Daily except Sunday.

BOARD OF TRADE AT COQUILLE.

Growing Coast Town Will Co-Operate With State Improvement League.

Coquille, Or., 25.—(Special.)—The business men of Coquille City have just perfected the organization of a Board of Trade which has for its object the advertisement of resources of the town and the surrounding country tributary thereto, and to that end will co-operate with the State Improvement League. Coquille City is situated on the Coquille river, 25 miles from the ocean, is on tide water and the river is navigable for ocean-going craft to this point. It is the county seat of Coos County, has a population of about 1600 and is the business center of a large section of country unsurpassed as an agricultural, dairy, fruit and lumber district, and is also rich in its large deposits of good quality of lignite coal, the development of which, as well as its other above-mentioned resources, is in its infancy.

The Board of Trade has for its officers W. T. Kerr, president; E. D. Sperry, vice president; V. R. Wilson, secretary; O. C. Sanford, corresponding secretary, and L. H. Hazard, treasurer. Its membership includes the business men of the town.—Oregonian.

Electric Railway in View.

Congressman Wilson, of Arizona, a millionaire railroad man and president of the now Electric Railway Company which expects to build and operate a line from Portland to Eugene, arrived via Drain yesterday.

Messrs Wilson, Rby and Diers came over the proposed route to Coos bay on foot and thoroughly investigated the available route.

This new electric-railway project is meeting with the most hearty support throughout Marion, Polk, Benton, Linn, Lane and Douglas counties having secure rights of way and franchises to build along public highways in said counties. The aforesaid franchises are null and void unless actual work begins on the roadbed within 90 days from the time the franchise was given.

These gentlemen are in earnest and are out trifling. The proposed electric line may be Coos bay's first rescuer in the shape of an outlet. The road which is to be built down the Willamette valley to Eugene is to be a regular standard gauge roadbed.

The party was taken out over the bar in the launch Teddy and shown the outlet of our bay. They were more than satisfied. The bar was as smooth as glass and the opportunity was a grand one to view the best harbor on the Pacific between Golden Gate and Puget Sound. The party returned to Roseburg via Coos Bay Wagon road early this morning.—Post.

State Fair.

The premium list of the 44th Annual Fair to be held at Salem, September 12th to 17th are now being distributed. A great many changes have been made and new premiums offered, and as a whole the list has been increased. The stock show will be as good as last year if not better. Several exhibitors from California are contemplating bringing their thoroughbred stock. The County Exhibits will be larger than ever and year an exhibit will be at the Fair showing what the northwest portion of Canada can produce and the advantages they have to offer.

Good racing and splendid evening entertainments through the week will make it enjoyable for all who attend.

Send to the Secretary, W. A. Moores, at Salem, for a premium list and then make an exhibition of your stock or goods.

R. D. James, of Los Angeles, one of the proprietors of the sawmill at this city, arrived here direct from San Francisco, yesterday, accompanied by E. J. Braddock, an eastern gentleman who is looking at the country.

FOR SALE. A fine large gray two-year-old colt. Will do good work next year. Call on Warren Laird at Johnson's mill.

White-Dement Nuptials.

There was a very pretty wedding at the home of Mr. and Mrs. R. C. Dement, in this city, Wednesday, Aug. 24, 1904, when their daughter Miss Winnie was united in marriage to Dr. F. M. White, of Klamath Falls.

The room was tastefully and beautifully decorated with ferns and the bridal couple stood under an arch of Autumn leaves while the words which united them for life were said by Rev. D. H. Hare with the easy grace so suited to the occasion and peculiar to this very popular reverend gentleman.

Mrs. D. H. Hare played the Mendelssohn wedding march as the bridal party entered. Miss Blanch Stitt acted as bridesmaid and Mr. C. E. Huling was groomsmen. The bride was gown in crepe de Paris trimmed in cream and the bridesmaid wore a gown of old rose.

After congratulations the guests were ushered into the dining room where was spread a very delicate and tempting repast.

The wedding was a quiet one, only relatives and a few intimate friends being present. The young couple were the recipients of very many beautiful presents from their friends.

The bride is a daughter of one of our most respected pioneer families and has been raised in this county. She is a young lady of culture and refinement, affable in disposition and a prime favorite with all.

The groom is a rising young doctor of Klamath Falls and is also engaged in the drug business. He was a resident of this place until about a year ago and has many friends in Myrtle Point. He is a gentleman of exemplary habits, and is well thought of by all.

Mr. and Mrs. White left Thursday for Klamath Falls where they will reside.—Myrtle Point Enterprise.

A Thousand ways of Lying.

[From Success.]

There are a thousand ways of lying, but all lead to the same end. It does not matter whether you wear lies, tell lies, act lies, or live lies, your character is ruined all the same.

There is no more demoralizing influence in modern life than the unnatural straining to seem other than we are. Nothing else so quickly lowers self-respect, takes the fine edge off honor and blunts the conscience as the sense of being a sham, a gilded fraud, or an unreality. It cheapens standards, lowers ideals, saps ambition, and takes the spring and joy out of living. No man can make the most and the best of himself until he is absolutely honest with his own soul, and unflinchingly true to his highest ideals, and this is impossible while he is living a lie.

How to Be Happy.

[From "Success."]

Many of us miss the joys that might be ours by keeping our eyes fixed on those of other people. No one can enjoy his own opportunities for happiness while he is envious of another's. We lose a great deal of the joy of living by not cheerfully accepting the small pleasures that come to us every day, instead of longing and wishing for what belongs to others. We do not take any pleasure in our own modest horse and carriage, because we long for the automobile or victoria that someone else owns. The edge is taken off the enjoyment of our own little home because we are watching the palatial residence of our neighbor. We can get no satisfaction out of a trolley ride into the country or a sail on a river steamer, because someone else can enjoy the luxury of his own carriage or yacht. Life has its full measure of happiness for everyone of us, if we would only make up our minds to make the very most of every opportunity that comes our way, instead of longing for the things that come our neighbor's way.

NOTE AND COMMENT.

General Kuropatkin calls upon the czar to send him some seasoned troops although the Japs have certainly peppered and assaulted all that he had mustered in Manchuria.

A theater crowded; a boat overloaded; a rotten bridge shaking; a coal mine exploding; a train in the river; a play-house in flames; the coroner's verdict: "Nobody to blame."

America has created two nations in two years and has another in training, but all of them hate us and would make war upon us if they were strong enough. Such facts as these are calculated to make Americans thoughtful.

The International Typographical Union has voted down a resolution that none of its members should "enlist in the service of any state as state guard, militia man, or range under the penalty of expulsion from the union."

The new son of the czar can now look serenely forward to the measles, whooping cough, colic and other attacks. He has been named Alexis Nikolovitch because the initials "A. N." were stamped, embroidered and branded on all the government property.

The Chinese Government has demanded that the Japanese return the Russian torpedo boat destroyer which they cut out of a neutral Chinese harbor. If Japan should refuse, China and perhaps France would immediately become involved in the war.

An attempt is being made by Senator Patterson, of Colorado, to secure from the Ute nation for the United States the tract known as the Mesa Verde lands, which are very rich in ancient ruins, and considered to be of inestimable value as prehistoric studies.

A German chemist has discovered that he can make a very healthy vegetable butter out of cocoanut oils. It will contain less water than true butter and will keep a couple of weeks longer. It is said to have the taste of a hazelnut; is useful in pastry; is quite digestible; and not so liable to infection by microbes.

Kansas and Nebraska are becoming the greatest dairy states in the Union. Homesteads have been increased from 160 to 640 acres by the Kincaid law, and now all the ranges are taken up. Cream is shipped in refrigerator cars for 400 miles and then is manufactured into butter at a central station. This is known as the centralization plan.

The boys of the Grand Army of the Republic have had a memorable time in Boston. The narrow streets easily lend themselves to decorations and make it seem as if there were about three times as many visitors as there are. The sacred cod fish had arc lights in its head and tail and in the public gardens 40,000 electric bulbs were used for illumination.

It has been discovered that if the soil is scientifically fertilized and irrigated, the color of fruits, especially apples, may be heightened to almost any extent. At the St. Louis fair some very red apples from the state of Washington attracted attention. The soil was treated with muriate of potash and other chemicals, giving the color effect and a superior fruit.

Irrigation is the coming factor to help out the farmer, or fruit-grower. Water and sunshine are the two essentials for the production of good crops. It is unwise to longer depend upon the freaks of a fickle climate and futile attempts to foretell the weather. What is wanted is stability and certainty. This Government never did a wiser thing than when it set apart the funds received from the sale of public lands to be used for irrigating the arid lands of the west. Other nations are making efforts in the same direction. The English have built a great dam across the Nile so that irrigation in Egypt may be controlled, with two or three crops each season. And now it has been decided to apply irrigation to immense tracts of land in South Africa. That country has a vast underground lake and with irrigation can be made to grow anything from corn and peas to orchids.

A wireless telegraph has actually been put in successful operation in Alaska for a distance of 107 miles. The system is said to have been mostly invented by a captain in the signal corps.

As an indication of the prosperity in Kansas and the love for music which prevails in the Sunflower state, the Census Bureau reports that it has found 18,000 pianos in that state. It is reported that every time the Kaw river leaves its bed and goes meandering and rippling over the plains of Kansas, the bottom lands are found strewn with pianos.

There is talk in Tibet of establishing a weather bureau. It has been discovered by kite-flying that twelve miles above the earth the temperature is 80 degrees below zero. The people of Tibet think the sun is a ball of yak meat and fat and that its heated condition is the cause of light. Where the land is sterile they believe it has been scorched by the sun.

If the Russians should be beaten and Kuropatkin's army be driven back upon the frozen steppes of Siberia, what would be the next move of the "inferior peoples" of Asia? The question may not be very important in view of the alleged circumstance that Japan is nearly bankrupt of both men and money and lacks the financial ability to carry on a protracted war.

New York city is unable to build school houses fast enough to keep pace with the ever increasing school population. When the schools open in September there will be 150,000 children unable to get seats, who must be left to the education of the streets. The additional number of seats provided for this year is but 21,000, and 40,000 children who are first applicants.

NOTICE.

I keep in stock Cigars and Tobacco. Also fresh candies, and nuts, fruits, etc. Milk Shakes, Lemonades and Soda. Our prices are right. We will use you right. Come and see us.

Respectfully submitted,
JAMES L. THOMPSON.
