His Athletic Neighbor.

A young man inmate of a boarding house had been disturbed night after night by the boarder in the next room doing things with a punching bag he'd rigged up in the room some way. At breakfast each morning the young man would look over the crowd and wonder who the bag puncher might be, but there was no one in sight but a bunch of women and eight or ten men with narrow chests and retreating chins. One night he made up his mind to knock on the bag punching roomer's door and ask him to put over his exercise until daylight when all the world's awake. The man might be small enough to bulldoze even with all his athletics. The door opened and there, clad in a tight fitting red jersey, was a robust, bixom woman of perhaps thirty summers.
"And what did you say to her?" the young man was asked.
"I was so startled," replied he, "that I asked what afterward seemed to me the most natural request I could have made. I asked her if she'd lend me a couple of matches."—Cleveland Plain Dealer.

The Persistence of Colds.

Why is it that we are so heavily subject to colds? Other epidemic diseases—measles, typhoid, scarlet fever, diphtheria—may get hold on us once and there is an end; it is not usual to have any of them twice. We brew in our blood immunity. The poison of the disease evokes in us its proper antidote. Our blood cells make a sort of natural antitoxin and keep it in stock, so that we are henceforth protected against the disease. A well vaccinated nurse, for example, works with safety in a smallpox hospital, where the very air is infective, but her blood is so changed by vaccination that the smallpox cannot affect her. By scarlet fever, again, we are, as it were, vaccinated against scarlet fever. The rejection of our blood against the disease immunizes us. No such result follows influenza or a common cold. We brew nothing that is permanent. We are just as susceptible to a later invasion as we were to the invasion that is just over.—London Spectator.

NO MORE TROUBLE FROM PUNCTURES
NAILS, Tanks or Glass will not let the air out. Sixty thousand pairs sold last year. Over two hundred thousand pairs now in use.
DESCRIPTION: Made in all sizes. It is heavy and easy riding, very durable and lined inside with a special quality of rubber, which never becomes porous and which closes up small punctures without allowing the air to escape. We have hundreds of letters from satisfied customers stating that their tires have never been pumped up once or twice in a whole season. They weigh no more than an ordinary tire, the puncture resisting qualities being given by several layers of thin, specially prepared fabric on the tread. The regular price of these tires is \$8.50 per pair, but for testing purposes we are making a special factory price to the rider of only \$4.80 per pair. All orders shipped same day letter is received. We ship C. O. D. on approval. You do not pay a cent until you have examined and found them strictly as represented. We will allow a cash discount of 1 per cent thereby making the price \$4.80 per pair if you send FULL CASH WITH ORDER and enclose this advertisement. You run no risk in sending us an order as the tires may be returned at OUR expense if for any reason they are not satisfactory on examination. We are perfectly reliable and money sent to us is as safe as in a bank. If you order a pair of these tires, you will find that they will ride easier, run faster, wear better, last longer and look finer than any tire you have ever used or seen at any price. We know that you will be so well pleased that when you want a bicycle you will give us your order. We want you to send us a trial order at once, hence this remarkable tire offer.
IF YOU NEED TIRES—Don't buy any kind at any price until you send for a pair of the special introductory price quoted above, or write for our big Tire and Sundry Catalogue which describes and quotes all makes and kinds of tires at about half the usual prices.
DO NOT WAIT—Get a pair of tires from anyone until you know the new and wonderful offers we are making. It only costs a postal to learn everything. Write it NOW.

Why Not Pass the Plate?
They ought to pass the plate at church weddings. It comes natural to do it in church, and to do so would add a pretty and useful employment to the duties of the ushers, who always have a little spare time before the bride arrives. And, really, getting married is more expensive than ever, and, though wedding presents are excellent in their way, what the young people usually need the most is cash. Instead of the list of gifts which the newspapers sometimes print we should read, "The collection yielded \$4,000.00." That would be nice. It is much easier to store and care for money than plate and glass! And money always fits and there is no such thing as an embarrassing duplication of dollars.—Life.

He Saved the Patent Office.
When in the war of 1812 the British, who had taken Washington, trained their guns upon the patent office, Dr. Thornton, throwing himself directly before the guns, cried:
"Are you Englishmen or Goths and Vandals? This is the patent office—a depository of the ingenuity and inventions of the American nation, in which the whole civilized world is interested. Would you destroy it? Then let the charge pass through my body."
And the building was spared. Twenty-four years afterward, however, it was destroyed by fire, together with everything in it.

The Harm of Damp Houses.
It is dangerous to health and even to life in a damp, moldy house or one built over a moldy cellar. Many years ago the London Lancet in an article on diphtheria traced the disease in certain cases to the presence of certain molds and fungoid growths which seemed to be breathed into the throat. Remember, one of the best disinfectants is lime. Moldy cloths, such as shoes and other articles that are unfit for use, should be destroyed at once.

Why He Applauded.
"Are you fond of music?" asked a stranger of the young man at the concert who was applauding vigorously after a pretty girl had sung a song in a very painful way.
"Not particularly," replied the young man frankly, "but I am extremely fond of the musician."

Out of Her Reach.
"Does your heart ever reach out for the unattainable?"
"No, but my hands do when my husband is not at home. There are three buttons at the back of my gown that I can't reach."

More Appropriate.
"I teach my parrot only short words."
"Do you? Now, I should think that parrots were better adapted to learning polysyllables."

Making a Lawn.
On his English tour an American was admiring the velvet smoothness of a certain sward, and, being possessed of land and an overpowering confidence that with money all things are possible, he asked the head gardener how to produce such a lawn. And the gardener said: "It's easy enough, sir. All you need do is to remove all the stones, plow up the ground, plant it with grass seed and roll it for 300 years."

Our Friends.
If we choose our friends for what they are, not for what they have, and if we deserve so great a blessing, then they will be always with us, preserved in absence and even after death, in the amber of memory.—Cleero.

Couldn't Talk.
De Style—You say that loving pair of deaf mutes were sitting in the parlor and didn't carry on a conversation? Gunbusta—They couldn't, for they were holding hands.—New York Press.
