Tennis is one of the finest games we have the pleasure of playing, both from the standpoint of exercise and pleasure. It is equally suited to women as to men. It is not only a game which requires quickness of foot but quickness of sight and ever present handwork. Brain work is most essential in picking out the weak spots in your opponent's attack and in directing your own offensive accordingly. Beyond doubt tennis is a good snappy game which should receive the support of every true sportsman.
