

### Our Reactionary President.

Taft a reactionary! Cummins and Clapp have said it and it must be so. Taft urged a tariff board to further schedule revision along scientific lines and secured it. That is reactionary. Taft used his influence to secure maximum and minimum schedules, so that we could have a club to compel fair treatment by European nations. That of course is reactionary.

Taft put through the one per cent tax on the incomes of corporations over \$5,000 a year, so that the government could inspect their books and demand a square deal. This law yields about \$30,000,000 a year to the treasury, and may be called reactionary.

Taft has demanded an economical administration of every department of the government and has turned a deficit into a \$40,000,000 surplus in the last fiscal year. That to be sure is old-fashioned and reactionary.

Taft has made the postoffice department self-supporting for the first time in the history of our government, which is shamefully reactionary.

Taft has secured the passage of the Canadian reciprocity pact for which the misnamed progressives have been shrieking for many years, but now oppose. And of course anything they don't want is reactionary.

Taft has signed treaties of arbitration with England and France, and will soon secure similar agreements with Germany and Japan, putting an end to international war. We have been preaching that doctrine since the birth of Christianity, and that is long enough to make it reactionary.

Taft has urged the admission of New Mexico and Arizona with constitutions that conform in general principles with those of the other states of the Union. There is no good reason why they should not conform, but in these modern times reason itself is reactionary.

Taft believes with all patriots, philosophers and statesmen, that the best guide for the future is the lamp of experience. But to look to the past is to be reactionary.

In vetoing the recall of judges, the president exercised a constitutional right. But the constitution is a reactionary old instrument, and what's the use of discussing the matter further?—Rede's Budget, Pine City, Minn.

**"Honorable" Tabooed in Oregon.**  
Secretary of State Olcott has confirmed the report that he had given orders to all the department heads in his office that the prefix "honorable" should no longer be used in the official correspondence. Mr. Olcott said:

"Webster says that 'honorable' is a title of quality, conferred by English usage upon the younger children of earls and all the children of viscounts and barons. The maids of honor, lords of session, and the supreme judges of England and Ireland are entitled to the prefix. In American usage it is a title of courtesy merely, bestowed upon those who hold, or have held, any of the higher public offices, especially governors, judges, members of congress and mayors.

"In this country one man is as good as another and public office does not, in my opinion, entitle the official to any special badge or title of distinction. To illustrate, I am now designated as 'honorable' while a year ago I was not. I am no better now than I was then."

**Proposed Model Liquor Ordinance.**  
The city attorney of Springfield, is drafting a model liquor ordinance to be submitted in case prohibition is defeated at the election next month.

As outlined, the proposed ordinance provides that those who sell liquor must be American citizens; must be residents of Springfield, or become such forthwith; must make affidavit that they have not violated the liquor laws of Oregon within twelve months, perjury in this case to work forfeiture of license and bond, and subject party making false affidavit to prosecution and conviction for perjury; must furnish bond by resident bondsmen, that the law will be observed, revocation of license to work forfeiture of bond. Among the regulative features are Sunday closing and closing at reasonable hours on week days; no screens, no tables or chairs, or games of any kind, even dice-shaking; no side or back door entrances; applications posted two weeks before the granting of license and the same publicly posted by applicant; on protest by two residents of Springfield, the matter to be taken up and given a hearing as in court and if it be shown that applicant is undesirable no license to issue; minor and drunkard provision which permits any member of the family of any man either his wife and children or parent or a public officer to forbid the sale of liquor to a person, whereupon, after notice to the saloon man he must not sell any liquor to the party against which protest has been made, also providing severe penalties to any one who buys liquor in a saloon or gives it to a minor.

First violation of regulations to be punished by fine, second by forfeiture of license, and payment of bonds to city treasury. Licenses to be not less than \$1,000 a year.
