The notarial commission of Oral E. Crowe of Lorane has been filed with the county court.

You'll get yours if you order early—your Ford machine—Nesmith Auto Co.

Frank Woodruff was in Eugene yesterday on business.

Harry Parker has been down from Bohemia this week.

W. H. Minor and family arrived Sunday from Burwell, Neb., and are visiting their son Monte. They expect to settle in the Grove country as soon as they find a suitable location.

Bud Shortridge went to Comstock this morning on business.

Can You Do It?
Here are some things you can't do, or if you can, you are different from 99 per cent of mankind. Can you repeat from memory (don't look) the wording of a two cent stamp? Can you copy out from memory the exact figures as they appear on the dial of your watch? Can you copy from memory the exact wording on a one cent piece or say which way the head on the coin is facing? Can you say from memory whether the head on a cent, nickel, dime and quarter, face the same way? All these are things that you have handled since boyhood. They should be more familiar to you than the alphabet. Yet it is ten to one you can't give correct answers to one of the foregoing questions. Why can't you? Try them on your friends.—Ex.

IN THE COUNTY COURT OF THE STATE OF OREGON FOR LANE COUNTY.

In the matter of the Estate of William H. Arne, Deceased.

Order to Show Cause.

Now, at this time, the petition of Rufus C. Arne, administrator of the estate of William H. Arne, deceased, coming on regularly to be heard, and it appearing to the court from said petition that it is necessary to sell all of the real property belonging to said estate, in order to pay the outstanding debts, charges of administration, and for the purpose of distribution;

It is therefore ordered, that all persons interested in said estate appear before this court on Friday, the 14th day of March, A. D. 1913, at the hour of one o'clock p. m. of said day in the court room of said court, at the court house, in the city of Eugene, Lane County, State of Oregon, to show cause why an order should not be granted to said administrator to sell said real property, described as follows, to-wit:

Beginning in Sec. 28, Tp. 20, S. R. 3 West, at a point whence corner No. 3, of county survey No. 1429 bears South, 24 degrees 10 minutes West, 916.2 feet, and running thence South, 65 degrees and 50 minutes East, 317 feet, thence North, 18 degrees and 40 minutes East, 266.5 feet, thence North 65 degrees and 50 minutes West, 291 1/2 feet, thence South, 24 degrees and 10 minutes West, 265 feet, to place of beginning and containing, 1.85 acres of land, in Lane County, Oregon.

Lot four (4), Block one (1), in James Henry McFarland's first addition to the City of Cottage Grove, Lane County, State of Oregon.

And it is further ordered, that a copy of this order of citation be published for four consecutive weeks next preceding said day in the Cottage Grove Sentinel, a newspaper printed and published at Cottage Grove, Lane County, Oregon, and that service of this order be made upon the resident heirs of said deceased according to law.

Dated this 6th day of February, A. D. 1913.

HELMUS W. THOMPSON,
County Judge.

ALTA KING,
Attorney for Administrator. f6-m6

FOR SALE.—HOUSE ON SIXTH St., third block south of Main, on paved street. Partly furnished. \$1,000. f6tf

FRUITS SHOULD BE CHOSEN TO SUIT PREVAILING CONDITIONS

Much Loss From Selection of Un-suitable Site.

"Failure in orcharding comes first from poor selection of the site, and second from unskillful orchard management," said Prof. C. L. Lewis of the Oregon Agricultural College in a lecture on "Principles of Fruit Growing" in the short course.

"A large percentage of the orchards planted will never be of commercial value, owing to the fact that their locations are unsuitable," he continued. "In choosing orchards there are many points to consider, such as climate, altitude, exposure, soils, transportation facilities, the type of people, and the possibilities for expansion of the industry."

"The factors of climate influencing fruit growing are extreme temperature, the length of the growing season, the suddenness with which the summer or fall weather terminates and freezing weather begins, the rainfall, the amount of heat in the fall months during the ripening period, the percentage of sunshine, and the presence of frosts. The climatic factors, as far as the Pacific coast is concerned, are the real determining factors. Others are to a certain degree subordinate.

"The soil plays an important part, the main factors being good depth and good air drainage. Soil that is not at least four feet deep without encountering undesirable sub-strata, such as hard rock, coarse gravel, or cement gravel is undesirable. Careful examination and boring should be made of both the surface and sub-surface soils. One should satisfy himself not alone as to the surface drainage, but also as to sub-surface drainage, as seepage waters are often present in our mountainous valleys.

Soil fertility is an important item. Too much stress is placed on mere analysis generally. It shows us whether or not the soil is deficient in certain elements, or whether they are present, but unfortunately it cannot tell us how available the plant food is in the soil. The natural character of the soil is more important than the analysis. Without good climatic conditions, success cannot be hoped for.

"Pears succeed on heavier soils than other fruit. Apples do well on a wide range of soils, from the clay loams to the silt and sandy loams. Prunes seem to do well on any soil that is well drained; peaches, on either silty loam or well drained clay loams. Cherries succeed on the lighter clay loams, and nuts on any soil that is deep and well drained.

"The exposure of the site is an important point. Most of the southern exposure of western and southern Oregon are thin and unadapted to fruits. Where the ground is good, however,

Seeds That Grow

WE have, this year, four lines of the best Seeds we could secure anywhere and with our large assortment of Eastern and Western grown Seeds, we are able to supply anything you may need in this line. We are going after the Seed business of the City and surrounding country and if unable to supply you from our regular lines, we will be pleased to get them for you on short notice. The lines carried are:

Northrup, King & Co.'s
The Lake Shore Seed Co.'s
Lilly's, in Packages
Portland Seed Co.'s in Bulk

The Metsan Shop

fruits on southern exposures are early, if they are free from frosts. Northern exposures generally are the less frosty, but are late in maturing. Eastern exposures are undesirable in frost regions.

"On the Pacific coast the altitude bears an important relation to fruit growing. A range of a few hundred feet often determines the adaptability belt for a certain kind of fruit. About the limit of commercial fruit growing in the Pacific Northwest is 3,000 ft. elevation.

"The more railroads in a fruit growing community the better. Eventually the fruit crop of the Pacific coast will be extremely large, and will need good transportation facilities.

"The type of people among whom a grower settles is important to his success. Fortunately most of the people on the Pacific coast are very progressive and will adopt new methods readily. In some regions of the country, however, people are very conservative, so that it is had to enforce good horticultural laws.

"The possibilities of the expansion of the business are important. Fruit buyers like to come where they can get trailloads, rather than seek out small isolated sections.

"Foolish comparisons are often made between the irrigated and non-irrigated sections. Good fruit can be grown on either, and lots of money made, provided natural conditions are right. On the contrary, fortunes can be lost in either if the conditions are unfavorable."

OREGON STUDENTS' LIFE WORK IS CHOSEN

Definite purpose marks the work of the men students of the University of Oregon, according to a census just taken by the University Y. M. C. A. These figures show that out of every ten men in the institution nine have already made up their minds as to what profession they will follow.

The presence of the engineering school gives the mechanical professions the predominance in point of numbers. Law and medicine follow in the usual proportion, while those who regard a college education as a requisite for a business career fall only one short of

Cottage Grove Lodge No. 51, A. F. & A. M. Meetings first and third Wednesdays of the month in Masonic Hall, Pacific Highway. Next meeting Feb. 19
J. E. YOUNG, Sec'y

Cottage Grove Chapter No. 4, O. E. S. Next regular meeting, Friday, Feb. 7; 7:30 o'clock. Masonic Hall, Pacific Highway. Ada C. Adams, Sec.

those taking pre-medical courses. The next class includes journalism and teaching, with journalism leading. The group at the bottom of the list included farming with only ten (the state's need of farmers being principally met by the sister institution) mining, Christian service, architecture and chemistry.
