

Not a drop of Alcohol

Doctors prescribe very little, if any, alcohol these days. They prefer strong tonics and alteratives. This is all in keeping with modern medical science. It explains why Ayer's Sarsaparilla is now made entirely free from alcohol. Ask your doctor. Follow his advice.

Unless there is daily action of the bowels, poisonous products are absorbed, causing headache, biliousness, nausea, dyspepsia. We wish you would ask your doctor about correcting your constipation by taking laxative doses of Ayer's Pills.

In All Reason.
Bingley—Going East, are you? How far?
Dingley—Well, I want to go to Pittsburg, but I've got only money enough to take me as far as Wheeling.
Bingley—Well, that's as close as I'd want to get.

Trust Troubles.
Off Trust—Isn't it a shame they are hounding us so? It makes me burn with indignation.
Ice Trust—It certainly is a frost for me.

Sugar Trust—And talking about sending me to jail and I so used to refining influences!—Baltimore American.

shifted.
"Say, I've got a new one on Smith."
"What is it?"
"Why, the other day—" (etc., etc., etc.).

"Yes, that's a new story—on Smith. But the last time you told it, it was on Peters."—Cleveland Leader.

DEEP SEATED COUGH

CURED IN 5 HOURS.
New Home-Made Syrup.
(Cut This Out.)

From Boston Press.
Progress in medical compounds never ceases, and now it is stated by a prominent medical man that any deep-seated cough or cold on the lungs can be actually cured in five hours by the stick. Opium and morphine have been resorted to in the past, as relief measures. But now it is learned that the system must be treated to rid it of inflammation and congestion. A tonic laxative cough syrup does the work so quickly and thoroughly as to be almost magical. What heretofore has taken weeks to cure can be accomplished in five hours. Get this formula filled or mix it at home and always keep it on hand: One-half ounce fluid wild cherry bark, one ounce compound essence cardui and three ounces syrup white pine compound. Shake the bottle and take twenty drops every half hour for four hours. Then take one-half to one teaspoonful three or four times a day until the system is purified and toned up. Give children less according to age. One filling will usually cure a whole family, as the dose is small.

Hypothetical Questions.
"What will your mother say to you when you get home?" said one boy.
"She'll start in by asking me some hypothetical questions," answered precocious Willie.
"What are they?"
"Questions that she thinks she knows the answers to before she starts to talk."—Washington Star.

Improvement.
"Don't you think you could make some improvement in that orchestra? They could hardly hear my song, last night, for the drum," said the sourette.
"Well," replied the manager with a smile, "I might add another drum."—Yonkers Statesman.

Fine Mind.
"Everybody says that Jones has the finest mind, insight, and sagacity he ever ran across. How did Jones get such a reputation?"
"Easy. Whenever you make a statement he says, 'By Jove, that's so! Why didn't I ever think of that before?'"—Cleveland Leader.

Not Exempt.
An evangelist was exhorting his hearers to flee from the wrath to come. "I warn you," he thundered, "that there will be weeping, and wailing, and gnashing of teeth!"
At this moment an old woman in the gallery stood up. "Sir," she shouted, "I have no teeth."

"Madam," returned the evangelist, severely, "teeth will be provided."—Success Magazine.

be made for the circulation of air so that it will not become stagnant at any point and by coming in frequent touch with the ice will be kept cool. The relative sizes and positions of the ice chamber and refrigerator are shown and these can be made larger or smaller in proportion to meet the requirements.

Keeping the Wheat Pure.
One of the most important factors in growing improved wheat for seed is to keep the wheat pure. Many farmers are careless on this point, often planting new seed on old wheat

FORMS OF HOOFS.

The form of a horse's foot determines the peculiarities of the shoe that is best adapted to it. Viewing the foot from the side the regular position is that shown in figure 4, in which the weight will be borne to best advantage. Looking from the front the regular form is that shown in figure 1, the wide toe being indicated by figure 2, and the narrow toe by figure 3. With the regular or normal shape the weight falls near the center of the hoof, and is evenly distributed over the whole bottom of the hoof. The toe points straight forward and when the horse is moving forward in a straight line the hoofs are picked up and carried forward in a line parallel to the middle line of the body. A pair of hoofs of the form shown in figure 2 allows the

weight to fall largely into the inner half of the hoof. In motion the hoof is moved in a circle. Horses that are "toe-wide" are likely to interfere when

in motion. In the third form (figure 3) the weight of the body is directed on the outer half of the hoof. The irregularity of form causes a paddling motion and frequently interfering.

ground, thus allowing it to become mixed with volunteer wheat the first year. This mixing of varieties causes wheat to deteriorate in yield and quality. When wheat is grown for seed it should be on clean land, which is free from volunteer wheat and from other volunteer grain, rye being especially objectionable. Care must be taken in harvesting and threshing the seed wheat to keep it from becoming mixed with other varieties of wheat. Again, in order to maintain the quality and yield of wheat it is necessary to maintain the fertility of the soil and to give the land good culture.—"Arms' Mail and Breeze.

A Good Gate Tightener.
This can be put on any wire gate. Nearly everybody knows how to make a wire gate as shown in the cut, so

all that needs an explanation is that wire No. 2 is common wrapping wire. Put around post A and make long enough to reach post B. Run a stout stick or iron rod through wire No. 3, drawing it toward post A. In this way the gate can be made as tight as possible.

The Cowpea as a Fertilizer.
The cow pea is a large beanlike plant that produces a large amount of forage. It is valuable as a green food or for plowing under for green manure. It has been used successfully for improving wornout soils, especially those that are light and sandy in texture. Its greatest advantage for this purpose is its ability to gather nitrogen from the air and mineral elements from subsoil. When the crop is plowed under, these are left near the surface, where they will be available to shallow-rooted crops and those which cannot get nitrogen from the air. It has been little used for hay in the North, because it cannot be readily dried in this climate. It makes a good green feed for milch cows between August 15 and September 15, or it may be preserved in the silo by mixing with corn fodder. For green manuring, the seed should be sown broadcast in late June or early July, at the rate of one and a half bushels per acre. It is especially valuable for growing in young orchards. When wanted for fodder it should be sown in early June, in drills 2 1/2 feet apart, at the rate of one bushel seed per acre.

Fly Repeller.
The Kansas Agricultural College has experimented with the various chemical formulas to repel flies from live stock and recommends the following as fairly satisfactory: Resin, 1 1/4 pounds; laundry soap, two cakes; fish oil, one-half pint; enough water to make three gallons. Dissolve resin in a solution of soap and water by heating, add the fish oil and the rest of the water. Apply with a brush. If to be used as a spray, add one-half pint of kerosene. This mixture will cost 7 to 8 cents a gallon and one-half pint is considered enough for one application for a cow. At first it will be necessary to use two or three applications per week until the outer ends of the hair become coated with the resin. After that retouch those parts where the resin is rubbed off.

To Destroy Woodchucks.
A Pennsylvania farmer gives this experience with woodchucks (ground hogs): He had set several hundred early cabbages, and in going through his patch early one morning he found several plants missing. He found the

Item Welcomed By Many Men

This recipe can be filled at home, so that no one need know of another's troubles, as the ingredients can be obtained separately at any well stocked drug store. They are in regular use and many different prescriptions are constantly being filled with them.
This will prove a welcome bit of information for all those who are overworked, gloomy, despondent, nervous and have trembling limbs, heart palpitation, dizziness, cold extremities, insomnia, fear without cause, timidity in venturing, and general inability to act naturally and rationally, as others do, because the treatment can be prepared secretly at home and taken without a yone's knowledge.
Overworked office men and the many victims of society's late hours and dissipation will, it is said, find the restorative they are in need of.
If the reader decides to try it, get three ounces of ordinary syrup saccharum compound and one ounce compound fluid balsam; mix and let stand two hours; then get one ounce compound essence cardui and one ounce tincture calomel compound (not cardamom), mix all together, shake well and take a teaspoonful after each meal and one when retiring.
A certain well known medical expert asserts that thousands of men and many women are sufferers all because of deranged circulation of the blood and a consequential impairment of the nervous force, which begets the most dreadful symptoms and untold misery.

Will Give Away Whole Town.
Because the timber in Carter County, Missouri, has practically all been cut, the town of Grandin in that county, once a flourishing village of 500 inhabitants, with churches, schools and a bank, is to be given away entirely. The whole town is owned by the Missouri Lumber and Mining Company, which controlled nearly all the timber lands in Carter County. Since the lumber has been cut and sawed the timber company has no further use for Grandin, where its sawmills were located.
