# If Swift & Company Made No Profit

The cattle raiser would receive only 1/8 cent a pound more for his cattle

So small is Swift & Company's profit on any single transaction that if it were turned over to the cattle raisers of the country, they would receive only 1/8 cent a pound more for cattle than they receive now.

Swift & Company pays for live cattle about 90% of the amount received for dressed meat and by-products. The remaining 10% pays for packing-house expense, freight to market, operation of distributing houses and profit. Swift & Company's actual figures per head for 1917 on over two million cattle were as follows:

Receipts Payments By-products \$24.09 26% Paid Meat Cattle \$68.97 \$84.45 Total Total \$93.06 \$93.06

\* This net profit of \$1.29 per head averages 1/8 cent a pound live weight.

And out of this small net profit dividends must be paid to shareholders.
