

# THE NEWS RECORD

(Twice-a-Week.)

AN INDEPENDENT NEWSPAPER

Formerly the Wallowa News, established March 3, 1899.

Published Wednesdays and Saturdays at Enterprise, Oregon, by THE ENTERPRISE PRESS

Office East side Court House Square Entered in the Enterprise postoffice as second-class matter.

SATURDAY, JUNE 5, 1909.

## SHILLOCK TAKES CHARGE OF FISH HATCHERY

Mr. and Mrs. Max M. Shillock went to the state fish hatchery on the wallowa, two miles below Minam, Tuesday, where on July 1, Mr. Shillock will take up his duties as superintendent. Meanwhile, for the coming month, he will familiarize himself with the work.

Mr. Shillock was first appointed superintendent of the hatchery at Ontario, which was the largest in the state, but it has been found necessary to abandon it because of the immense amount of sand in the Snake river killing the young fry.

Mr. and Mrs. Shillock have resided the past year on Alder Slope. Mr. Shillock is a newspaper man and formerly connected with the Oregonian. They came to this county for his health, and have made a host of friends, who are sorry to see them leave but are glad he has secured this fine position where they can still stay in Wallowa county.

## Women Who Are Envied.

Those attractive women who are lovely in face, form and temper are the envy of many, who might be like them. A weak, sickly woman will be nervous and irritable. Constipation or kidney poisons show in pimples, blotches, skin eruptions and a wretched complexion. For all such, Electric Bitters work wonders. They regulate Stomach, Liver and Kidneys, purify the blood; give strong nerves, bright eyes, pure breath, smooth, velvety skin, lovely complexion. Many charming women owe their health and beauty to them, 50 cents at Burnaugh & Mayfield's.

## If You are Worth \$50,000 Don't Read This.

This will not interest you if you are worth fifty thousand dollars, but if you are a man of moderate means and cannot afford to employ a physician when you have an attack of diarrhoea, you will be pleased to know that one or two doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy will cure it. This remedy has been in use for many years and is thoroughly reliable. Price 25 cents. For sale by Burnaugh & Mayfield.

## NOTICE FOR PUBLICATION.

Department of the Interior. United States Land Office at La Grande, Oregon, May 3, 1909.

Notice is hereby given that Samuel A. Gotter, of Enterprise, Oregon, who, on October 19, 1907, made Homestead Entry, No. 15631-Serial, No. 65150, for  $\frac{1}{2}$  NE $\frac{1}{4}$ , and  $\frac{1}{2}$  SE $\frac{1}{4}$ , Section 22, Township 1 South, Range 44 East, Willamette Meridian, has filed notice of intention to make Final commutation Proof, to establish claim to the land above described, before D. W. Sheahan, U. S. Commissioner, at Enterprise, Oregon, on the 21st day of June, 1909.

Claimant names as witnesses: Curtis J. Sanford, John E. Osterhout, John Romine, Charles Thomas, all of Enterprise, Oregon. F. C. Bramwell, Register.

## NOTICE FOR PUBLICATION—ISOLATED TRACT.

Public Land Sale. Department of the Interior. U. S. Land Office at La Grande, Oregon, May 17, 1909.

Notice is hereby given that, as directed by the Commissioner of the General Land Office, under provisions of Act of Congress approved June 27, 1906 (34 Stats., 517), we will offer at public sale, to the highest bidder, at 10 o'clock a.m., on the 7th day of July, 1909, at this office, the following-described land: SW $\frac{1}{4}$  NE $\frac{1}{4}$  and SE $\frac{1}{4}$  NW $\frac{1}{4}$  Section 18, T. 1 N., R. 46 E. W. M., Serial No. 01910.

Any persons claiming adversely the above-described land are advised to file their claims, or objections, on or before the time designated for sale. F. C. Bramwell, Register. 785 Colon R. Eberhard, Receiver

# Home Course In Modern Agriculture

## XVII.—The Farm Home

By C. V. GREGORY,

Agricultural Division, Iowa State College

Copyright, 1909, by American Press Association

**T**he farmer is more important than his farm, and the most important crop he raises is not corn nor hogs, but boys and girls. The success of a farmer is not measured so much by the money he makes as it is by the happiness he brings to himself and to his family. One of the surest ways of accomplishing this end is by making the home surroundings attractive.

There is no place on earth where it is easier to have an attractive home than on the farm. Yet in spite of this too many farm homes are located in the middle of a weed patch that goes by the name of garden or are hidden behind such a thick jungle of trees that it is impossible to see in or out.

The first thing to consider is the house itself. It should be situated on the highest part of the hill on which the farm buildings stand. A house need not be expensive to be homelike and convenient. Indeed, the most expensive houses are often the least homelike.

The starting point is the cellar. With but little additional expense this can be made the full size of the house. In this case the foundation walls should extend to the bottom of

FIG. XXXIII—FARM HOME BARE AND DESOLATE FROM LACK OF TREES, SHRUBS AND LAWN.

the cellar. The first course should be of hollow brick, laid end to end, and connecting with a tile drain on the lowest side. In this way seepage water will be kept out of the cellar. A cement floor is a great advantage and is inexpensive, since the cement need not be more than two or three inches thick.

The cellar should be divided into about four rooms. Hollow brick make good partition walls and at the same time help support the floor. One of the rooms may be used for vegetables, one for fruit, milk and butter, one for a laundry and the fourth cemented on the inside and used as a cistern. If the furnace is used another room will be necessary, or the cistern can be located outside.

For an ordinary sized family a hundred barrel cistern is about the right size. A partition of a double layer of filter brick, with gravel and charcoal packed between, should extend across it. The water is drawn out from the opposite side of the filter from that to which the pipe from the roof empties. In this way the water obtained is pure enough for cooking or drinking. A plentiful supply of soft water is a luxury that can be obtained so cheaply that no one can afford to do without it. Wood is still the cheapest and most satisfactory building material. In building the house the two extremes of size should be avoided. If the house is too small it will be crowded, while if too large it costs more and is harder to keep clean.

In arranging the rooms, convenience and ease of keeping in order are the chief considerations. The large and solemn "spare room," which was opened only on state occasions, has largely given way to the bright, cheerful living room with its bookcases and work and reading tables, which is used every day and evening in the year. This room, together with the dining room, kitchen and bedroom, with a wash and bath room if possible, will comprise the first story.

A wash room, with a sink and a place for overshoes, coats and hats, is a great help in keeping dirt out of the kitchen. A bathroom is also a great convenience.

A cupboard in the wall between the kitchen and dining room is handy, as the dishes can be reached from either side. A spring door between the two rooms keeps out the flies and at the same time opens easily. A bedroom on the ground floor is almost a necessity, especially in the case of sickness.

The upstairs will of course be largely devoted to bedrooms, although it is often convenient to have one small room fixed up for a library. The attic makes a good storeroom for seed corn.

Probably the most satisfactory way to heat the house is by a furnace. This is cheaper and cleaner than stoves. If the furnace room is made large enough to hold a load of coals and several tons of coal the work of fire building will be greatly reduced. A register in the hall upstairs will be enough to take the chill off the sleeping rooms. It is a good plan to have a furnace pipe run to the kitchen, too, and use a gasoline or kerosene range for cooking. This is cheaper, handier and cleaner than a cook stove, and the kitchen can be kept much cooler in the summer time.

Most farm homes are very poorly lighted. A kerosene lamp is dirty, smells bad and does not give very much light. A gasoline lamp is much better. Best of all is the acetylene gas system. After this is once installed it can be operated cheaply and will furnish an abundant supply of light.

The water system is another thing in which farmhouses are behind those in the city. There is scarcely a house in a town of any size but that is provided with water and sewage systems. In the country these are the exception rather than the rule, yet they can be put in at a small cost.

An air tight tank in the cellar is sometimes used to supply the pressure for a farm water system, but is rather expensive. The water can also be drawn from the elevated tank at the barn, if one is used there, the only disadvantage in this case being that cistern water cannot be used. On the whole, the most satisfactory plan is to have a small galvanized tank in the attic. A little covering in the coldest weather will keep it from freezing, and a few minutes work with the cistern pump each day will keep it filled.

By having a heater attached to the furnace or to the kitchen stove and making the proper connections hot and cold water can be supplied to the bathroom, the wash room and anywhere else that it is wanted.

The laundry room downstairs is the place where the convenience of such a system will be appreciated most. In this room the washing machine, tubs, wringer and other utensils can be kept. An opening in the floor connected with the tile drain will carry off the waste water, and hot and cold water from upstairs will be always on tap. Such a room, together with the entire water system, can be fitted up for less than \$100.

Another convenience that can be installed at small cost is a sewerage system. This can be connected with the bathtub and sink, and with a small additional expense another luxury that is seldom found on the farm, an indoor closet, can be added. Drain-pipe well cemented at the joints should be used in constructing the sewer. The cheapest form of outlet is the "septic tank." This is a small underground tank divided into four compartments, so arranged that when the first of these becomes full it will overflow into the second, and so on. The tank should be covered and provided with a ventilator. The action of bacteria in the septic tank will destroy all the solid matter, so that the water which flows out the lower end will be clear and have no objectionable odor. With an occasional cleaning out such a tank will last forever.

The house should be provided with plenty of porches. These increase the expense somewhat, but also add much to the comfort and appearance of the house. Vines trained up over them to keep out the sun and screens to keep out the flies make them still more comfortable.

Nothing adds more to the external appearance of the house than a neat lawn of ample size. Do not make it

FIG. XXXIV—A CORNER OF A NEATLY ARRANGED LAWN.

too large, however, or the work of mowing will be likely to be neglected. A lawn is not hard to make. A little work leveling and preparing a fine seed bed and a liberal application of blue grass seed that will grow will almost certainly result in a good lawn. Do not make the common mistake of planting trees too close to the house. They detract from the appearance and make the house close and stuffy. The opposite extreme should be avoided also. A few trees about the edges of the lawn furnish grateful shade and provide a flanking for the picture of which the house is the central figure.

The decorative value of shrubs is often not appreciated as much as it should be. A climbing rosebush over the porch or a few dwarf varieties in out of the way corners will add to the color and beauty of the yard. There are many other flowering shrubs, such as snowballs, syringias and lilacs, that can be used to fill in empty spaces and corners.

A row or two of hard maples or elms along the driveway, with a thick evergreen windbreak to the north, will finish the supply of necessary trees unless there are corners or bare spaces about the yards that will be better for a tree or two.

## Stockholders Annual Meeting.

The Annual Meeting of the Stockholders of the Enterprise Hotel Co. will be held at the company's hotel building in the city of Enterprise, Oregon, on Monday the 21st day of June, 1909, at the hour of two o'clock p.m., for the purpose of electing a board of directors, and transacting such other business as may legally come before said meeting.

By order of the board of directors. Dated this 1st day of June, 1909. W. R. Holmes, President. Geo. W. Hyatt, Secretary.

## Sore Nipples.

Any mother who has had experience with this distressing ailment will be pleased to know that a cure may be effected by applying Chamberlain's Salve as soon as the child is done nursing. Wipe it off with a soft cloth before allowing the baby to nurse. Many trained nurses use this salve with best results. For sale by Burnaugh & Mayfield.

We are the sellers of the E. Howard watches, the best on the market. Call for them at Martin Larsen's.

## W. B. APPELEGATE,

Notary Public.

Collections made, Real Estate bought and sold and all business matters attended to. Call on or write me. PARADISE, OREGON.

## ALL THE DAILY PAPERS, MAGAZINES AND THE National Weeklies

at Coleman Brothers The Best Cigars, Confectionery and Fruit. Stationery Supplies of all kinds. First door east of Postoffice.

## Summer Rates East

During the Season 1909 via the

## Oregon Railroad & Navigation Co. OREGON SHORT LINE AND UNION PACIFIC RAILROAD

from Portland, Seattle, Spokane, Tacoma, Walla Walla and all points on The O. R. & N. line

To OMAHA and Return - \$60.00  
To KANSAS City and Return - \$60.00  
To ST. LOUIS and Return - \$67.50  
To CHICAGO and Return - \$72.50

and to other principal cities in the East, Middle West and South. Correspondingly low fares. On Sale June 2, 3; July 2, 3; August 11, 12

To DENVER and Return - \$55.00 On Sale May 17, July 1, August 11

Going transit limit 10 days from date of sale, final return limit October 31st.

These tickets present some very attractive features in the way of stopover privileges, and choice of routes; thereby enabling passengers to make side trips to many interesting points enroute.

Routing on the return trip through California may be had at a slight advance over the rates quoted.

Full particulars, sleeping car reservations and tickets will be furnished by any O. R. & N. local agent, or

WM. McMURRAY, General Passenger Agent, Portland, Oregon. J. G. HARMAN, Agent, Enterprise, Oregon.
