A Memory Aid.

When crocheting one often uses quite a lot of different numbers of crochet thread. To avoid mistakes write the number of thread and also the make on the inside of the cardboard roll on which the thread is wound. Then if the little round tag containing the number and trade name is lost, which often happens, you will not have to depend on memory, nor will you have to match the thread by weight and size.—Farm and Fireside.

CAUSES OF ILL HEALTH.

- Uncleanliness. Excessive eating without adequate amount of exercise. Occupational strain and conditions of occupation which mean lack of exercise and fresh air and breathing dust. The use of alcohol. Worry.

The Engineer Corps.

The duty of the corps of engineers in the United States army in the time of war consists of planning and constructing fortifications, procuring information concerning the topography of the country, supplying maps, selecting position for camps, constructing or destroying bridges and other work requiring technical skill; in time of peace, to plan and construct permanent fortifications and coast defense, build lighthouses, superintend river and harbor improvements, survey and establish boundaries, etc.

A Freak of Death Valley.

Saratoga springs is one of the freaks of Death valley and has probably caused more profanity than anything else in the region. The waters are as clear as crystal, and they bubble up from a deep, sand basin like a well-spring of joy. But they are strongly impregnated with sulphur and other minerals, are tepid in temperature and act instantly like an emetic upon any one who drinks them.—Exchange.

A Disadvantage.

"Do you think 'The Star Spangled Banner' is a good song?" "I don't see why it isn't a perfectly good old anthem. You don't always get a favorable impression of it owing to the fact that anybody feels free to tackle it, regardless of whether he can sing or not."—Washington Star.

The Difference.

"Apropos of this aviation business, you know?" "Well, what of it?" "Formerly the public here used to take fliers in stock; now they are taking stock in fliers."—Baltimore American.

Work.

There is no better ballast for keeping the mind steady on its keel and saving it from all risk of crankiness than business.—James Russell Lowell.

Misfortune is the bosom friend of the man who "didn't" think.

MEN ONLY

This was the prevailing reality on September 22, when eight men gathered at the home of J. C. Frink, the event being his sixty-second birthday.

The happy group gathered by ones and twos thereby taking the host wholly by unawares, and after an evening joyfully spent together in honor of the head of the Frink home, the informal group wercerved to a delightful repast, who in turn wished the youth of 62 summers an equal span of years in which the cares will be no more painful than the waking from the dreams.
