

FALLS CITY NEWS

VOL. XII

FALLS CITY OREGON, SATURDAY, SEPTEMBER 18, 1915

No. 3

PUBLIC SCHOOL WILL OPEN

Falls City School Will Open Monday, September 20.

Next Monday morning the bell on the school house, that has long hung silent, will again peal out right merrily calling "To Books." Soon happy children will be seen climbing the hill to the school house and the "hill of Knowledge" as well. The citizens of Falls City justly take pride in their public school. Much care and expense has been put forth in order that the youth might have every advantage in preparing themselves for their life work in whatever line they may choose. Competent instructors have been secured together with the latest methods and appliances. Falls City schools have always stood high in their attainments and there is no reason that they should not still maintain their standing and even advance. The co-operation of parents, teachers and pupils alone can attain this. Every child of school age should be promptly on hand the first day and each succeeding day of the entire term.

GREAT HARVEST IN RUSSIA.

Wheat Yield is Better Than Five Year Average.

London.—The Daily Mail's correspondent at Petrograd quotes M. Krivosheina, minister of agriculture, as saying that the Russian harvest is not only better than in 1914, but greatly above the average for the five years preceding. The yield is estimated at 2,000,000,000 bushels, of which 571,000,000 bushels are wheat. During the five years preceding 1914 the average wheat yield was 478,000,000 bushels.

The only districts where the harvest was bad were the Vilna and Grodno regions, which are now largely occupied by the Germans. The difficulty of finding enough harvest workers has been overcome and there would be no difficulty in exporting the surplus through the Black sea if the Dardanelles were opened.

The Siberian harvest was below the average, but this fact is negligible when the abundance of the crops in eastern and southern Russia is remembered.

JUST A "DOG'S LIFE."

Kansas City Man Goes Into Particulars of Wife's Treatment.

Kansas City, Mo.—"A man is about the same as a dog," James Henson said his wife told him, and he quotes the phrase in his divorce petition. Then, to show he lived a "dog's life" from the time he married his wife, Mrs. Etha Henson, in 1891, he enumerates the following indignities:

She was cross and irritable. She gossiped about him. She would make him leave the table before the meal was finished. She would not mend his clothes. She objected to washing his shirts. She grumbled and nagged. She had a bad disposition. She ran up bills on him.

AMERICAN DIGS UP EGYPTIAN TEMPLE

One of the Glories of Memphis Is Excavated.

Philadelphia.—The discovery of a great temple at Memphis, Egypt, belonging approximately to the period of Rameses II., is announced by the University museum as a result of the spring and summer explorations of Eckley B. Coxe, Jr., of the Egyptian expedition under the leadership of Dr.

Fisher, curator of the museum's Egyptian section.

The find is considered of first importance and it is hoped will prove to be the beginning of further developments in the uncovering of the history of Memphis, which was one of the great cities of the world, probably the greatest in the time of Rameses II., more than 3,000 years ago, which is known to have been of great importance 5,000 years ago and probably has a history running thousands of years behind that era.

The temple was silted over with mud from the Nile and covered with sand blown from the desert, so that nothing remained of the glories which were so prominent in the days of Herodotus and which lasted until within a century or two of the Christian era.

The discovery of the great temple to students of history is highly valuable, bearing out the glowing chronicles of the glory of the Egypt by Herodotus. It forms another refutation of recent historians who have accused him of inserting myths in his writings.

When the digging began the capitals of two columns of the great palace were discovered. After a hundred expert diggers had spent three months in careful excavation a great hall of columns was unearthed, and the excavations were then carried down to the original soil.

The temple must originally have been one of the glories of Egypt. In spite of the work of time, of sieges and other destructions, enough survives to show that it was a magnificent place. This temple in all its gorgeousness was described by Herodotus. A large inscription indicates that it may possibly be the temple of Set II., although at first it was supposed to have been erected by Menephtah, son of Rameses II.

SHE HAS "HYPNOTIC EYE."

Lindsay (Cal.) Man Complains Against Wife.

Lindsay, Cal.—Alleging that his wife, Mrs. Mary Perry, has a "hypnotic eye" and that for the past year she has exercised a malign influence over him, Wesley E. Perry, a rancher, swore to a complaint for the arrest of Mrs. Perry and asked that she be detained at the county jail until an examination can be made into her mental condition.

Mrs. Perry made a statement to the officers following her arrest, in which she declared her husband is "half insane" and that he, instead, should be locked up and examined by the county alienists.

New Automobile Fuel.

London.—Attention has been called in England to another new motor fuel called "natalite," for which excellent results and low price are claimed. It is said to be composed mostly of alcohol, and the mixture contains a small quantity of alkali for the purpose of neutralizing the acidity of the products of combustion of the alcohol, which otherwise would cause corrosion of the valves and cylinders.

SHAVED BY SWISS ON BORDER

Austrian Soldiers Operated on Through Barbed Wire Fences.

Innsbruck, Austrian Tirol.—The Swiss-Austrian frontier is carefully marked off and closed by barbed wire fences, but that does not prevent fairly free intercourse between the Swiss and the Austrian soldiers.

Soldiers of both countries are grouped along the Engadine border and in the Swiss ranks is a barber, the only one of his profession on either side. A recent visitor to this front who desired to have a shave found it was obtainable by the simple expedient of sitting in a chair on the Austrian side and allowing the Swiss soldier to extend his arms through the wire meshes. The shave was not the equal of one in a regular barber shop, a bit ragged and rough in spots, but it was better than none and was accomplished without any breach of neutrality. Austrian officers, it is asserted, resort almost daily to the odd expedient.

STOLE HIDE FROM COW.

Thief Took Advantage of Auto's Collision With the Animal.

Baraboo, Wis.—Recently a cow belonging to Mr. and Mrs. Isaac Cohn was struck by an automobile owned by Edward Kowalke of North Freedom. The cow was tethered in the road for a pasture, and the driver of the car claims he tried to avert an accident, but could not.

The leg of the cow was

the animal had to be killed. Action was begun in Justice Adolph Andro's court on the ground the machine was being driven too fast, and later a change of venue was taken to Justice H. L. Halsted's court, where the case was dismissed, as the car was not going twenty-five miles an hour. Besides, cows should not pasture in the highway.

The hide was removed from the animal, and later the sheriff was notified that this had been stolen. The thief has not been apprehended.

TO SAFEGUARD \$5,000,000,000

Destruction of Records by Big Chicago Fire Recalled.

New York.—If fire should destroy the hall of records the city would lose its files of deeds and mortgages, upon which rest the title of Manhattan's \$5,000,000,000 of realty.

Register Hopper recommended in presenting his budget estimates for 1916 to the board of estimate that the duplicate abstract records which he has completed be housed in a fireproof building away from the city. The original plant would be retained in the office for title searching purposes. This method of duplicate plants in separate localities is followed by the large title and insurance companies, but the city has neglected to protect its records.

On record in the register's office are 1,039,915 deeds and over 1,000,000 mortgages. The books or libers number over 8,000.

The destruction by fire of the Equitable building and of the contents of a part of the capitol at Albany proved that merely depositing records in a fireproof building does not safeguard against partial or total destruction by fire. The great fire in Chicago destroyed the original records, but the damage was mitigated to a degree by the fact that abstracts made by a private company were saved. It placed owners largely at the mercy of the title company, which took huge profits from selling the abstract information. Fire and earthquake at San Francisco and fire at Jacksonville, Fla., illustrated further the great loss resulting from a destruction of title records.

"The establishment of the Torrens system," says the register, "in the way it has been successfully and universally applied in Australia and many other countries, would do away completely with the need of preserving old records except for their historical interest."

TO HONOR DANIEL BOONE.

D. A. R. Will Unveil Boulder Next Month.

Montgomery City, Mo.—After nearly 100 years a monument is to be erected over the burial place of Daniel Boone, near Marthasville, Warren county, through the efforts of the Daughters of the American Revolution. It is to be made of a large red granite boulder found in Warren county, which Boone selected as his last resting place.

It is planned to dedicate the marker Oct. 29 at the close of a conference of the Missouri Daughters which is to be held in St. Louis.

Student a Hero.

Franklin, Ind.—Oscar Bogard of Lyons, who is attending the summer course at Franklin college, has become a hero in the opinion of his friends in rescuing a horse from death under a train. The horse broke loose from a hitchrack in front of the college campus and ran along the railroad tracks. The buggy was demolished and the horse became entangled in the harness and fell on the tracks. A train was approaching at full speed when Bogard with almost superhuman strength dragged the horse from the tracks only a second before the engine whizzed by.

Preachers Take Outing

The Ministerial Alliance of Salem were in Falls City Monday on an outing. Their intention was to picnic on Teal creek but failed to get that far up. They all gathered around the festal board at the Falls City Hotel and did ample justice to this famous

LET US PUT THE TAPE AROUND YOU FOR A

NEW SUIT AND OVERCOAT

THE BEST WAY TO GET A SUIT OR OVERCOAT THAT FITS YOU IS TO COME TO US AND LET US TAKE YOUR MEASURE. YOU WILL HAVE SCORES OF NEW PATTERNS TO PICK FROM, AND YOU WILL BE BETTER PLEASSED TO HAVE A SUIT OR OVERCOAT MADE ESPECIALLY FOR YOU.

IT WILL ONLY COST YOU A VERY MODERATE SUM. COME IN THIS WEEK AND LET US TALK IT OVER.

N. SELIG'S
FALLS CITY DEPARTMENT STORE

hostelery. They are loud in their praises and can recommend it to their friends. The following were present: Carl H. Elliott, James Elvin, J. M. Brown, Chas. A. Hadley, J. C. Spencer, A. A. Winter, H. C. Stover, G. Schrinke.

Eleventh Million

"At 11:45 A. M., August 23, 1915, the eleven-millionth visitor passed through the gates of the Exposition. Within the last thirteen days 1,000,000 persons visited the grounds. E. C. Conroy, director of the Department of Concessions and admissions, predicts that before the closing date, December 4th, there will have been an attendance of more than 18,500,000.

"Within the next two weeks," Conroy said, "another million should be affixed to the eleventh figure. No less than 100 conventions and societies will celebrate in the next ten days.

"The last two months of the enterprise will mark a multitudinous onrush of visitors. Today begins the twenty-seventh week of the Exposition and a splendid programme of events has been arranged."

Announcements comes from Missouri to the effect that the State administration is scurrying about in search of the wherewithal to meet the extravagant expenses of government in that State. By getting the attorney general to resolve a doubt against the public school fund, which has always heretofore been resolved in its favor, the state auditor has taken away over \$500,000 from the schools and credited it to the general revenue fund. Additional taxation of corporations is also proposed to fill the yawning hole in the State treasury.

Advertising Is The Strong Arm Of Business

By HOLLAND.

THE strong arm of business protects you and all the other ninety odd millions of inhabitants of the United States against fraud and deception. It enables you and all other buyers to buy intelligently and with the assurance of getting goods that are just what they seem to be, just what they should be.

ADVERTISING IS THIS STRONG ARM OF BUSINESS.

Its tremendous power is exercised principally through the newspapers because in this way it reaches the greatest number, practically all of the people under Uncle Sam's flag. You can further the good work of this protective agency by reading the advertisements in this and in other newspapers regularly and closely. You owe it to yourself to do this because you thereby save time and money.

BEST GOODS ARE BEST ADVERTISED.
