Ashland High Beats Medford at Football

Ashland triumphed over her old rival, Medford, on the high school football field Saturday afternoon by the narrow margin of one point in a game which held every variety of thrill which a football game could hold.

interference went clear through the Ashland primary and secondary defense. Winne, who is the fastest big man around these parts, saved a touchdown with a sprint as heretofore recorded. Then just to show that he didn't intend to have all that good effort wasted he drove through the Medford line three times in succession and nailed the Medford backs for losses, giving Ashland the ball and a chance to kick out of danger.

Indian Tribe May Regain Lost Domain

OKLAHOMA CITY, Okla.—The Red River boundary dispute, involving oil lands worth \$200,000,000 may ultimately be settled in such a way that neither of the contesting states—Texas and Oklahoma—will get the territory. And the land may revert to its true and original owners, the Wichita Indians.

form, to the extinguishment of title to lands which were claimed by the several Indian tribes under aboriginal occupancy. The one exception to this seems to be the case of the Wichita Indians. In 1818, certain chiefs and warriors of the Quawwa tribe, in council at St. Louis with United States commissioners, entered into a treaty by the terms of which they ceded all the lands in Oklahoma and Texas between the Arkansas and Canadian rivers on the north and Red river on the south to the government. The fact that the Quawwa lived in Arkansas and had never exercised any ownership over lands within 200 miles of the region occupied by the Wichitas did not seem to have entered the consideration at all. Yet, with this as a basis the government granted these lands to the Choctaws south of the present Red River, which has shifted its course a mile and a half north of the original channel in the last century. Oklahoma authorities appointed a receiver to take charge of the lands which, by the meandering of the shift little stream, had become apparently Texas property. Texas brought suit to prevent Oklahoma taking over the land, and finally, after an armed clash was threatened, the case was taken to the United States supreme court, where it is now pending.

But, according to Thornburn, neither Texas nor Oklahoma has any claim on the land. It rightfully belongs to the Wichita Indians, he says, because they first inhabited the land and since being driven from it have not been paid for it by either Oklahoma, Texas or the federal government. Therefore, Thornburn asserts, the Indians still hold clear title to the country.

"After the Civil War they went north into Kansas and settled temporarily at the mouth of the little Arkansas on the site of the present city of Wichita, Kansas. "It will be seen that the people of these tribes had left their homes, not from choice but from direct necessity. They were never permitted to return. They never relinquished their hereditary rights to the lands along both banks of the Red river, nor do they ever intended to leave against their own will, and the federal government, not to be construed as voluntary abandonment."

VALUABLE COLLECTION

UNIVERSITY OF OREGON, Eugene.—The University of Oregon has been presented by the Ladd estate with the valuable plant collection formerly belonging to the old Portland academy. This collection contains many specimens gathered by Professor Louie Henderson, formerly of the University of Idaho, one of the veteran botanists of the Northwest. It also includes many Alaskan plants collected by Mr. M. H. Gorman, curator of the forestry building, Portland, Dr. J. Francis Drake, of Portland, and Reverend Mr. Dickson, now a missionary to India, arranged the collection and also contributed from their private collections.

VALUABLE COLLECTION

When the collection arrives at the university the herbarium will be confronted with the problem of space in which to arrange it. At present the herbarium has the collections of Messrs. Howell, Cusick, Lieberg, Sheldon and Whited, which represent the pioneer botanical work of the Northwest. The addition of this year, will be "right there" when it comes to shooting. Dot Tinker, jumper center on the last year's team, will strike terror in the heart of her opponent once more by her swift playing; she is sure to get that ball. "Tuckie," Tucker, who was a sub on first team, is "out" again this season. Several new players from other schools are making good and will probably make first team. Nellie Hake's and Nellie Quinn's teamwork as forwards for the juniors is thrilling. Final rehearsals are being held for the anniversary play, "The Arrival of Kitty." It is a clever comedy in three acts and promises an evening of pleasant entertainment. The setting is at a summer resort in the Catskill mountains. William Winkler, a jolly business man, who likes a good time better than business, is to get ten thousand dollars if he marries his niece Jane, to Benjamin Moore, friend of Jane's father, Winkler's sister-in-law, Aunt Jane, has a great aversion to the stage and Winkler in trying to conceal his liking for Kitty Benders, a pretty actress, gets into many difficulties. Bobbie Baxter is the real lover of Jane. He has occasion to disguise himself as Kitty which results in some confusion and much merriment. The tangle is finally straightened out to the satisfaction of all, even Aunt Jane who gets a husband. Suzanne, the French maid; Ting, the bell boy, and Sam, the colored porter, come in for their share of fun also. At the high school gymnasium Friday, November 21, at 8 p. m.
