### Life History of Richard Crow.

Richard Crow was born in St. Charles County, Mo., March 15, 1833, and died at Lorane, Ore., April 19, 1913, at the ripe old age of 80 years and 25 days.

In youth he emigrated from Missouri with his parents to Iowa where he resided until the spring of 1851, when he was seized with the California gold fever and with a party, consisting of a brother-in-law and friends, started for California, reaching the Sacramento Valley in the fall, after a long and weary six months' trip with ox team across the plains. In the spring of 1852 his father and family started for the sunset land. The following October, "Diek," as he was called, joined them near Portland, reaching Lorane Valley (then known as the Siuslaw) in July, 1855. Here he took up a donation claim on which he lived continuously until death. On Sept. 1, 1867, he was married to Sarah J. Thrush, who survives. To this union was born fifteen children of whom 11 are still living. They are Mrs. Cynthia Allen, J. N. and Orville of Lorane; Nathan and Frank of Yoncalla; B. G. and Mrs. Elman Bainbridge of Cottage Grove; Mrs. Emma Matthews, Mrs. Laura Lyle and Mrs. Lena Yoe of Pullman, Wash. In early manhood Mr. Crow united with the Methodist Episcopal Church, dying as he lived a modest, painstaking christian man. The funeral was held from the M. E. Church at Lorane, conducted by his pastor, Rev. F. W. Snyder. The body was laid to rest in the Crow family cemetery.

### Brings Suit for Divorce.

Ida J. Veatch has commenced suit against her husband, Robert W. Veatch, for divorce and the custody of their minor child, Robert. She charges him with cruel and inhuman treatment and abuse. Property rights have already been settled.

### Body of George Myers Recovered.

The body of George Myers of Walterville, who with three others were drowned in the Siuslaw river near Mound on Sunday, March 30, was recovered not far from the place where his brother, James Myers, was found a short time after the sad accident. Search is still being made for the body of Cleo Doyle, the only one not found as yet.

### Find Strange Specimen.

A piece of rock, containing the imprint of some alder and willow leaves, is on exhibition in the window of the Toggery and is attracting considerable attention. It was brought in by W. C. Blackburn, who lives about 3 miles southeast of this city. The imprint of the leaves is as perfect as possible, showing not only leaves but the stem and parts of bark. Some have advanced the opinion that the rock has formed in wet ground as it is a slate color and powders rather than splits in layers. According to Chas. L. Scott, who is authority on these formations, this specimen, is not uncommon in this locality. It is a strange combination nevertheless and shows that the old world has been working for a good long time.—Springfield News.

### Ground Good for Crops.

Farmers are busy putting in spring grain and say the ground is in the best shape for sowing they have ever seen. The few frosts occurring since the ground was plowed have had the effect of mellowing it down wonderfully. A good crop is almost assured, as grain always does well without much rain when the ground is in as good shape at seeding time as it is this year. Country roads are drying up rapidly.

Railroads and commercial bodies are in league with each other to attract the Panama-Pacific Exposition travel in 1915 through Oregon and Washington either en route to the fair or on the return trip. Since many in the East are already planning their trip west, it is thought necessary to start this work early in order to reach the greatest number of prospective fair visitors.

The weather bureau has inaugurated a special service for the fruit districts of the state during April and May. Trained men will be placed in the chief fruit districts who will be prepared to notify fruit growers just what temperature may be expected on frosty mornings. It is thought that in this way damage may be greatly lessened by timely warnings.
