Whenever salmon run in the Columbia, fishermen persist in fishing and canners in canning, even though they disobey the law. Now, after defying the law they are at Salem clamoring for more law—the kind of law that won't stop them from fishing and canning while salmon are in the river. Is there any better time to protect salmon than when there are salmon to catch and can?—Oregonian.

It is said that the Japanese are going to fish out and make better than new sunken Russian battle ships in Port Author harbor. If they accomplish this task we may be able to give them a contract in Havana harbor, then there is the Spanish Armada and some more of them in Manila harbor and off Santiago.

The President and the people are in earnest for the protection of the forests, but the first step to accomplish this appears to be the repeal of the tariff on wood pulp and paper. This might increase the destruction of the forests in Canada north of the lakes, but it would do much to preserve forests of the United States.

Something splendid, picturesque and spectacular will be seen on Pennsylvania avenue on the 4th of March. Douglas of Mass., with General Miles and others of his Military Staff will add a touch of Oriental splendor. Why can we not have Viceroy Curzon and his caparisoned elephants?

Tokio, Jan. 16 (11 A. M.)—It is reported that a Japanese gendarme discovered a woman shot about 20 years old disguised among the Russian prisoners brought to Nishina. She was much embarrassed at the exposure, and is now located in special quarters.

The art display at the Lewis and Clark Centennial will be of fabulous value, representing more money than will be expended in building the Exposition. There will be a few paintings worth at least \$100,000 each, and the aggregate value of the display will be millions of dollars.

Single copies 10c. Annual subscription \$1.  
The Cosmopolitan Magazine occupies a position distinctly its own. While giving great attention to fiction and entertainment—fifty short stories and one or more complete novels appear in its pages each year—it has a definite plan beyond. It may be likened to a great modern university, with a million and a half student-readers. A year's course embraces what is most important in the Scientific field, what is most interesting in Invention and Discovery, what is most entertaining in Travel and Adventure, what is most valuable in the World of Business. A portion of each number is edited with reference to the Woman of the World, another to the Woman of the Home, and another to interest Youth, and still another for the Man of Affairs, covering equally the clerk just starting in life and the captain of industry.
