The King's Business

Over 100 have thus far confessed Christ. The Spirit of God is wonderfully prevailing the meetings and decisions are being made at every service. God is mightily evidencing His power to save men. Why should not every man, woman and child in Enterprise accept Christ as their Savior ere these meetings close? Without Christ you are lost. "He that hath the Son hath life; he that hath not the Son of God, hath not life."

Last Sunday was a day of great blessing. The evening service witnessed a crowded house. It was a service of unusual power. Many said it was the best service we have hitherto had.

The sermons this week are on "The Devil." Exceptional interest is being manifested. The two addresses we have already had, "Satan's Origin" and "Satan's Work," have been a revelation to everyone who has heard them. No person can afford to miss these addresses. The personality and character of Satan is no less clearly set forth in the Scriptures than the personality and character of Christ. Dr. Pratt backs his statements with the Scriptures. No more forcible presentation of the truth have we ever heard. The Bible is stored with riches to which our eyes had never before opened.

Come and get the benefit of these addresses and the afternoon Bible readings. PRESS COMMITTEE.

TWO ROUTES ARE BEING SURVEYED

(Continued from first page.)

direction, it is understood the findings have not been satisfactory, and that the original Mill creek survey will quite likely find more favor with the promoters, says the Walla Walla Union.

According to those who are conversant with operations on the river, the grade has been found too great for practical purposes, and other difficulties such as danger of freshets, and the narrowness of the canyon, are said to be bearing factors in the estimation of the engineers. It is said to have been the intention of the engineers to survey a route from the head of the south fork of the Walla Walla river to the head of the Salmon river, and plans for a two-mile tunnel were considered. It is reported the situation for the tunnel is ideal, but other unfavorable conditions are expected to cause the abandonment of that idea.

Where the Surveyors Are.

The above two conflicting reports are given and you can take your choice. Men from the Garden of Eden, in Enterprise Wednesday, say Ranger Roy Smith spent the night a few days ago in the camp of the North Coast surveyors on the headwaters of Little Salmon, this side of the Blue Mountains.

HOW SYMPTOMS MAY MISLEAD.

Who is there of us all, rich or poor, learned or otherwise, who has not at some time or other read a booklet issued by the proprietors of some patent cure-all? Who has read such a booklet almost with terror, realizing that we had most, if not all of the symptoms described, and that we must therefore be afflicted with practically all of the diseases known to man?

And is it not plain that there is in this a direct lesson to sufferers from any cause whatsoever? If symptoms are so general, if you may have the same ones in such a variety of diseases, is it not apparent that they must be but a poor guide by which to decide what is your trouble? And is it not chiefly with symptoms that doctors have been accustomed to deal?

The other way is the way of the osteopathic physician. He takes due account of symptoms, of course, and gives directions as to diet and ways of life with as much skill as any other, at least. But his primary method is to make an examination that will reveal the defect in the structures of the body that has interrupted the flow of the blood and of the nerve force and thus made the trouble possible. He attacks the cause of the symptoms directly, instead of the condition, and that is why he is getting better results.—Osteopathic Advance.

A man who has kept count of the number of kisses exchanged with his wife since their union consents to its publication as follows: First year, 35,500; second year, 16,000; third year, 3,650; fourth year, 120; fifth year, 2. He then left off keeping the record.

Everyone seems to know all about "Artist" Earle's affinities but has anyone ever heard anything about his achievement as an artist?
