

### No Little Task

Think of the darning this bunch of youngsters make. Think of the long hours and the drudgery. Most mothers have learned the secret—how to avoid it. They are buying

#### Armor Plate Stockings

The special dyeing process used in this hosiery is a peculiar one—it doesn't weaken or rot the yarns like the average kind. That means better service—less expense and no darning worries. Not only for the youngsters, but the fathers, mothers and the grown-ups. Ask us next time.

### The Ladies' Toggery

MARY BARTELS, Prop.

## The "Unanswerable Argument" Answered

By MRS. LIDA CALVERT GREENHAIN

It is asserted that "average good American woman's indifference to woman suffrage" is an unanswerable argument against the movement.

If this be true, there is an unanswerable argument against it every good work and every reform movement of the present day, or of any past day, for it is a fact that "the average good American woman," and her brother, "the average good American man," are shamefully indifferent to the things that make for the public good.

A knowledge of sanitary science is a good thing. The average American woman living in a town without a drainage system will permit the cook to throw fish water and kitchen garbage into the back yard, and the average American man, unless deterred by law, does not hesitate to expectorate on the public pavement and the floors of public buildings. Is this indifference to sanitary precautions an unanswerable argument against sanitary science?

The men and women who are working to abolish child labor encounter a vast indifference to this subject on the part of legislators and the people at large. Is this indifference an unanswerable argument in favor of child labor?

Seventy-five years ago, women did not go to college. When the agitation for the higher education of woman began, the indifference of the average American citizen arrayed itself against

education for women. Was this indifference an unanswerable argument in favor of illiteracy for women?

There was a time when a married woman could not make a will, and a married woman's wages belonged to her husband. So indifferent were the average men and women to this injustice that it was years before married women obtained property rights. Was this indifference an unanswerable argument against granting woman the right to dispose of her own possessions by will, and to collect and spend the wages earned by her own toil?

But why go further in citing parallel cases? There are two classes of people in the world. In the women of one class, a keen sense of justice is developed. In the other class, the sense of justice is so undeveloped that women belonging to this do not object to a condition of disfranchisement that reduces them to the political level of the idiot, the lunatic, the felon, the minor and illiterate negro of the South.

This large class of women is well described as "average," and by mere force of numbers these average women may continue for a long while to have things their own way. But human progress means the setting aside of the opinions and wishes of average people, and in the long run the world is governed by the small first class, the men and women who love justice, who know what justice is, and who, by this love and knowledge, are raised above the "average."—The Woman's Journal.

### HOW TO GROW LOGANBERRIES

Britt Aspinwall of Brooks Gives Valuable Information.

As many small land owners, and others, in Lane county, are contemplating setting out loganberries, following extracts from an address delivered by Britt Aspinwall of Brooks before the Oregon State Horticultural Society in November, 1911, will give some idea as to raising and caring for the loganberry, which is now considered one of the very best fruits on the market and meets with great favor wherever introduced:

"I will take up the raising of the loganberry from the beginning. First you should have a good, deep, rich dark loam soil with preferably a clay subsoil, as this will retain the moisture better than a gravelly or sandy soil. Land that is slightly rolling is to be preferred, as drainage is very important. The ground should be well prepared in the fall; then early in the spring should be thoroughly worked and put in good condition for planting. In obtaining plants be sure and get only first class tip plants or good one-year-old transplants, as the growth of the loganberry for several years will depend on the start it gets. We plant them eight feet apart each way. This requires about 680 plants to the acre. In setting them out we mark the ground both ways and take out a good shovelful of dirt for each plant, packing it back in around the plants by hand, to keep them from drying out. After they are properly set out they should be worked at least once each week during the summer with something to keep the surface stirred and hold the moisture. We mostly use the spring-tooth harrow and clod-masher, and work them both ways during the summer. If planted in March or April the plants will not grow enough to interfere with the cultivation 'till late in the summer, when they will begin to shoot out over the ground, making vines several feet long before winter.

Early in the fall build your trellises, good cedar posts seven feet long. Set them in the ground two feet and not over 32 feet apart in the rows, anchoring the end post good. We use three No. 12 galvanized wires, putting the bottom one about 20 inches from the ground and the top one on top of the posts. It is best to run the rows north and south, so as to give the sun a more even chance at the ripening fruit. In training the vines weave them around through the wires, spreading them over as much space as possible. Where the temperature goes below zero the vines should be put on the ground and covered with straw to keep them from freezing.

"As soon as the ground is ready to plow in the fall, we plow it towards the rows and leave it in this condition 'till spring, so as to give the water a chance to run off between the rows. In the spring we plow it away from the rows, and after hoeing between the hills, take a disc harrow and throw the dirt back to the rows, leveling the ground. From then on during the summer we work with a spring-tooth harrow and clod-masher about once each week. It is also a good plan to loosen up the dirt around the hills with a spading fork. The new shoots should be kept trained into the rows so as not to break them off in working with teams.

"As soon as we finish picking we cut out the old vines and train up the new ones. We throw the old ones between the rows and cut them up with

a sharp disc harrow so that they can easily be plowed under and serve as a fertilizer.

"The cost of setting out, trellising and caring for a new yard up to the first crop, which will be the next year after they are set out, is about \$75.00 per acre.

"The first crop should be from one to three tons of fresh fruit to the acre and after that a good average yield is from four to five tons, or even more to the acre.

"The loganberry is now used fresh, canned and evaporated. We find the evaporator the best means of handling them in large quantities successfully. For pies, jams and jellies it has no equal and they also make a good wine."

### Farm Accounting Factor in Success.

The fact that the U. S. Department of Agriculture has established an office of farm management and that the Civil Service Commission recently held examinations to secure men eligible for appointment as assistants in farm cost accounting, is sufficient indication of the growing realization of the importance of better business methods on the farm.

If any further recognition of the fact were needed, it may be found in the great number of letters requesting information on the subject which are received daily by Dean J. A. Bexell of the O. A. C. School of Commerce, whose text book, "Farm Accounting and Business Methods," is in use throughout the United States and abroad. Men in Germany, England and Australia have written him regarding it.

"No farmer has a reasonable excuse to offer for wasting valuable time and labor on crops which, because of climatic or economic conditions, can not yield adequate returns," said Mr. Bexell today. "Accurate records and accounts are absolutely necessary in the management of every business enterprise. No business can be successful in the long run unless its condition can be determined at any time, and no conservative business man will fail to prepare a financial statement at the end of his fiscal year. He must determine how he stands, not only with others, but with himself.

"One object of keeping accounts is to assist in accumulating property. Another important object is to record a continuous history of business transactions for future guidance." Not only is this profitable, but it is a source of real pleasure and satisfaction to know our standing with those with whom we deal as well as the profits and losses in our business enterprises."

### Card of Thanks.

We wish to thank our many friends for their sympathy and kindness shown us during our recent bereavement, and for the many floral offerings.

MRS. W. H. ARNE and FAMILY.

### Flagged Train With Shirt.

Tearing his shirt from his back an Ohio man flagged a train and saved it from a wreck, but H. T. Alston, Raleigh, N. C., once prevented a wreck with Electric Bitters. "I was in a terrible plight when I began to use them," he writes, "my stomach, head, back and kidneys were all badly affected and my liver was in bad condition, but four bottles of Electric Bitters made me feel like a new man." A trial will convince you of their matchless merit for any stomach, liver or kidney trouble. Price 50c at all Druggists.

## Summer Vacations

VIA THE

To the East  
Rose Festival  
Elk's Convention

SEASHORE  
or  
MOUNTAINS

Round Trip tickets to the principal Cities of the East, going or returning through California, or via Portland. Going limit 15 days, final return limit October 31, on sale as follows:

#### Sale Dates:

May 2-3-4-9-10-11-14-15-17-18-24-29. Aug. 1-2-3-6-7-12-15-16-22-23-29-30-31.  
June 1-6-7-8-13-15-17-18-19-20-21-24. Sept. 4-5-6-7-8-11-12-30.  
25-27-28-29.  
July 2-3-6-7-11-12-15-16-20-22-23-26-29-30-31.

#### Newport—Yaquina Bay

The home of the Rhododendron, an ideal place to spend the summer. Low round trip and week end tickets. Reasonable hotel rates, out door amusements, bathing, boating, golf, fishing, etc.

Low Fares to Meeting of Women's Clubs, San Francisco, June 24 to July 6

#### Pacific Railway and Navigation Beaches

Are now within easy reach by the P. R. & N. and a new field for a pleasant vacation open. Week end tickets now on sale and season tickets from all points on sale June 1st.

#### PORTLAND ROSE FESTIVAL

Opens June 10 and Closes June 15. The greatest Floral Fiesta and Carnival of Pleasure yet held. Low round trip tickets on sale from all points.

For beautifully illustrated booklets describing Newport, Bayocan and other points, and information about Eastern Fares, routes, stop-overs, etc., call on nearest Agent, or write to

JOHN M. SCOTT, Gen'l Passenger Agent, Portland, Ore.  
B. P. O. E. ELKS CONVENTION - JULY 8 TO 13, 1912

## De Laval Cream Separators Make The Best Butter

The Cream Separator does not actually make the butter, of course, but the quality of butter that can be made depends largely on the condition of the cream, and the cream depends on the cream separator. The De Laval Cream Separators are undeniably and indisputably capable of producing a better quality of cream than any other separator or skimming system, thus enabling the production of a better quality of butter.

We will sell you a De Laval upon a small payment down and you can pay the balance in small payments. CREAM TAKEN THE SAME AS CASH.

#### We Want Your Cream

We pay the top price, furnish the can and pay the freight.

### COTTAGE GROVE CREAMERY

"A SQUARE DEAL TO ALL"

## Cottage Grove Sunday, May 26th

Free Circus Street Parade 10:30 a.m.  
9 bands, 250 horses, elephants, camels—400 people of all climes in native costumes will be shown in parade.  
Two shows daily—afternoon at 2, night at 8, doors open at 1 and 7 p.m.—Waterproof tents. Admission 25 cents to see it all.

NOTE.—The street parade advertised above will not occur.—ED.

## Nazareth Waists

are the most serviceable knitted waists for boys and girls that can be bought for a quarter.

Worn next the skin in warm weather, it's porosity means proper ventilation of the body—perspiration quickly evaporates—prevents summer colds.

We sell more Nazareth Waists and Union Suits than any other kind because they satisfy.

Waists 25c, Union Suits 50c

## LURCH'S, Cottage Grove

WEDDING Stationery, Party Invitations.  
The Shop Where Good Printing Is Done

## STERLING FEED CO.

D. STERLING, MANAGER

Wheat, Oats, Grain, Hay,  
Mill Feed—Shorts, Bran,  
Vetch Seed, Chopped Oats,  
Oil Meal, Grass Seed—all  
kinds constantly on hand.

FLOUR—Hard Wheat Brands:  
American Beauty, Pure  
White, Red Cross. Every  
sack guaranteed.

FLOUR—Soft Wheat Brands:  
Pheasant, White Star.
