Puzzled the Packer.

The first organized work of women in a relief corps was led by Florence Nightingale in the Crimean war of 1855. So unaccustomed were people to that service at the time that it called out some curious comment. Writing of "Chinese" Gordon, Dr. Butler tells in his book, "Ten Great and Good Men," how the boys at Cambridge met the call upon them for hospital stores, One day a letter came suddenly from the war office telling us that any warm clothes for the invalids at Scutari would be prized by Miss Florence Nightingale. At once in every college a committee was extemporized of lending undergraduates, charged to collect presents of flannel jackets, trousers. "blazers," rugs, greatcoats, furs, even

sealskins. In a few hours box after box was filled with these treasures, and all the boxes were kindly and gratuitously packed for us by the leading upholsterer of the town, his foreman simply remarking to me in a tone which General Gordon would have enjoyed:

"A nice consignment for a lady, sir."

Cause of Twilight.

Twilight is a phenomenon caused by atmospheric refraction. When the sun gets below the horizon we are not immediately plunged into the darkness of night. Although the sun is below our horizon, rays of solar light are bent or refracted by the terrestrial atmosphere and continue to furnish some slight illumination. The process continues with diminishing intensity until the sun is so far below the horizon that the refracting power of the atmosphere is no longer able to bend the rays enough to produce a visible effect. The time after sunset that the sun reaches such a position varies with the latitude of the place. There is less twilight at the tropic zone than at the temperate or frigid zone. This is due to less time taken by the sun's rays to pass through the atmosphere, at the tropic zone the sun's rays being perpendicular and at the temperate and frigid zones oblique.-New York Amer-

With a Grain of Salt.

The earliest record of the saying "with a grain of sait" dates back to the year 63 B. C., when the great Pompey entered the palace of Mithridates and discovered among his private papers the description of an antidote against poisons of all sorts, which was composed of pounded herbs. These, according to the recipe, were to be taken with a grain of salt. Whether this was meant seriously or as a warning sarcasm is not known, but thenceforth it became the custom to say that doubtful preparations should be taken with a grain of salt. From this the meaning got transferred to sayings of doubtful truth. "Attle salt" was a Greek synonym for wit or penetration, and the Latin word "sal" had somewhat of the same meaning. It is thus easy to see how the saying "cum grano salis" could have come to mean the necessity of accepting doubtful or suspicious statements "with a grain of

Molokai and the Lepers.

The general idea of the leper settle ment on the island of Molokai is wrong, says a writer in Harpers Weekly. Instead of the entire island being used for the leper colony the settlement comprises only eight square miles out of a total area of 261 square miles. It occupies a tongue of land on the northern side of Molokal. The north, east and west shores of this tiny spit are washed by the Pacific. while on the south side rise precipitous cliffs of from 1.800 to 4,000 feet, which make the isolation seem even more hopeless than the beautiful deep blue waters of the sea ever could. The most difficult and dangerous trail, constantly manned by government guards, foils escape, if it were ever contemplated, by the land side.

Stupid Husband of a Noted Singer. Catalani's husband, a handsome Frenchman, was even more unintellectual than his wife-he was stupid. Once, having found the pitch of the plano too high, she said after the rehearsal to her husband: "The plano is too high. Will you see that it is made lower before the concert?" When the evening came Catalani was annoyed to find that the pinno had not been altered. Her husband sent for the carpenter, who declared that he had sawed off two inches from each leg, as he had been ordered to do. "Surely it can't be too high now, my dear," said the stupid husband soothingly.

Through the Cracks. When the celebrated divine Edward irving was on a preaching tour in Scotland two Dumfries men of decided opinions went to hear him. When they left the ball one said to the other: "Well, Willie, what do you think?" "Oh." said the other contemptuously,

"the man's cracked!" The first speaker laid a quiet hand on his shoulder. "Will," said he. "you'll often see light peeping through a crack."

told wife you had to work late at the office. Played upon her sympathles, eh? Briggs-Well-er-yes, but either her sympathies were out of tune or I'm a darned poor instrumentalist .-Boston Transcript,

Good and Sufficient Reason. Editor-But, my good fellow, why do you bring this poem to me? Impecunious One-Well, sir, because I hadn't a stamp, sir.-London Tatler.

Opportunity seldom ' mes with a etter of introduction.

Why is the large bell in the tower

of the house of parliament in London called Big Ben? The average Londoner himself seems to have no idea how it got its name. When the building was designed Sir Benjamin Hall had a great deal to do with carrying out the plans of the architects, being high commissioner of public works, and his coworkers appreciated the fact that to him the city of London was largely indebted. So when the question came up in parliament as to the name of the enormous bell that was to be hung in the tower a member shouted, "Why not call it Big Ben?" This suggestion was received with much applause as well as with roars of laughter, for Sir Benjamin was an enormous man, both in height and girth, and had often been called Big Ben. From that day on the bell whose peal every Londoner knows has been known only as Big Ben.-Harper's Weekly.

Mighty in Titles.
The ruler of Turkey, in addition to the titles sultan and kha-khan (high prince and lord of lords), also claims sovereignty over most districts, towns, cities and states in the orient, specifying each by name and setting out in each of his various titles "all the forts, citadels, purlieus and neighborhood thereof" in regular legal form. His official designation ends, "Sovereign also of diverse nations, states, peoples and races on the face of the earth." All this is in addition to his high position as "head of the faithful" and "supreme lord of all the followers of the prophet," "direct and only lleutenant on earth of Mohammed."

The Great Eastern. The dimensions of the one time world

famous Great Eastern were as follows: Length, 692 feet; width, 83 feet; depth, 60 feet; tonnage, 24,000 tons; draft when unloaded, 20 feet; when loaded, 30 feet. She had paddle wheels fifty-six feet in diameter and was also provided with a four bladed screw propeller of twenty-four feet diameter. She had accommodations for 800 first class, 2,000 second class and 1,200 third class passengers, 4,000 in all. Her speed was about eighteen miles an bour. The Great Eastern was finally broken up for old iron in the year 1889 after a checkered career of some thirty-one years.

Fair, but Stormy.
A gentleman boarded the Karori car at Kelburne avenue. Recognizing a friend on one of the seats, he nodded pleasantly and then said, "Well, what do you think of the weather?"

"Ob. horrible!" was the reply. "And how is your wife today?" "She's just about the same, thank you!"-New Zealand Free Lance.

No Ear For Music. "How do you like the music, Mr. Judkins?" said Miss Parsons, "I'm sorry, but I have no ear for music," he answered.
