 to 4 hours a day, averaged 1.22, while 606 students who had to work more than four hours outside of school hours to remain at college, averaged 1.23.

Less than 10 per cent of self-supporting students were dismissed from the institution for deficient scholarships while of those youths who did not have to work, 12 per cent found themselves "cashiered" for falling below in their grades.

The survey developed further that college athletes got better grades generally, than those not engaged in athletics. This was attributed to the fact that students in athletics must meet certain scholarship standards in order to

FOR SALE — Real Estate

FOR SALE—Modern seven-room house, well located, just been repainted, papered and refinished throughout, making it like new. If sold within short time, \$1050. Two hundred down and balance on easy terms. Ashland Realty Co. 188-1

Redwood Found to Be Fast Growing

ABERDEEN, Wash., April 11.—(UP)—Experiments conducted by the Polson Logging company have demonstrated that the redwood is one of the fastest growing trees in this district.

Robert Polson directed the experiment of planting redwoods on cut-over lands and declared that redwood trees grown from seed planted 14 years ago at the company's railroad camp have attained a size of 18 inches in diameter.

Among other things, Polson's tests showed that redwood does well in this climate and produces excellent timber. Spruce, fir, pine and red and white oak also did well after plantings by Polson.

In addition to learning the types of trees that will thrive here, Polson found also that fire should be kept out of cut-over lands from the very outset. This disproves the old theory that one fire will not hurt the ground for tree production. According to Polson, nature will re-forest the ground if fire is kept out.

Although Argentina is twice as far away from Europe as the United States, Buenos Aires will soon receive mail from Europe in half the time it takes a European letter to travel to New York, according to the airmail contract signed here recently between the Argentine Postoffice and the Latécoere Company of France. The new airmail service is scheduled to commence on September 1st, 1927.

By means of this new service, when fully functioning, a letter dispatched from Buenos Aires to Paris, for instance, will have its reply arrive in Buenos Aires ten days later. This exchange cannot now be made in less than forty-three days with sailing schedules in entire favor.

READING, Pa., April 11.—(UP)—Reading, said to be the largest city in the United States to maintain a volunteer fire department, boasts of what it claims are the three oldest, active volunteer departments in the nation and probably in the world.

Today the Rainbow fire department, organized three years before the outbreak of the revolutionary war, will celebrate its 154 anniversary.

The Junior company recently celebrated its 114th anniversary and the Reading Hose Company will celebrate its 106th birthday on July 4. On April 14 the Never-sink company will celebrate its 98th birthday.

In spite of the fact that Reading's sole protection from fire is furnished by volunteer firemen the city thus far has successfully combated all efforts to displace the volunteers by a paid department.

FRANKLIN WANTED TO ENFORCE SAVING LAW

Would Wake up People at Four O'Clock by Shooting a Canon

LONDON, April 11.—(UP)—People of Great Britain, Belgium, Holland, and France will lose 95,000,000 hours of sleep tonight as a result of clocks throughout these four nations being put forward one hour at the inauguration of Summer Time. The night of April 9—10 was fixed upon by an agreement reached in February between representatives of these governments, as the official start of day-light saving time. It will be in effect until the night of October 1—2, when normal time will be restored.

Credit for originating the idea of day-light saving, according to British writers, belongs to Benjamin Franklin who in 1784, it is said propounded a well thought out scheme of day-light saving. In the story related here, a forgetful maid, omitted to close the shutters of his bedroom window one evening and the next morning Franklin was awakened by sunlight streaming into his room. He was naively astonished at finding daylight and sunshine at such an hour; and he was also greatly pleased with his discovery. In consequence he promptly worked out a scheme to make everybody get up at 4 A. M.
