Sheep—Yearlings, \$8 @9; wethers, \$7 @7.50; ewes, \$5.50 @6.50; lambs, \$8 @9.25.

Idaho Crops Have Suffered.

The monthly bulletin of the Caldwell Commercial Bank, just issued, says:

Crops have suffered quite severely since our last letter, due to cold weather. On May 9, 10 and 11 a cold wave extending over this entire section of Idaho, and with a low temperature of 20 degrees above zero reported, killed practically all of the fruit and damaged the grain and hay crop to some extent, nipped the less hardy garden truck, damaged the roses and will mean quite a heavy financial loss to the country. The strawberry crop seems to have survived the best of any of the fruits. Since May 18 the rainfall has been considerable and of much benefit. The temperature for the month has been below average.

The usual anticipated rise in the price of wheat at this season has failed this year. In fact an uncertain market with a downward tendency has ruled recently. The Caldwell Milling Elevator company report paying \$1.35 per cwt. for wheat, \$1.15 for oats and \$1.25 for barley.

Heavy shipments of hay were made during the past month and practically all of the 1915 crop is cleaned up. The first crop of alfalfa will not be up to average, due to the cold weather, and will be somewhat late.

Cantaloupes on Market.

Spokane—In spite of the wet and chilly weather the stores have managed to make a brave show of spring fruit and vegetables, although the local products have been retarded. The two novelties to be found are cantaloupes at 15 to 25 cents each and apricots at 25 cents a pound or 75 cents a box. Cherries from California are fairly plentiful at 25 cents a pound alike for the light and dark varieties. The supply of asparagus has been lessened by climatic conditions and the local crop has scarcely been touched. Warmer weather will bring it in more abundantly.

Copper Mine Reopened.

Baker, Or.—Once abandoned as an unprofitable venture, the old Paymaster mine, a copper property in the Eagle Mountains, is being reopened, since the traces of the rare ore, molybdenite, with a market value of \$3000 a ton, have been found. W. A. Gilliam, Isaac and Griawold Miller and Bradley Bros., owners of the property, also believe that a considerable income may be netted from the main copper ore bodies. Assays just made of some of the ore samples give 64.3 per cent values, meaning, at the present quotations, from \$300 to \$400 a ton.

Strawberries Are More Plentiful.

Portland—Receipts of Oregon strawberries were larger the first of the week and prices were lower than last week, with sales at \$2.25 @2.50. Kennewicks sold at \$3.25. California loganberries were offered at \$1.25 @1.50 a tray and were slow sale. California currants were quoted at \$1.25 a crate. A half car of cantaloupes arrived and sold fairly well at \$4.50 and \$5. The last car of Florida tomatoes of the season was received. They sold at \$5 a crate. New green corn from the South was put on sale at \$1 a dozen.

WIFE TOO ILL TO WORK

IN BED MOST OF TIME

Her Health Restored by Lydia E. Pinkham's Vegetable Compound.

Indianapolis, Indiana.—"My health was so poor and my constitution so run down that I could not work. I was thin, pale and weak, weighed but 109 pounds and was in bed most of the time. I began taking Lydia E. Pinkham's Vegetable Compound and five months later I weighed 133 pounds. I do all the housework and washing for eleven, and I can truthfully say Lydia E. Pinkham's Vegetable Compound has been a godsend to me for I would have been in my grave today but for it. I would tell all women suffering as I was to try your valuable remedy."—Mrs. Wm. GREEN, 332 S. Addison Street, Indianapolis, Indiana.

There is hardly a neighborhood in this country, wherein some woman has not found health by using this good old-fashioned root and herb remedy.

If there is anything about which you would like special advice, write to the Lydia E. Pinkham Medicine Co., Lynn, Mass.

Bankers Organize Group.

Ashland—Organization of Group 4, Oregon State Bankers' association, embracing Jackson, Klamath, Curry, Lake and Josephine counties, was perfected here this week and adjourned after electing J. W. McCoy, cashier First National Bank of Ashland, chairman; W. H. Gore, of Medford, vice chairman; Marshall Hooper, Grants Pass, secretary and treasurer. Meetings will be held semi-annually.

Stockmen Plan Picnic.

Carlton—At a meeting of the executive committee of the Carlton Board of Trade, there were present a number of breeders of fine stock and a temporary organization of the Carlton Stockmen's Picnic association was made and preliminary arrangements were made to hold the first annual picnic in Carlton on Saturday, June 17. The stockmen and the board of trade are co-operating in arranging for the picnic. There will be barbecued beef, mutton and pork, and the usual picnic dinner provided.

Voters Order Irrigation.

Vale—Land owners in the Malheur valley voted 84 to 11 Saturday to organize an irrigation district, which contemplates construction of a dam at Riverside, holding 200,000 acre-feet of water. Government engineers have reported it to be the most feasible and cheapest project in the West and 25,000 acres of new land will be put under cultivation.

Shake Into Your Shoes

Every bolt has its nut.—New York Sun.

Backache? Run Down? Tired? Clean the Kidneys with Hot Water and "Anuric"

When run-down after a hard winter—when life indoors has brought about a stagnant condition in the circulation—most everyone is filled with uric acid—especially in this so of people past middle age. This uric acid in the blood often causes rheumatism, lumbago, swelling of hands or feet, or a baglike condition under the eyes. Backache, frequent urination or the pains and stiffness of the joints are also often noticed. Dr. Pierce says that everyone should have a good sweat every day—should drink plenty of pure water and exercise in the open air as much as possible. This helps to throw out the poisonous uric acid thru the skin and the "water." But for such persons as are past middle age it's often impossible to do this and lime salts are deposited in the arteries, veins and joints, causing all

kinds of distressing conditions. An antidote for this uric acid poison is to take hot water before meals and "Anuric." Ask your druggist for Doctor Pierce's Anuric, or send Doctor Pierce's Invalids' Hotel and Surgical Institute in Buffalo, N. Y., a dollar bill for a full treatment, or ten cents for a trial package.

"Anuric" is a recent scientific discovery by Dr. Pierce. "Anuric" drives the uric acid solvent so effective that it eliminates these poisons, cleanses the system, allows your over-worked kidneys to resume their normal functions, and just a few days' treatment with "Anuric" will convince you because it brings lasting relief to your painful, aching rheumatic joints—no more backache or dizzy spells. Try it now and be convinced!

About Oregon

Secretary Classifies Lands in Whitman National Forest

Portland—Announcement is made by the district forester, George H. Cecil, Portland, Ore., of the classification, by the secretary of Agriculture, of practically all the lands within the boundaries of the Whitman national forest in north eastern Oregon. A net area of approximately 879,218 acres is embraced in this classification, and a small area of 2742 acres is left for examination later.

The Whitman national forest lies in the Blue mountains, and, according to the report, consists mainly of a large body of positive forest land. The report shows that there is a stand of about four billion feet of valuable commercial timber within the forest, fifty per cent of which is western yellow pine. There is also a considerable stand of young timber and inferior species which has a high value for watershed protection for the streams which are used for irrigation outside the national forest.

This forest, it is said, has little agricultural value, and isolated, scattered tracts only could be used for farm purposes. The soil, although fertile, is rocky and shallow, and although rocks are meager, the rainfall is known to vary from 10 to 40 inches, the snowfall from 20 inches to 30 feet—in the higher altitudes the snow comes as late as mid-June or as early as the last of August; the killing frosts occur every month in the year. The temperature is also known to vary from 30 degrees below zero to 120 above. Practically the entire forest is at elevations from 4000 to 10,000 feet. The topography is rough, characterized by deep, precipitous canyons, and jagged peaks. Although over 70,000 acres of alienated land exist within the forest boundaries, taken up under the homestead and timber and stone acts, it is claimed that most attempts at agriculture have proven failures, and a large per cent of the private lands have either been abandoned or are being held for their timber and grazing value.

In view, therefore, of these circumstances, and with the exception of small isolated tracts, aggregating 2742 acres left for later examination, the secretary has classified the entire area of the Whitman national forest as chiefly valuable for forest purposes and not suited to agriculture or listable under the act of June 11, 1906.

27-Year Wait is Rewarded.

Marshfield—George W. Suydam, who has a secret preparation for preserving woods, waited 27 long years before realizing on his knowledge of chemicals. Nearly 30 years ago Mr. Suydam, who is a resident of Denmark, Curry county, prepared with his process a number of different woods and placed them away with woods of the same variety to see what time would do with each of his keepsakes.

Now that the woods have been examined and passed upon by experts, it is found that those which were treated 27 years ago are as well preserved as when they were put away, while the wood which was not treated has rotted away and decayed.

L. E. Swan, of Detroit, Mich., hearing of the successful preservative, came to Curry county and, after an investigation, purchased a half interest in the secret process and will finance its exploitation.

Sheep in England.

In Great Britain there is one sheep or lamb for each 2.5 acres of the total area. In the 36 farm states in America there is one sheep or lamb for each 31.8 acres.

The British farmer handles his land on an intensive basis and feeds his sheep on forage-crop pastures. Such pastures not only increase the fertility of the land but also free the sheep from many internal parasites contracted through grazing upon permanent pastures. In particular the use of a succession of forage-crop pastures will prevent stomach worms, one of the most prevalent and disastrous scourges of young stock, and will enable the farmer to market by the end of June or the first of July, when market prices are usually the highest, the lambs that were born in the late winter or early spring.

To keep clean a healthy take Dr. Pierce's Pleasant Pellets. They regulate liver, bowels and stomach.

Watchful Waiting.

Tommy had a cold in his head, which confined him to the house, so he was allowed to invite his young friend, Jack, to tea.

Afterward the two small boys commenced playing hide-and-seek, and Tommy rushed into the dining room and asked his father to conceal him. This his father did, behind a big armchair.

Presently in came Jack, and instead of beginning his search, calmly threw himself down on the rug before the fire.

"Come, Jack," said Tommy's father, "aren't you going to look?"

"No fear," was the small boy's calm retort. "I'm waiting till he sniffs!"—London Answers.

RESINOL SPEEDILY HEALS

ITCHING, BURNING, SKINS

Usually resinol ointment, with resinol soap, stops itching at once, quickly and easily heals distressing cases of eczema, rash, ringworm, tetter or similar tormenting skin or scalp eruptions, and clears away pimples, redness, roughness, and dandruff, when other treatments have proven useless. Physicians have prescribed resinol for twenty years, while thousands whose skins have been healed say, "What resinol did for us it will do for you." Try it! All druggists sell resinol soap and resinol ointment.—Adv.
