Has the Small Car Owner A Right to Good Tires

THIS much is certain—that the small car owners of this country have as high quality standards as any other class of motorists. Whenever you want to see this proven out, you have only to watch how they come to good tires, when they are given an opportunity to get at them.

What some dealers seem to overlook are the reasons which have led most of the small car owners to buy their cars.

In building tires for the small car, the United States Rubber Company exercises as much care, as much thought, as much supervision, as if they were intended to go on the most expensive cars in the country.

Devoting an entire factory to their manufacture. Putting the whole weight of its varied experience behind them.

Never cheapening their quality on the mistaken theory that a man's intelligence can be judged by the length of his car's wheel base.

Good dealers will tell you that they can never get enough U. S. 30x3 1/2-inch Tires.

A hint which the small car owner who is bent on quality will always heed in time.
