Incorrectly prescribed glasses increase the eye strain, deform the eye, and make your later years a time of permanently dimmed vision. Such glasses are common enough, but are eye destroyers and the product of inexperienced opticians. On the other hand, correctly prescribed glasses save the eyes from strain, increase their usefulness and for you, if you wear them the day of dimmed vision may never arrive. Such glasses are eye builders and are prescribed by long experienced eye specialists. Drs. Lowe and Turner have had years of hard experience as exclusive eye specialists. There is no side line, for they devote their entire time, energy and effort exclusively to the eye, coupled with their being educated in the best schools and their many years experience makes them safe persons for you to consult. Consult them at the Falls City Hotel, Thursday, August 19.
