

# Constipation

"For over nine years I suffered with chronic constipation and during this time I had to take an injection of warm water once every 24 hours before I could have an action on my bowels. Happily I tried Casoreta, and today I am a well man. During the nine years before I used Casoreta I suffered untold misery with internal piles. Thanks to you, I am free from all that this morning. You can use this in behalf of suffering humanity. B. P. Fletcher, Roanoke, Ill.

## LEADER PNEUMATIC WATER SUPPLY SYSTEMS FOR COUNTRY HOMES

The best and most logical method of furnishing water yet devised. The tank is placed in the basement or on the ground near the house and keeps the water cool in summer and proof against freezing in winter. It never leaks. It is impossible for impurity to get into it. It outlasts the building in which it is installed. It costs a little more to begin with, but there is no second cost. We have a catalogue which illustrates and describes the Leader system. Ask us for it.

**An Intermittent Memory.**  
A small customer appeared at the grocery store, says a writer in the Century Magazine, and the smiling grocer asked him what he wanted.

"Please, mister," said the boy, "I can't remember what ma sent me for, but you can give me two cents' worth o' peppermint candy, 'cause she said I could keep the change."

**Curious Giant Cranes.**  
Australia, the land of oddities, animal, vegetable and mineral, has few more curious creatures than the giant cranes—often five and six feet in height, with beautiful blue-gray plumage—which are called native companions. These huge birds mate for life and, as mates, are singularly and touchingly devoted to one another.

**Force of Habit.**  
"I beg your pardon," said the landlord, "but do you walk in your sleep?"

"No, sir," answered the guest, who had arrived the day before. "I hope I didn't disturb you last night, but the fact is I've been a country doctor for thirty years, and I'm so used to being called up two or three times during the night that unless I get out of bed and walk around once in a while I don't get any sleep."

# OREGON STATE ITEMS OF INTEREST

### ENGLISH CROP SMALL.

British Grower Tells Method of Hop Cultivation.

Salem—Davis Jones, owner of a hop yard of several hundred acres in Worcester-shire, England, and one of the largest growers in that country, is in the city, the guest of Jack Carmichael, a prominent Oregon hopman.

Mr. Jones made the interesting statement that English and continental hops will not be as heavy a crop as last year, and that from present indications English hops will command at least 30 cents in the market. Last year there were 38,000 acres of hops in England, and this year only 31,000. Thirty cents is not considered a particularly high price in England, for it costs from 18 to 20 cents per pound to produce the crop.

The method of culture is radically different than from that in use in this country, and while it is expensive, it is very thorough and effective. The trellis system is used, with a wire one foot from the ground and another near the top of the poles. To each of these wires hooks are attached and the wires are never taken down, the hops being cut off and picked. This method of course prevents cross-cultivation and necessitates plowing in only one direction. The space under the wires is worked by hand with hoes or forks. Fertilizers are used extensively, the usual quantity being about 20 tons to the acre. During the cultivating season the ground is gone over about 20 times. The spraying system used in England is unique, consisting of a main pipe four inches in diameter, from which laterals as small as an inch in diameter radiate in every direction through the fields. On each acre there are two taps for the attachment of hose. The spraying material is forced through the pipes by steam power. Hops are washed five or six times with about the same solution as that used in this country.

### STUDENT LOAN FUND GROWS.

University Now Has \$5,000 Drawing Interest for Needy Students.

University of Oregon, Eugene—The past year has shown a remarkable gain in the amount of the Student Loan Fund at the University of Oregon. From a total of approximately \$800 at the beginning of the year it now amounts in round numbers to \$5,000, and the indications are that this amount will also be largely increased during the coming year. Nearly 15 gifts to the fund have been made, ranging in amount from \$25 to \$1,000.

One of the largest of these was made by the D. P. Thompson estate, of Portland, and was for \$1,000. Another gift of approximately the same amount was received, but its donors have requested their names withheld. Senator R. A. Booth, of Eugene, gave \$500, and several others added amounts varying in size from \$150 to \$250.

### Activity in Gold Mines.

Grants Pass—There will be much activity among Southern Oregon mines this fall. Many mining men looking over the field in order to obtain good options on some of the best paying property. In conjunction with this movement on the part of buyers, some of the owners are introducing the diamond drill. One of these machines arrived this week to be used upon the property of the National Copper company, located 17 miles from this city. It is understood that the Buckeye group of mining claims will also have a machine of the same kind here within a few days to make tests on their properties which are in the same neighborhood.

### Creamery Reopens in Columbia.

Mist—The creamery belonging to the Nehalem Valley Cream association, of this place, will open for business August 2, with Fred Mann, formerly of a Portland creamery, and E. F. Messing, of this city, as managers. The creamery has been idle since November, when the former manager absconded with several hundred dollars, leaving the association in bad shape financially. The creamery will cover almost the whole Nehalem valley with milk routes. The Nehalem valley is as well as most of Columbia county is fast becoming a dairying section.

### Forest Insurance Men to Meet.

Forest Grove—B. L. Barry, of Dayton, secretary of the Oregon Society of Mutual Insurance, is sending out to all members in the state invitations to attend the national convention, which is to be held in Portland, August 17, 18, 19 and 20. Secretary Hollis, of the Bankers' and Merchants' Mutual Fire Relief association, of this city, is sending invitations to all the members of his company. A large attendance is expected.

### Fine Grain Yield at Weston.

Weston—The Price brothers, James and Marvin, have finished threshing 1,200 sacks of barley with their combine on Dry creek. They have a good yield, averaging 65 bushels an acre. They are now in wheat, which is running between 35 and 40 bushels an acre and is quite free from smut. A. J. McIntyre had 150 acres in wheat, north of town, which yielded 40 bushels an acre.

### SECURES LAKE TRADE.

Klamath Merchants Boost for Good Roads Over Mountains.

Klamath Falls—Ranchers from the Silver Lake section, in Northern Lake county, are coming to Klamath Falls for their supplies. Already several of them have made the trip of approximately 175 miles and have returned home with their wagons loaded with provisions purchased from the merchants of this city. The one drawback to getting all of the trade of Northern Lake county is the poor condition of the roads. At this season of the year it is possible to travel over most any kind of a trail, but with the first light storms the roads become practically impassible. Northern Lake county is anxious to do its trading in this city and the merchants of that section are willing to have their freight shipped via Klamath instead of Shaniko, the way it has been coming. The distance is about the same, but the freight rate is lower. It is very likely that steps will be taken by Klamath county to improve the roads to this isolated section, so that the vast territory in the remote parts of both Klamath and Lake counties will be enabled to get all their supplies from Klamath Falls.

This city is so situated that the arrival of the railroad has made it the natural distributing center for all Southern Oregon. The only drawback is the road question. Klamath county is now prepared to build good roads at a reasonable cost, but the county is too large to construct highways in every section in a short time. The opening up of the Lake county traffic to Klamath Falls also makes an opening for Portland wholesalers, who will have to hustle in order to meet the competition of Sacramento and San Francisco.

### Big Tract Subdivided.

Grants Pass—Subdividing of large tracts of orchard and farming land still continues in this part of Rogue river valley. Along the Applegate river, near Murphy postoffice, 500 acres of land, with 200 acres under irrigation, and sufficient water rights and ditches to irrigate 150 more, besides abundance of water in the river that may be appropriated for the remainder of the premises will be subdivided into ten-acre lots and planted into fruit. There will be an earnest effort on the part of the owners to sell only to men with families, who desire to have homes in a pleasant climate, and to be close to the railroad in order to market fruit.

### Council Favors Franchise.

Oregon City—The differences between the municipal government and F. M. Swift, who is promoting the construction of an electric railway system from Oregon City to Silverton, through the Molalla valley, will probably be adjusted, as the council has given favorable consideration to an ordinance conveying a 25-year franchise. The first 10 years there is to be no consideration, the next 10 years Swift is to pay \$500 per annum, and the last five \$1,000.

### Brief Shortest Filed.

Salem—L. H. McMahan, attorney for J. K. Sears, plaintiff in the action to prevent the use of \$10,000 state money in the Crater lake highway, has filed his brief in the Supreme court. The brief is one of the shortest ever placed on record in the Appellate court of Oregon.
