The eye is the only organ of the body that is completely controlled by the brain, therefore, if there is any kind of imperfections in the refraction of the eye, the brain must necessarily be on constant strain to compel perfect vision through an imperfect eye. This may effect the brain, causing what is termed asthenopia and chronic sick headache. This constant effort on the part of the brain, uses brain strength, and in order to renew its strength, the brain draws on the nerve system for new material with which to replace the lost power necessarily used to compel perfect vision.

Dr. and Mrs. C. W. Roberts, Eye specialists in refraction, will make free examinations of the Eyes at Mrs. Wickham's boarding house, by the opera house, on Monday forenoon, and all day Saturday. Other times by appointment.
