

LOTS ADJOINING CITY PARK

Adjoining City Park

Since the purchase of the Patterson grove by the city for park purposes has been assured, the Coquille Land Company has put on the market, for immediate disposal, 40 lots in their Notley Addition, which adjoins the park on the south. Located as they are, some just across the street, and none more than 2 blocks from one of the most attractive parks in Coos county, these lots are among the most desirable resident properties in the city.

As the park is improved and beautified the value of this property will increase by leaps and bounds and within a very short time will be worth several times what we are asking for them.

By buying the lots that are offered here, the purchaser is not getting property upon which it will be necessary to spend a great deal of money for clearing. The land is practically cleared and is in splendid condition.

Closest-in Addition on the market

The Notley Addition is the closest-in addition on the market in Coquille today, and is, in many ways, the most desirable. All the lots that are being put on the market at this time are within two or three blocks of the City high school and about eight blocks from the business center of the city.

Good Streets

Streets are improved to the very edge of the addition, and those leading into it, while not improved, are in better condition than some unpaved streets within a block or two of the business center.

Lots 50 Feet by 100 Feet

The lots in this addition are 50 feet by 100 feet and every one of them is suitable for garden purposes.

Selling at the Uniform Price \$100

In order that these lots may be sold as quickly as possible, a single price of \$100 is being made on each of the 40 lots. No partiality will be shown and those who buy first will be able to choose the lots which suit them best. Any of the lots that are being offered are easily worth the amount asked, and there is included a number of choice ones that far exceed this sum in value.

We do not intend to hold these lots to anybody's order; they are going to be sold as rapidly as possible. If you are looking for a location on which to build, Notley Addition offers you an exceptional advantage; if you wish to invest a little money as a speculation, you have only to consider the location of this property and the price we are asking, to realize its desirability as an investment.

Easy Payments

Not only are we offering these lots at an exceedingly low figure, but we are willing to give you terms that will surprise you. To secure any one of these lots requires only an initial payment of \$10 and a weekly payment of \$1.00.

This property is going to go, and go quickly, and if you desire to secure one or more of these lots at the price, and on the terms, that we are offering them, you will have to act at once.

New industries are seeking location here and this year, and the years to come, promise to be the most prosperous Coquille has ever known. This means that property will be in demand. Secure yours now, before the prices advance, and pay for it a dollar at a time. We will be pleased to give you any further information you may desire regarding this property, or show you over it in person.

COQUILLE LAND COMPANY

Office in Siagle's Tailor Shop

CHAS. WALKER, Manager

Coquille, Oregon

No. 6849. Reserve District No. 12

Report of the Condition of the

FIRST NATIONAL BANK

at Coquille, in the State of Oregon, at the close of business, March 5th, 1917.

RESOURCES

1a. Loans and Discounts (except those shown on b & c)	\$ 68,665.77

Directors.

In a Severe Storm.

C. A. Pendleton, who has been spending the winter in Southern California, returned last Friday. He came up on the Elizabeth. When off Port Orford on Wednesday, the gale from the south became so severe that it was necessary to put the steamer head on and preparations were made for launching the boats, though that did not become necessary. Mr. Pen-

dleton says there was a tremendous influx of tourists down in Los Angeles where one of the largest hotels had its two upper floors filled for the first time in its history. The war has proved a blessing there, turning lots of people in that direction because the European trip is no longer attractive.

The Commercial Club.

A report of the committee appointed to investigate the condensation proposition was the first matter of business considered at the Commercial Club Wednesday evening. Mr. McKenna reported progress, and that he had secured from Mr. Conway a statement of what the Buttercup Dairy Products company required in the way of information and inducement. The information is being secured and while various sites have been considered, no selection has been made.

Inasmuch as Mr. Conway stated that prompt action is necessary to secure this \$100,000 concern, it is evident that Coquille must get busy if she is to stand any chance of capturing the prize. It is too big a thing and means too much for Coquille to lose through inaction.

An opportunity is presented by the carloads of lumber leaving the mills here to get considerable advertising for the Johnson mills and for the Coquille valley by the printing of placards to be tacked on the sides of every car loaded. A committee was appointed to confer with E. E. Johnson as to the ways and means of securing this inexpensive advertising.

The Club feels, as does every citizen of Coquille, a great interest in the school site case and the need of additional school room is becoming acute. As a step toward preventing this case being dragged through the courts for three or four years more, a committee was appointed to confer with the school board and Messrs. Barrow and Strang, to ascertain whether any settlement is possible which will expedite the erection of a new high school building.

Many other items of municipal improvement and progress were discussed, which led W. J. Longton to remark as he left the hall that there was a great deal of difference between the Commercial Club meetings now and those he attended when he first came here five years ago. "You have more life and pep now and I congratulate you on the improvement," he said. He also said he was still working on the clay products manufacturing line which first brought him to this county. Some one is going to develop the industry in this county, he said, because you have all the essentials here—clay, fuel and transportation.

Another matter discussed was the need of church consolidation in Coquille and the establishment of a Y.

M. C. A. for the youth of the city. One or two strong churches, instead of seven or eight struggling ones, and a Y. M. C. A. headed by the right kind of a man, would accomplish wonders for the moral uplift of Coquille.

There is another matter which has been quite freely discussed for the past month and which will settle many of Coquille's difficulties—hitching racks, corn show pavilion and tourist camping ground—if it can be successfully carried through. When the street to the new bridge is laid out through the Lamb properties and thence south to the bluff on Front street, J. A. Lamb expects to move his house around facing the new street and have several business or residence lots to put on the market. Whether these lots shall be laid out in that magnificent myrtle grove back of his house depends on how greatly Coquille wants to preserve that beautiful spot intact. If lots are sold the trees will be cut down and never replaced.

But there is an opportunity for Coquille to secure a tract 240x240 feet which will include all of the grove. Mr. Lamb has never placed a price on it, although he has said he would like to donate it to the city. However, the city must purchase it, and that soon, if they ever expect to own it. It is time to think about the matter seriously. The Commercial Club is considering plans by which it might be secured without a direct tax, by giving entertainments, games, etc.

If owned by the city the corn show pavilion could be built in one corner; hitching racks could be installed on the brow of the hill and still leave the entire grove open for picnics, camping parties, tourists, and the like.

Make Vacant Lots Useful.

That was a highly commendable suggestion made at the Commercial Club this week that Coquille line up with other towns which are urging the use of vacant lots for gardens. A well kept garden plot is much more attractive than a forest of weeds, but more important is the aid in reducing the high cost of living. There are dozens of lots in Coquille which are available for gardens and every one who desires can have some sort of a garden plot.

Notice.

Saturday, March 24 will be millinery day at The White House.

SNAGS FOR THE COURT.

(Continued from first page.)

engineer until after the vote of the people decides the fate of the six million dollar road bond proposition put up to them then.

The idea is that a very different engineer corps will be required if that proposition carries than if it does not. The county court here feels that it ought to begin as soon as possible on the new road work planned since our \$362,000 road bond issue was voted last May and that to wait for Surveyor McCullagh to make a new survey of the Bandon to the county line road and the Marshfield-Coquille road this side of Coaledo before these projects are advertised and contracts let; or again to wait until the result of the election next June is known and a new highway engineer is appointed, will prevent either of those contracts being completed this year. This will not only involve a year's wait for improved roads at those places and mean another year of mud blockade between here and Marshfield, but will result in what is practically a loss of a year's interest on the bonds.

When the Judge and commissioners meet the new commission for this district, Mr. E. J. Adams, at Marshfield today, they hope, however, to secure some additional information as to the time at which the new state highway engineer will be appointed.

There is still more hinging on getting to work speedily on the last section of the Coquille-Marshfield road, however. Under the new bond law, if it is approved by the people, it is thought that Coos county can have its twenty miles of road from Marshfield to Coquille ready for hard surfacing before any other project in the state, if the contracts which the court will be ready to let next month, can be proceeded with at once and the snags we have been talking about do not interfere. Otherwise it is possible that they may be delayed so long that other large projects may be prepared for hard-surfacing before them.

Last night after the above was written the court came to an understanding and made a compromise with Surveyor McCullagh, which takes all the kinks out of the road problem so far as he is concerned. He is to check up all the road work in question from the surveys made under the direction of the State Highway Commission

last year, and get his plats ready and file them before the county court is ready to let the contracts for the work on those projects. This will obviate any further delay in getting to work on them.

As to the new Highway Commission, whether it appoints its new engineer before June or not, all the surveys last year having been made under the direction of the old commission, the County court thinks that a formal approval will be given by the new one in ample time to permit the advertising and letting of contracts contemplated in the next few weeks.

Game Warden Here.

Deputy Game Warden J. M. Thomas was over on this side last Saturday looking for game law violators. He did not report the capture of any such law breakers, but he did tell of the changes in the game laws made by the last legislature. The bag limit for deer this year is to be two instead of three as heretofore. One reason for reducing the number that can be lawfully killed is the severe winters of the past two years which have caused the deaths of hundreds from cold and starvation.

Hunting and fishing licenses have been raised 50 cents each so that it now costs \$1.50 to secure a single license or \$5 for a combination license. However this law does not become effective until about the 20th of May. Ladies require no license to fish, but must have a \$1.50 license to hunt.

The law in regard to dogs running deer is very strict and after a notice to the owner of dogs guilty of the practice, the game warden has authority to do away with such dogs as continue the illegitimate sport.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one graded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
