"I was forever turning the grindstone, churning, or sawing kindling when I wanted to go swimming or fishing—never had a chance to rest—always milking, cutting feed or grinding corn."

Electricity has taken the drudgery out of farm labor. Almost every routine task on the farm, in the dairy or about the house can now be done by a G-E motor in a fraction of the time formerly required and without physical exertion. Costs less than hiring farm hands, too!

### Rocking Bandon-Curry Road.

The work of rocking the first four miles of the Bandon-Curry "Township Line" road has begun, says the World, and is being prosecuted with all the men and teams available. It is being done under the supervision of District Supervisor A. J. Counts, who has thirty men and twelve teams on the job.

The rock, which is being crushed at the government Tupper Rock quarry, is placed on the road to a depth of ten inches, and 1 foot wide. The first half mile is now ready to receive the material. The county steam roller will be used in placing it so as to make a firm base.

Mr. Counts says that he has available about \$12,000 in tax money and he intends to make it go as far as he can, but says every foot of rock put down will be put there to stay.

### Once Would Be Sufficient.

Newspapers have been one of the most powerful forces in crystallizing sentiment in New Jersey and other states for the protection by proper laws of fish and game as important resources of the commonwealth. One editor, a thorough sportsman, recently received from a reader, who desired to take fish by questionable means, a query saying:

"Please advise me how to dynamite a stream."

The newspaper sent the following advice:

"Four sticks of dynamite are sufficient. Tie them securely around your neck, attach a fuse, light it and run as fast as you can away from the water to avoid injuring the other snakes and reptiles."

Calling cards 100 for \$1.00.
