

THE WALLOWA COUNTY HIGH SCHOOL

Will open for the year, September 7, 1908. Instruction will be given in the Classical, Scientific, English and Commercial courses in accordance with the Teachers' Manual and Course of Study which will be mailed upon application.

The Manual should be in the hands of all who contemplate attending the High School this year, as it contains "Requirements for Admission," "Advance Standings," "Requirements for Graduation," "Special Students," "Length of School year," "Class Records," "Expense," and other facts of vital importance to the person entering.

The citizens of Enterprise will spare no effort to provide board and rooms at reasonable rates for those who make their wants known at an early date.

For further information, address,
J. W. KERNS, Principal, Enterprise, Oregon.

OREGON, BUILDERS

Are you doing what you can to populate your State?

OREGON NEEDS PEOPLE—Settlers, honest farmers, mechanics, merchants, clerks, people with brains, strong hands and a willing heart—capital or no capital.

The Oregon Railroad and Navigation Co.
—AND—
Southern Pacific Co. Lines in Oregon,

are sending out tons of Oregon literature to the East for distribution through every available agency. Will you not help the good work of building Oregon by sending us the names and addresses of your friends who are likely to be interested in this state? We will be glad to bear the expense of sending them complete information about OREGON and its opportunities.

COLONIST TICKETS will be on sale during SEPTEMBER and OCTOBER from the East to all points in Oregon. The fares from a few principal cities are

From Denver.....	\$30.00	From Louisville.....	\$41.70
" Omaha.....	30.00	" Cincinnati.....	42.20
" Kansas City.....	30.50	" Cleveland.....	44.75
" St. Louis.....	35.50	" New York.....	55.00
" Chicago.....	38.00		

TICKETS CAN BE PREPAID.

If you want to bring a friend or relative to Oregon, deposit the proper amount with any of our agents. The ticket will then be furnished by telegraph.

WM. McMURRAY, General Passenger Agent,
Portland, Oregon.

DRY DISTRICT FARMERS PRAISE HYBRID WHEAT

Big Yields Reported in the Palouse—From 35 to 50 Bushels Per Acre Harvested—Will Be Generally Used in Many Parts of the Inland Empire.

That the Washington State college experiment station has propagated new varieties of wheat which are proving of excellent quality, yield well, and are, in fact, almost ideal wheats for this section, seems certain, says a Pullman item. After many years of patient work, started by Professor W. J. Spillman, now with the department of agriculture at Washington, D. C., and followed by his successor, as head of the college experiment station, Professor E. E. Elliott, these new varieties of wheat have been perfected and are produced in sufficient quantities to seed vast areas.

Professor Elliott distributed some of the seed among a lot of the best farmers, trying to get some of it in every neighborhood that could be reached and requesting that the grain be carefully watched and reports sent in showing what had been accomplished. These reports are coming in and almost every one shows splendid results.

Hybrid Best Wheat Grown.

C. A. Price, a grain dealer of Pullman, who has a fine farm near town said: "My hybrid wheat has yielded well and is of excellent quality. I believe it will prove one of the best grains ever grown here. I have been urging that not a bushel of this wheat be sold for export, but that it all be used for seed. If the Washington State college had accomplished nothing else but produce these improved varieties of wheat it would prove a financial blessing to the state and the entire Northwest."

C. B. Kegley, master of the Washington State grange, said: "My hybrid wheat averaged a little more than 40 bushels per acre. My Russian averaged 25 bushels. The two fields join, the soil is the same, the ground was cultivated in the same way, and sown at the same time, the seeder going from one field to the other, part of both being planted the same day. The hybrid wheat is worth from 2 to 4 cents per bushel more than the Russian. With an increase of 40 per cent in the yield and 2 to 4 cents additional on the price, further comment seems unnecessary. It costs no more to raise an acre of one than of the other."

Gets Applications for Seed. A. J. D. Cornelius of Colfax writes: "I am much pleased with my hybrid wheat. We have not threshed it yet, but it promises so well that I have had more than 20 applications for some of the seed. Will let you know more when it is threshed."

J. A. Fontaine, Dayton, writes: "The wheat did well this season, despite the dry weather."

J. J. May, Wheelan, writes: "Wheat is not yet threshed, but we expect 40 bushels per acre. All my neighbors want seed from it."

Andy Meal, near Pullman, writes: "I threshed my wheat today. The new variety, known as 'No. 123,' yielded 19½ sacks per acre. The 40-fold grown on an adjoining field and under exactly the same conditions, yielded 15 sacks per acre. Am going to sow all my summer-fallow land to this wheat this fall."

Karl Gerhard, Hatton, Wash., writes: "I threshed 13 sacks of wheat from one sack of seed I got from you. Owing to the hot weather and the winds it shriveled some and did not yield as well as under favorable conditions, this being a bad year. I find it does not shell out as easy as the old kinds and the straw is strong. Had we had normal weather conditions I am satisfied the yield would have been large. I will sell none of the wheat, as I want to sow it this fall."

Schreck Gets 40-Bushel Average. M. E. Schreck of La Crosse has an average of 40 bushels per acre from the hybrid wheat and is enthusiastic over it. A report of Mr. Schreck's yield was published in The Spokesman-Review from La Crosse, recently.

Theo. Stewart, Pullman, writes: "I sowed 40 acres of No. 123 wheat and it was fine in every respect. Am going to sow all of my land to this variety and the hybrid called No. 143, of which I got one sack in the fall of 1907. I sowed this one sack on about two acres and got 38½ sacks of wheat from it and as fine wheat as you need to look at. It was very thin on the ground and I did not expect more than 20 sacks but it turned out almost double what I expected. I think it is far ahead of the club or 40-fold."

LINE-UP TO FILE ON WALLOWA TIMBER LAND

A score of persons are already in the line-up at the La Grande land office, each anxious to file on a claim in township 4 north, range 41 or in township 6 north, range 44 Wallowa county. All of 4 n, 41, and certain sections in 6 n, 44, will be thrown open for settlement on September 15.

The line-up started Tuesday, August 25, when nine Portland people under the guidance of a cruiser from that city, took chairs at the land office door, and will keep their seats themselves or turn them over to substitutes until the 15th of September. There is, of course, a possibility of some arrangement being made where by ethics will be the predominating feature and that the land seekers will be able to leave their places until the morning of the opening.

With one exception this will be the longest wait in the history of the land office at La Grande and the line is maintained until the evening of the opening day, it will be the longest continuous wait known there. The same tract of land that these men seek, precipitated a rush last year, just an even 30 days before the doors were to open, but a satisfactory agreement between the contestants was reached whereby the members of the line disbanded. They never returned, however, as the land was later withdrawn from entry.

It is now open to settlement and will be opened to entry on September 15.

The number in line has been added to since August 25 and it is stated more are coming, says the Observer. They are eastern men who want Wallowa county land, and though they are a trifle late, they may secure some valuable tracts. In view of the fact that that section is covered with squatters, and that the first nine men will secure first choice, it does not appear that there will be very many choice selections left. It is said by cruisers and those who have visited the land in question that there are a few exceptionally fine tracts of land in the section to be thrown open. But squatters are thick on that land and they, of course, have a preference right in that they have 90 days to make entry after the opening day.

First Nine Fortunate. The first nine in the line-up are extremely fortunate, as it is evident each of them will get a profitable location. They have visited the section and have agreed among themselves on what they want, and while there, avoided land located by squatters.

There are no women among the nine, and it is believed the group will maintain its advantage by keeping constantly in the chairs for the next 20 days.

Harness and Saddles

L. BERLAND, THE HARNESS AND SADDLEMAN

Will supply your needs in the Leather Goods line more cheaply and give better satisfaction than any other dealer in Wallowa county. Let him fit you out for the season's work. Repair work a specialty.

ing constantly in the chairs for the next 20 days.

MANY MEN ARE AT WORK ON SNAKE RIVER LINE

George C. Thompson, superintendent of construction on the new Northwestern railroad that is building up Snake river, is in the city to hire men for construction work and in other business, says the Baker City Herald.

He stated that work on the big tunnel was about one-third finished. There has been a delay because of low water in Snake river impeding their plans of rafting of timbers to different points on the new line where needed. This has compelled them to float timbers loosely down the stream and has caused a great inconvenience.

One hundred and twenty-five men are now at work on the railroad building. Double shifts are run and no time is being lost. Everything is lively along the line and there is apparently no possibility of a cessation of activity.

At the Oxbow power project preliminary work is going on. Cabins are being erected, camps organized and about 40 men are now employed there.

IMNAHA BRIDGE.

Imnaha, August 27.—Roy Edgeman's were here getting fruit from J. C. Johnson.

Jasper Simmons and family and son Roy and wife are home from an outing. They report a good time and lots of grouse.

John Hamilton caught 60 fish in the Imnaha.

Mr. and Mrs. Ralph Sprague were guests at the Beehan homestead Saturday.

J. A. Denny is building a new dwelling.

John Weaver and daughters Nina and Iva of Enterprise were on the Imnaha picking blackberries. They picked 16 gallons. Fall fruit will soon be ready.

Johnnie Johnson reports he likes his ranch on Pine Creek.

E. A. Anderson's of Crow creek were picking blackberries at Jack Johnson's.

GAME LAWS.

Any person knowing of any violation of the game or fish laws of the state, or of persons not properly keeping screens over irrigator ditches, are requested to notify
