The readers of this paper will be pleased to learn that there is at least one disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

RIGHT KIND OF A MAN FOR SENATOR

Robert N. Stanfield

Farmer, Stock Raiser and Producer

The State is entitled to the active services of a man who knows how to work. Work for the State generally and work for the people of the State, both individually and collectively.

Oregon does not need any orators for orators are a drug on the market, and like constitutional lawyers, they do not get anything.

The Federal Government needs all the assistance Oregon can give, but is not receiving it because it has not been put up to the department on a business basis.

Today business men are having more to do with the government affairs than ever before. We are spending twenty-four million dollars a day and the people who will pay this money are the people who actually create wealth, the farmer, producer and toiler.

Our prosperity depends upon our continued industrial activities and everyone of these should be maintained at maximum capacity.

The prosperity of the small farmer, the small producer and the small manufacturer is as essential to the State and the Nation as the prosperity of the big man, every one of our occupations should be given equal consideration regardless of the amount produced.

Every encouragement must be given to increase production and this can be obtained only through assurance that the small farmers as well as the big man is going to receive his proportionate share of the war expenditures, and there will be a market for his products and a profit to him for his work, based proportionately upon his cost of production.

There must be equality in all phases of our State and National industry, and the small fellow must not be forgotten, overlooked or crowded out through the rush for big things and big orders and big accomplishments.

If the people of the State want a business man, a worker, a man who knows, is thoroughly acquainted with every phase of the industrial situation in Oregon, a man who is capable, honest and fearless, a man who has by his own labor and through his own advancement aided in the progress and development of Oregon, they want Robert N. Stanfield.
