

ENTERPRISE HAS A CLEAN SWEEP

JOSEPH MEETS DEFEAT IN THE SECOND GAME WITH THE LOCALS.

Standing of Clubs.			
	W	L	P.C.T.
Enterprise	2	0	1000
Elgin	2	0	1000
Joseph	0	2	0000
La Grande	0	2	0000

Another game to Enterprise, between the Joseph and locals, does not affect the standing of the clubs in the Union and Wallowa county league. Last Sunday on the home grounds Enterprise made sweepstakes of the Joseph team again, defeating the visitors by a score of 6 to 0.

At the same time, Elgin was making another mouthful of La Grande, defeating La Grande by a score, after 10 innings, of 3 to 4. This leaves the standing of the clubs as given in the prelude table above.

Bilyeu, the local pitcher, was in good form throughout the game, but his best playing, perhaps, was his excellent head work, the confidence he inspired in his field. Backed up by excellent fielding, he saved himself frequently by letting the visitors hit the sphere which always found a fielder under it, waiting to pull it down. The game put up by the Joseph team was a good one—a better one, in fact, than that of the preceding Sunday; but it was not good enough nor fast enough to cope with a solitary run.

According to the new schedule just arranged at the meeting of the league officials, the locals will play Sunday and Monday next at La Grande with the La Grande team.

SON OF DR. AND MRS. THOMPSON PASSES AWAY

Harold Eugene, the little son of Dr. and Mrs. Thompson of Joseph, died in that city Friday morning, after a brief illness, though the child had not been strong during its previous life. Funeral services were held Sunday and the remains were interred in the cemetery there.

According to report the little son was born in Pittsburgh, Pa., but was brought west on account of his health, the father and mother settling with their only child at Joseph. The son lived to the age of 11 years and 5 months, when a more malignant form of ill health appeared, sweeping the little life away. The parents are prostrated over their loss, and have the sympathy in their bereavement of every one in Wallowa county.

PARADISE GLINTS.
Paradise, May 29.—Lincoln Austin, city census man, was with us.
J. M. Silvers of Grouse and A. H. Boyd of Joseph were in Paradise on business today.
J. S. Applegate sold a span of horses to John Rowitt for \$300.
C. D. Akin made a business trip to Enterprise this week.
O. L. Farber had a loan application acknowledged this week.
Frank Stabbeheld, the sheepman of Enterprise, is here.
Mrs. W. C. Straley and daughter Effie called on Mrs. W. B. Applegate, who has been ill but is better at present.
Miss Mary Straley came in on the stage.
Miss Nellie Haskin came in on the stage from Wallowa.
Miss Carrie Southwick has had two runaways—one Monday evening and another Wednesday morning. The stage wagon was broken Monday and a wheel Wednesday.

Promise Lady's Serious Accident

Is Thrown From Rig in Front of Vehicle's Wheel—Other Items.

Promise, May 17.—Mrs. A. Peterson met with a serious accident on last Sunday. After church at Grossman Mr. and Mrs. Peterson with others started in their hack for Mrs. Rhoda Trump's home. While crossing a bridge where the water had washed deep ditches on either side she was thrown from the seat in front of the wheel, which struck her and went part way upon her back. After spending a part of the day at Mrs. Trump's she was able to be taken home. It is hoped that she will suffer no permanent injuries from the accident.

Quincy Trump was attacked by a cougar while crossing Grossman canyon the other night. He says the cougar jumped from a tree at him or his horse and was chased off by the dogs.

The all-day quarterly meeting at Grossman last Tuesday was a success both in attendance and interest, and all enjoyed the day.

LITTLE DAUGHTER OF CHESLEY JOHNSON DIES

Bessie, the infant daughter of Chesley Johnson, passed quietly away Saturday night about 8 o'clock, after a brief illness caused by a complete stoppage of the bowels. Had the little baby lived until the following day, it would have been one year old.

It was not at first suspected by the parent that the child was seriously sick, but upon carrying it to Dr. Anderson the physician saw at once the critical illness of the little tot. He worked nobly but in vain striving to prolong its life until medicine could act upon it, but the little soul fluttered out to its waiting mother within an hour afterwards. Mrs. Johnson, the baby's mother, preceded her last born to the Beyond by only a few months. The sympathy of the entire community is with the surviving parent, the father. Funeral services were held from the home of Dr. and Mrs. Anderson Sunday, and the remains interred in Alder Slope cemetery.

Mr. Johnson, the remaining parent, is stunned by the agony of this second loss within about six months. Always a tender parent toward his family, and living close to his babies since the death of Mrs. Johnson, he feels his loss only as a father of deep sensibility can feel. But one child remains with him, about which he may cling through life. His extremely sad lot elicits the voluntary sympathy of every one, and the whole community is plunged into grief for him.

Mrs. Harry Hough and children were passengers on Tuesday morning's stage for Zumwalt to visit her parents, Mr. and Mrs. E. F. Sargent.

PLANS ARE DRAWN FOR PUBLIC SCHOOL

CITY BUILDING LIKELY TO BE ENLARGED WITH ACCOMMODATIONS FOR 100.

The growth of Enterprise—having doubled in the past few years—such that the increase of school children demands school accommodations in excess of those now afforded. Looking to such an increase the public school board is wisely getting plans for the addition of a large wing, containing two splendid rooms and affording accommodations for 100 additional pupils.

The plans are now drawn up. The remodeling will greatly improve the architectural appearance of the present school building, and provide for the growth of the young populace. The school officials are commended for their foresight in this matter, which is a characteristic one of Enterprise's "enterprise," and will no doubt press the matter to a splendid completion.

EASTERN OREGON GOLD DISCOVERY IS BIG

The reported washing out of one pound of placer gold a day by E. H. lead of Baker City, an old prospector some 72 years of age, shows what may yet be expected of eastern Oregon mineral, with proper development work. The time is drawing when the eastern Oregon mineral fields will attract hundreds of prospectors and probably hundreds of thousands of capital into this section. This with the agricultural development of the district, and especially of Wallowa county, will insure a population sufficient to make Enterprise a busy county seat city of many thousands.

THE OSTEOPATHIC PRIMER. A Second Cause of Disease—Undue Muscular and Other Contractions.

In the same way that parts of the skeleton will slip out of correct position and interfere with nerves and blood vessels, so will unnatural and long continued contractions and congestions of muscles and their coverings of skin and fascia obstruct nerves and blood vessels. And so will contractions of ligaments, likewise displacements of cartilages which are pads between joints, all act to produce disturbance, disease. Did you ever stop to think that "disease" means bad or faulty order, absence of ease in running of the human machine? Exposure to cold, a fall, may cause undue contraction of the muscles, thus in abnormal pressure on the nerve as the result. Supposing this to be the case with a nerve to the shoulder.

Pain in any region, we may now conclude, may be due to a pressure on the nerve supplying the region. Pain is also caused by a nerve receiving a deficient or perverted blood supply. Now how can the pain in that shoulder be relieved or cured? Not by taking medicine; that is a makeshift, a temporary relief. Let us rather by a mechanical manipulation remove the pressure on the nerve, be it caused either by a contracted muscle, or a slight variation in the position of one or more of the vertebrae. Isn't that more rational? Isn't it?

Unobstructed circulation means health. This, then, permits a second osteopathic deduction, namely: If all obstructions to the flow of the body fluids such as the blood, the lymph and nerve force have been removed, Nature will restore the region affected to health.

The natural tendency of a disease toward the normal; that is why health is restored when you remove the cause of disease.—Osteopathic Health.

(To be continued.)

DINNER AND PROGRAM AT FRATERNAL HALL MAY 30

The Improvement League and the Library association ladies have arranged to give a dinner and memorial program at Fraternal hall, on Monday, May 30. Dinner will be served from 12 to 2 o'clock and the program will be at 3 o'clock.

The affair is in the hands of capable committees, and promises to be largely attended. An excellent program is being prepared, and the dinner will be such as Enterprise cooks are famous for—the best. The price will be 25c straight.

OLD HORSE FALLS INTO WELL IN THE NIGHT.

An old horse, a pitiable picture of advanced age and equine despair, fell into the dry and unweeded well in the rear of the Enterprise Press office last Friday night. The animal was discovered in the morning. According to the looks of the horse and the examinations of his teeth by local authorities he must have passed some twenty blistering summers and come twenty rigorous winters. Marshal Hug was communicated with, and responded at once, bringing aid. He dug the animal from the well, and later men arranged a derrick, getting the old fellow on his feet, when he walked off. No owner has yet been found. The brands on the animal are as follows: "R W" on the right shoulder and "F" on the left flank. This brand does not appear in the brand book of Wallowa county.

Meeting of the Two County Ball League

Manager Bilyeu Represents Enterprise Team at City of Elgin.

Manager Bilyeu attended the meeting of the Union and Wallowa county baseball league, Monday last in Elgin. Aside from the various business matters pertaining to the league, Manager Bilyeu presented the desires of the local city for two successive games here. The real object of the meeting was to establish a fixed schedule for the games during the entire season.

Mr. Bilyeu returned from Elgin Tuesday afternoon. He stated that the season's schedule had been arranged, which will be published as soon as the details have been completed.

Wallowa was represented in the league meeting. The Wallowa team, however, will not enter the league, in that two teams, required to make the proper scheduling, could not be found, and Wallowa therefore dropped out of consideration at this time.

CEMETERY WORK.

The Improvement League has appointed Thursday, May 26, as clean-up day at the cemetery. All interested in this work are requested to meet at the cemetery at 2:30 with rakes and other implements needed. Everybody is urged to turn out and help get the grounds in readiness for Decoration day.

The Making of Lenses.

The essential part of any device for the study of the starry millions—the sun, planets, comets and the nebulae that are perhaps new worlds in the making—is the lens or the optical train that consists of a series of lenses. It is this that makes the modern science of astronomy possible. There is absolutely no other human occupation that requires the accuracy of observation and the delicacy of touch that are requisite for the making of the finest lenses. These are the most perfect products of human hands. It may convey some idea of the labor required in the making of a large lens to say that at least one year's time is required for the grinding and polishing of a thirty inch object glass. A little lens two inches in diameter requires the unremitting care and attention of a skilled workman for two or three days. It is easy, then, to see why it is that even lenses of high class photographic work are costly. A forty inch object glass for a large telescope cannot be made in much less than four years' time, and if everything does not go just right it may require much longer than that.—Kansas City Star.

Persian Jests.
An exceedingly ugly man, says the Persian Joe Miller, was once in the mosque, asking pardon of Allah for his sins and praying to be delivered from the fires of hell. One who overheard his prayers said to him: "Wherefore, O friend, wouldst thou cheat hell of such a countenance? Art thou reluctant to burn up a face like that?"

Another story the Persian jester tells is that a certain person with a hideous nose was once on a time wooing a woman. Describing himself to her and trying to make an attractive picture he said, "I am a man devoid of lightness and frivolity, and I am patient in bearing afflictions."

"Aye," said the woman, "Wert thou not patient in bearing afflictions thou hadst never endured thy nose these forty years?"

All of which is more witty than kind—Harper's.

Bohemians and Wedding Rings.
"Here are two wedding rings that I have just made over," said the jeweler. "They are for Bohemian women. They lost their own rings, so they had their husbands' rings cut down to fit. That is a custom in their country. Both husband and wife wear wedding rings there. If the man loses his ring he has to buy a new one, but if the woman loses hers she wears her husband's. I do a good deal of that kind of work. Other women who lose wedding rings just buy another one and say nothing about it, but these women are too conscientious for that. Usually I have to make the man's ring smaller, but once in awhile it has to be spliced to make it fit. The women are always considerably chagrined over the splicing and offer all kinds of explanations to account for their big fingers."—New York Sun.

The Roulette Ball.
That capricious little ball that decides our fortunes at the ever fascinating game of roulette at Monte Carlo occasionally flies from the skillful croupier's hand, though not often. One afternoon it slipped from its manipulator's fingers and found its way into an Englishman's coat pocket. So impressed was the Englishman that he promptly lost a couple of hundred pounds. But the little ball once found a far stranger destination than that. Escaping from the croupier's hand, it flew straight into the mouth of a German onlooker, and he was so impressed that he promptly swallowed it.—London Bystander.

Tea in Paraguay.
When the natives of Paraguay drink tea they do not pour it from a teapot into a cup, but fill a gobbet made out of a pumpkin or gourd and then suck up the hot liquid through a long reed. Moreover, the tea which they use is altogether different from that which comes from China, being made out of dried and roasted leaves of a palm-like plant which grows in Paraguay and southern Brazil. The natives say that this tea is an excellent remedy for fever and rheumatism.

Sparrowgrass.
It is stated that a well known riddle was written by a costermonger. The riddle in question is a charade and runs as follows:

My first's a little bird as 'ops;
My second's useful in 'ay crops;
My 'ole is good with mutton chops.

The answer, of course, is "sparrowgrass," which the learned Dr. Parr always insisted on using in preference to the polliter "asparagus."—London Notes and Queries.

Alder Graduating Exercises May 28

Interesting Program Will Be Rendered on That Occasion—Five Complete Course.

The class of 1910 of the Alder public school, Jno. W. Kerns, principal, will hold its graduating exercises at Alder church, Saturday evening, May 28, at 8 o'clock. The public is cordially invited to attend. The class is composed of Estella Martha Laird, Ethel Lula McKinney, James Westerfield Weaver, Charles Franklin Litch, Herbert James Chenoweth. The program is as follows:

Invocation.
Opening Chorus—America.
Reading, "Excesses," Charles Litch.
Solo—Ruth Chenoweth.
Reading, "Battle Hymn of the Republic," Herbert Chenoweth.
Solo—Reta Litch.
Reading, "Columbus," James Weaver.
Class History—Ethel McKinney.
Class History—Estella Laird.
Duet—Effie and Sadie Kosak.
Address—Rev. W. H. Gibson.
Presentation of Diplomas—Jno. W. Kerns.
Benediction.

BEAUTIFYING THE DEPOT GROUNDS AT PRESENT.

The O. R. & N. has caused several carriages of cinders to be hauled to their station here, to be used in covering the loose stones that have formed the roadways and footpaths about the depot. The cinders are being leveled over the stones as a foundation, and when completed will add wonderfully to the beauty and convenience of the station grounds.

COUNTY'S METAL CULVERTS NOW ON GROUND

The metal culverts ordered some time ago from the county have arrived. The shipment includes enough of them for the roads of the entire county. The culverts are of corrugated iron, and will supplant the old wood culverts wherever the roads of the county are cut through by irrigating ditches and small natural waterways.

THE MEADOW DAIRY
