Mr. and Mrs. S. L. Mackin, Harry Short and Miss Mabelle Iverson spent Sunday at London.

OFFER BIG PRIZE FOR BEST WHEAT

\$5,000 Is the Amount.—Five Times as Much as Ever Before Offered in the United States.

Five thousand dollars for the best five bushels of wheat grown in the American Northwest is the prize announced as the grand champion sweepstakes to be awarded by the Northwest Development League this year. This is the world's greatest prize for wheat—twice as large as any prize ever offered in Canada, five times as much as has ever been offered before for any class of grain in the United States.

The wheat is to be displayed at the Northwestern Products Exposition which will be held in Minneapolis Nov. 12 to 23. No entry fees will be charged. The samples must contain five bushels and along with the threshed grain ten bundles or sheaves from six to ten inches in diameter must be sent.

States which will compete are Oregon, Idaho, Washington, Minnesota, North Dakota, South Dakota, Montana.

The prize consists of a Big Four "30" farm tractor manufactured by the Gas Traction Company of Minneapolis and a set of plows made by the Emerson-Branningham Company of Rockford, Ill. The tractor and plows will be delivered to the winner free of cost by the Development League.

This machinery was selected by the officers of the league after much consideration of what the prize should be, and it was decided the most practical prize would be a farm tractor and plows. The tractor selected will do most anything: plowing, harvesting, drilling, harrowing, threshing or freighting.

Aeroplane at Eugene.

Weldon B. Cook will give aeroplane flights at Eugene Saturday and Sunday.

The cherry crop will be a record breaker. They are not injured by the late rains and in some orchards they are so thick on the branches that the trees will have to be propped. In some of the prune orchards considerable damage was done by the rains, while others came out with little if any loss.—Creswell Chronicle.

BITULITHIC O. K. SAYS HYLAND

George Hyland, president of the Mount Hood Railway company was in the city yesterday, says the Baker Democrat. Mr. Hyland was formerly in the paving business, being connected with the Hassam Pavement company, and he was particularly enthusiastic about the pavement completed and contemplated here.

"I think a wise selection has been made in the use of Bitulithic," he said. "While I was engaged in the paving business and a member of the Hassam Company, I am frank to admit that Bitulithic is a better material. So far in Portland it has been an unqualified success. Our Hassam pavement was not a success such as we hoped for, simply because it was impossible to repair a break successfully and make a good job. Being a concrete composition, the fresh material would not fuse or set to that which had been exposed to the air. I consider one of the greatest recommendations for Bitulithic is the fact that any break in this material can be repaired so that in a few hours it is almost impossible to find the break. I am certain Baker has made no mistake in adopting it. Other cities as well as Portland have been very much pleased with Bitulithic, and I know this from personal experience in traveling about the country when I was in the paving business myself. I have absolutely no connection with the Bitulithic company and no ax to grind in making this statement.

H. & H. HARD WHEAT FLOUR

A High Grade Hard Wheat Home Made Flour

Announcement

YOU and your friends are invited to witness a Practical Demonstration of the Working Mechanism of the Flanders 20, at Mozach Garage, Eugene, Thursday, Friday and Saturday, May 23, 24 and 25

Through the enterprise of the Nesmith Auto Co., local agent for the Flanders "20" and the E-M-F-30, and the courtesy of the Studebaker Mfg. Co., residents of Cottage Grove and vicinity will have the opportunity of seeing two very interesting automobile exhibits, one of which is a cut-away chassis of a Flanders 20 operated by an electric motor showing the working parts of the motor, transmission and differential, which will be given at Mozach Garage at Eugene. This is an unusual opportunity to see "what makes the wheels go around," as the course of the power can be traced from the gasoline tank, through the carburetor, the vaporizing process being explained, and the operation of the pistons, and the power can be traced through the transmission and to the wheels. Drivers of all makes of cars are invited and any question will be gladly answered by G. C. Nichols, Supt. of Agencies, in charge of the exhibit.
