Apricots Blooming Down On Innaha

Approach of Spring Heralded But
More Rain Needed—Lamb-
ing Begins.

Innaha, March 27.—Have had a little shower of rain but need rain badly to revive the grass.

Every day we see men going down the road with bundles of bedding on their backs headed for some lambing camp. Lambing will be in full blast in a few days.

Art Scroggins quit herding for Boswell and went to Enterprise for a lay off.

Mrs. Brumbach and Mrs. Chase are visiting with Ebner Brumbach.

Joe Clemons, game warden, went to lower Innaha to see after some business in that section.

Apricots are in full bloom and other trees are leafing out and the sarves bushes have been in bloom for a week.

C. E. Young, who has not been at Enterprise to see his family since the last of December, will start for Enterprise the last of the week and stay a few days.

Gardening is the order of the day.
RUFF & REDDY.

Gives Aid to Strikers.

Sometimes liver, kidneys, and bowels seem to go on a strike and refuse to work right. Then you need those pleasant little strike breakers—Dr. King's New Life Pills—to give them natural aid and gently compel proper action. Excellent health soon follows. Try them, 25c at all druggists.

A prize of \$1,000 was won by R. R. Howard, formerly of Prineville, Crook county, who graduated from the Oregon Agricultural college in 1902. The award was made by the Portland Commercial club, for the best article on the "Rose City" or on Oregon published outside the state from November 1, 1909, to December 31, 1910. Mr. Howard, who is now on the staff of the Pacific Monthly, won first place with an article on "The Railroad Fight For An Empire" in World's Work. Eight smaller prizes brought the total award of the contest to \$5,000.

Do Ghosts Haunt Swamps?

No, never. Its foolish to fear a fancied evil, when there are real and deadly perils to guard against in swamps and marshes, bayous and low lands. These are the malaria germs that cause ague, chills and fever, weakness, aches in the bones and muscles and may induce deadly typhoid. But Electric Bitters destroys and casts out these vicious germs from the blood. "Three bottles drove all the malaria from my system," wrote Wm. Fretwell, of Lucama, N. C., "and I've had fine health ever since." Use this safe, sure remedy only. 50c at all druggists.

HOW OLD IS YOUR HORSE?

Corvallis, March 30.—There are four ways to tell the age of a horse, according to Prof. E. L. Potter of the Oregon Agricultural college: by his teeth, by his ribs, by the flesh on his tail, and by the skin on his cheeks.

In a young horse the cheek skin is soft and elastic, and flies back quickly when raised; in an old one, it is lifeless and goes back but slowly.

Old horses apparently have a wider and more distinct space between their ribs than young ones. And with age the flesh on the tail of a horse shrinks, making the joints more distinct than they are on a young horse.

Judging by the changes in the teeth is a more accurate method. The coming of the temporary teeth first, and then the permanent ones the development to maturity; the change in shape on account of wear; the coming of the cups in the teeth, and their wearing away afterwards; and the change in the angle of meeting of the teeth, from straight together at five years to a sharp angle at twenty; all these are signs by which the experienced horseman can read accurately the age of a horse.

"It must be remembered that the permanent teeth, above and below, come in at the same time," says Prof. Potter, "but that the cups above do not wear away until all the cups below are gone. It must also be remembered that the changes begin at the center and continue at the rate of one pair a year: that a horse at maturity, which is at five years, has everything—that is, all his permanent teeth and all the cups. If one remembers this much, he has the whole thing in a nut shell."
