December 15 is the last day requests for training can be considered under the present federal law governing soldier rehabilitation, he stated.

WASHINGTON, Dec. 4.—Fish-story season faded out with the passing of summer, and fireside stories are now in vogue. AUTHOR AND WRITER OF WORLD NOTE WILL LECTURE

Hal H. Urdahl, author of "The Key of Knowledge," is giving a series of lectures and classes at the Civic community building this week and next week.

Mr. Urdahl will show that "The Key of Knowledge" is a sacred possession of everyone. We are all dependent upon it, and it is constantly in use knowingly or unknowingly.

In the class lessons, this key is shown in its relationship to thought, so that you may comprehend just how you think and why you think.

Mr. Urdahl's book has attracted the attention of students all over the world and even the philosophers of India have reviewed it and published very favorable comments regarding it.

The questions pertaining to the subconscious activity of mind have always engaged the attention of thinking people. During the last few years there has been a world wide search for a solution to the problem with the result that representative men from all corners of the globe have contributed their thoughts along this line, in a symposium of answers to a number of questions propounded and the same is just off the press in book form.
