How to Make the Crown of an Unruly Hat Fit Your Head.

When the crown of a hat is too large a comfortable and easy way to remedy the trouble is to take a piece of ribbon or silk the proper color and make a strip two inches wide, having a run for ribbon on one edge.

Sew the straight edge of the hat where the crown lining begins and run a small rubber in the run and draw up to desired size. This is much softer than the ready made stiff ones and likewise admits of a change of size to suit the hair.

How to Scale Fish With the Least Trouble.

The best way to scale fish is to dip them in water just a little too warm to bear the hands in and scrape toward the tail. The scales will not fly and will scrape off like paste. To skin fish make water a little hotter, but do not let them remain in the water. If the fish is large scald one side at a time to avoid softening the flesh.
