"I wish they'd had Electricity when I was a boy"

"I was forever turning the grindstone, churning, or sawing kindling when I wanted to go swimming or fishing—never had a chance to rest—always milking, cutting feed or grinding corn."

Electricity has taken the drudgery out of farm labor. Almost every routine task on the farm, in the dairy or about the house can now be done by a G-E motor in a fraction of the time formerly required and without physical exertion. Costs less than hiring farm hands, too!
