Each Citizen a Guardian of the Law

Roy A. Haynes, federal prohibition commissioner: The good citizen is under obligations to assist in the enforcement of the prohibition laws and is, in a sense, a guardian of all our laws. To me, there is a great, invisible government back of all the institutions of the government. It is the spirit of America. It is our American idealism. It is our American militant righteousness. It is our progressive civilization. There is something emanating from this invisible power to the hearts of all true Americans, an invisible influence that reaches each citizen and makes him a defender of all those laws which have to do with the welfare of our country and the well-being of our countrymen.

GOLD STRIKE IN EAST OREGON

A big gold and silver strike has been made on the Lost Trail group three miles northeast of Mount Lookout in Baker county, near the summit, according to yesterday's Oregonian.

This property was discovered last September by George Jennings and his father, P. J. Jennings, an old-time miner and prospector, but the news was just disclosed recently. Development work has been carried on quite extensively for the last four

months. There are five claims located. A shaft has been sunk 40 feet deep on number one claim, the ledge being seven feet wide, four feet of which is clean ore that assays from eight ounces to 140 ounces in silver and average \$10 in gold.

A tunnel has been started on number two claim.

The Surprise and J. D. claims are located on a cross vein, a shaft having been sunk down on this ledge 65 feet, with ore all the way. Some of this ore runs as high as \$200 a ton in gold. The croppings of this mine were found in 1860 by miners stampeding for the rich placers in the Green Horn mountains. In later years many searches were made to find it, but all failed, for the rain and snow had washed down the debris of the mountains and had covered the ledge.

The discovery of the Lost Trail mine was considered by mining men as one of the best that has been found in 40 years.
