Obstacles to Recovery From Catarrh. Recovery from this condition may be prevented or delayed by certain abnormal conditions of the spine or the ribs. It is shown constantly in osteopathic practice and experiment that slightly misplaced vertebrae or ribs do interfere with the natural flow of the blood in any part of the body. This fact has been demonstrated in hundreds of cases in the Clinics of the Colleges of Osteopathy, and also in the practice of osteopaths generally. Also, by experiments the effects of these slight misplacements have been shown. So, if there is any bony lesion which interferes with a good circulation of good blood, the catarrhal condition may perpetuate itself almost indefinitely.

Certainly, if a cure is to be expected, these unnatural positions of the ribs and vertebrae and other bones must be found and corrected.-The Osteopath.
