

# HUGH OFF TO PEN FRIDAY SAYS JAILOR

### Will Not See Brothers Until Trip To Salem Is Started—Accepts Verdict Philosophically—Twins To Portland.

Mrs. Belle D'Autremont Wednesday visited her convicted son, Hugh D'Autremont, in the Jacksonville jail, and talked to him for the first time since the verdict was received. She made no comment on the verdict.

She also visited with her other sons, Roy and Ray, charged with the same crime of which their brother now stands convicted.

The twins were not told officially until Wednesday morning of the verdict given in the case of their brother. Sheriff Jennings told them. He reported Roy in a talkative and jovial mood and Ray glum and morose. Hugh he said, seemed to accept the verdict in a philosophical manner.

Hugh has not yet seen his twin brothers. He will be sentenced Friday morning at 10 o'clock and Friday evening will see them for the first time when he is taken to Salem to start serving the sentence of life imprisonment which the verdict of jury makes mandatory—his brothers to Portland to be held in the Multnomah county jail where they will remain until their trial. They have pleaded not guilty to all indictments against them.

Court attaches were busy Wednesday reassembling the mass of exhibits introduced by the state all of which will be used in the trials of Roy and Ray.

Dr. L. S. Inskip, county health commissioner, reports one case of smallpox exists in the county—the patient resides near Medford.

## Worms Vs. Flies Is Main Subject

RAPID CITY, S. D., June 23.—(AP)—The big issue as to whether worms or flies should legitimately be used to hook trout overshadows everything else at the summer White House.

Mr. Coolidge, who has been using both and thereby meeting some criticism from expert anglers, now is using flies and has discarded worms, at least temporarily.

This development came after Edward A. Taylor, claiming to represent the Isaak Walton League of America, and who is fishing editor of a Chicago newspaper, called at the executive offices and urged the president to change his bait.

Taylor said use of worms is "slaughter," and the president

should barbless hooks so that he might throw the catch back into the stream if he caught more than he could use. Use of worms could be justifiable only if man were facing starvation, Taylor contended.

One of the boys is Donald Morrison of Eureka, Cal., who says that he has built a plane for a flight to Honolulu and that he is now looking for a motor with which to equip it. The other is Salva Pintash of Newark, N. J., who hasn't a plane, but who says he has done considerable flying.

## Weak Spots

There is nothing like newspaper advertising for strengthening weak territory.

How much is it worth while to spend to capture new trade? A newspaper advertising campaign in weak territory may bring sales up to par before embarking upon more costly general campaigns.

Newspaper advertising is easily and promptly extended or contracted, and its cost exactly controlled.

# I figured right when I signed with P.A.

WHEN I first started to smoke a pipe, I looked around me. The fellows who seemed to be getting the most out of their pipes were filling them from a bright-red tin, with a picture of a man in a frock-coat on it. They told me it was the greatest pipe-tobacco ever.

I decided to find out for myself. I bought a tin of Prince Albert. As I opened it, the aroma that floated out of it gave me a real thrill. It reminded me of a trek through the woods when the dew is on the leaves and the sun is on the up. I couldn't wait to try it!

The very first pipe-load won me. I was ready to sign on the dotted line. It was cool and sweet-flowing as Tennyson's brook. It was mild and mellow as spring sunshine. Yet it had that full, rich tobacco body that let me know I was smoking. You know what I mean.

I sure figured right when I signed with P.A. The philosophers say the only real pleasure is that which you share with others. So I'm letting you in on the ground floor. Get yourself a tidy red tin of good old P.A. today. Fill your pipe to the brim—and go to it!

P. A. is sold everywhere in tidy red tins, round and half-round tin holders, and round crystal-glass holders with sponge-mesh-liner top. And always with every bit of tin and glass removed by the famous Albert process.
