NEXT WEEK WILL BE OREGON PRODUCTS WEEK

Every merchant in Ashland should make a special display of Oregon products he has on sale all of next week. The surest road to permanent prosperity is to encourage home industry.

Oregon Products Week should be a big one in Ashland. It is a good thing to push. In our issue of Thursday, October 16, the Tidings will specially feature Oregon Products. It pays to cooperate.

Naturally, the way to get more business is to treat right the business we already have. Likewise the way to get more industries and more industry in Oregon is to treat Oregon's present industries as friends.

Oregon's industries offer the solution to the problem of making Oregon prosperous and keeping her prosperous. They, and they alone, can make payrolls—and payrolls alone can bring prosperity to everyone.

Reports and estimates from representatives of the Forest Service, U. S. Department of Agriculture, indicate that the period of the greatest forest fire peril that has ever confronted the forest service has been brought to an end by heavy rains and snows in Montana and northern Idaho. Until this sorely needed assistance from nature arrived the wooded areas of the district were so dry that fires gained terrific headway with astonishing rapidity.

A surprising number of electric storms occurred over these tinder-dry regions, unaccompanied by sufficient rains to check the flames which were started by lightning. More than half of the fires in the regions, reports show, were begun by such electrical discharges. To meet this peril in Montana and northern Idaho, a maximum of 4,500 extra men were employed in addition to the regular forces in the field.
