The Cosmopolitan Magazine occupies a position distinctly its own. While giving great attention to fiction and entertainment—fifty short stories and one or more complete novels appear in its pages each year—it has a definite plan beyond. It may be likened to a great modern university, with a million and a half student-readers. A year's course embraces what is most interesting in Invention and Discovery, what is most entertaining in Trayel and adventure, what is most valuable in the World of Business. A portion of each number is edited with reference to the Woman of the World, another to interest Youth, and still another for the Man of Affairs, covering equally the clerk just starting in lite and the captain of industry.
