A few years ago it was necessary to carry the characters of a book through several score of years in order to make the volume a regulation 360-page publication. ## Can You Tell a GOŁD BRICK When You See ONE?

Many people think they can, but a slick talker makes them believe that the brick is gold through and through. When it comes to buying gold, hire a chem-ist. When it comes to buying stocks and bonds, re-tain a banker. It's your banker's business to know what's good and what's not in investments. Let him do your choosing for you.
