

"The LIFE of a wagon is what counts—that's why I buy a Studebaker"

"That's reasonable, isn't it?"
 "A wagon that doesn't last is expensive no matter what price you pay for it."
 "Suppose you buy three wagons, one after the other, and the three of them don't last as long as one Studebaker—which is the best bargain?"
 "I didn't find this out myself. I heard my grandfather say it a good many years ago. He said he had proved that it paid to buy a Studebaker. I followed his advice to my own satisfaction."
 "A wagon can't have life in it unless it has the material and work and finish in it. The Studebaker people have been making vehicles for sixty years. They ought to know how to make wagons right—and they do. They have the reputation because they've produced the goods. They don't put the name Studebaker on until the wagon's right, and when you see the name Studebaker on a vehicle of any kind it is your insurance of quality."
 "That's why I buy a Studebaker. I trust a Studebaker wagon because I trust the people that make them. It's good business."
 "A Studebaker promise is always made good."

There is only one way to get all the news of the Grove country. That is in The Sentinel.

Within a 15 mile circle around IMPERIAL there are now several hundred prosperous farmers raising enormous crops of wheat, rye, barley, oats, potatoes, vegetables, etc. Poultry raising is also highly successful. Three large stock ranches, owning several thousand horses and cattle are also in this circle. IMPERIAL is now the trading point and will soon be the shipping point (the railroads are now building) for the products from thousands of acres surrounding it.

JOHN L. McNAB

John L. McNab, federal district attorney at San Francisco, who attacked Attorney-General McReynolds in a white slave case and resigned.

FRAUD IN REFERENDUM?

Will Investigate Petition to Refer Oregon Compensation Law.
 Salem, Or.—In the belief that they have evidence that discredits many of the signatures to the petitions to refer the workmen's compensation act, Harvey Beckwith and C. D. Babcock, prospective members of the workmen's compensation commissioners under the law, will ask an investigation by the district attorney of Multnomah county.

After several weeks of work, Messrs. Beckwith and Babcock finished in examination of the petitions and all evidence obtained will be turned over to the district attorney.

While unwilling for the present to give specific instances of irregularities they say they have found sufficient duplications of signatures and false addresses to justify them in asking for an investigation by the courts.

Indian Lands to Be Sold
 Goldendale, Wash.—Five hundred and twenty acres of land in 80-acre tracts, on the Yakima Indian reservation, will be sold to the highest bidder on July 21 by Don M. Carr, superintendent of the Yakima agency at Fort Simcoe. The land is the property of non-competent Indians or those who have died and is appraised at \$26,000.

Catholic Federation Opens in Seattle
 Seattle.—With Archbishop Christie, of Portland, celebrating a pontifical high mass, assisted by Bishop O'Reilly, of Baker City, Or.; Bishop Lenihan, of Great Falls, Mont.; Bishop O'Dea, of Seattle, and nearly a score of priests, the second annual convention of the Catholic Federation of the State of Washington opened in St. James cathedral Sunday.

BALKAN WAR LOSSES ARE OVER 30,000

London.—After 10 days of fighting, more severe and deadly in character than anything in the last Balkan war, a little light begins to break on the hitherto obscure operations. The Servians have lost more men than in the whole previous campaign.

Bulgaria's strategy appears to be to hold the Greeks in check, probably with comparatively small forces, while she deals with Serbia. This assumption, if correct, would explain the victorious advance of the Greek army.

Saloniki dispatches continue to report Greek victories. The Greeks are said to have captured 16 guns at Doiran. Evidence of desperate fighting is found in the arrival of 8000 wounded at Saloniki, taxing the town's accommodations and resources to the uttermost.

A conservative estimate of the killed and wounded in last week's fighting fixes the number at from 30,000 to 40,000. Thousands of destitute refugees from the scene of the fighting are coming into Saloniki.

The Greeks continue to make wholesale charges against the Bulgarians of burning and pillaging all the villages they abandon and of committing murders, mutilation and other horrors.

NATIONAL BANKS FAIL IN PENNSYLVANIA

Pittsburg First-Second National Cause of Failure of Other Institutions.

Pittsburg.—The First-Second National Bank of Pittsburg, the First National Bank of McKeesport, a neighboring city; the American Waterworks & Guarantee Company and the banking house of J. S. and W. S. Kuhn, incorporated, of this city, were forced into the hands of a receiver, through the failure of the first-named institution to open its doors Tuesday.

The closing of the First-Second National Bank was ordered by the Controller of the Currency, T. P. Kane, after every effort had been made to meet the government requirements as to the legal reserve.

The Kuhn banking house has extensive interests in irrigation projects throughout the west and mines and street traction systems throughout western Pennsylvania, besides being a dominant factor in the American Waterworks & Guarantee company.

W. S. Kuhn was president of the First-Second National Bank, vice president and director in the banking house and vice president and director of the American Waterworks & Guarantee company, besides being a director of the McKeesport bank. J. S. Kuhn was a director of the First-Second bank and president and director of the American Waterworks & Guarantee company, besides being a director of the McKeesport bank and chairman of the board of directors of the banking house.

Washington.—Secretary McAdoo in a statement declared that the general banking condition in Pittsburgh, as well as in the entire country, was strong and sound and that he expected no further trouble as a result of the failure of the Pittsburgh First-Second National bank.

"The failure of the Pittsburgh bank is simply a sporadic case of unsound banking and has no other significance," the secretary said. He added that the receivership for this institution removed a long-standing "sore spot" in the Pittsburgh situation, leaving the general condition in that city sound.

OREGON BANK ROBBER SOON CAUGHT.

Portland.—Following the sensational holdup of the First State bank of Milwaukie, Ore., Saturday afternoon and a daring effort to make away with his booty, Virgil Perrine, the robber, was captured two hours later within the limits of the town. He was found immersed to his head in the water under a water works wheel, and dynamite was used by the posse in effecting his capture.

STRIKERS CONTROL SITUATION IN RAND

Johannesburg.—The settlement of the strike among the gold miners in the Rand district, which the government arranged with a committee of strikers Saturday, proved ineffective. The mobs reassembled Sunday. All trains and streetcars suspended service, the crews refusing to work.

Except at the time of the Jameson raid in 1896 and the outbreak of the war in 1899 this city has not experienced such a day of terrorism as Saturday. The mobs in the business section caused less fear than desperadoes who were threatening to dynamite the homes of the wealthy.

The rioting began when strikers forced their way into the Rand Club, whose members are mine-owners. They demolished everything on the ground floor. Three times dragoons scattered the mob, but it quickly reformed. The troops fired a volley over the heads of the rioters, and then two volleys directly into their ranks.

Revised figures show that about 20 persons were killed and 150 wounded on Saturday, and that 100 were killed or wounded Friday.

CUBAN CHIEF OF POLICE SHOT

Havana.—General Amadoro Riva, chief of the national police, was shot and mortally wounded during a pistol fight in the most crowded portion of the Prado.

General Ernest Asbert, governor of Havana province, Senator Vidal Morales and Representative Arias were involved in the fighting, which was the outcome of a raid made by General Riva Saturday night on the Asbert Club, when a large number of members were caught gambling.

General Riva, while driving with his two young sons, stopped his carriage in front of the Asbert Club and caused the arrest of the door-keeper for illegally carrying a revolver.

A PROBLEM IN FINANCE.

The Question That Lincoln Fired at Secretary Chase.

The mysteries of finance were not always clear to Mr. Lincoln, whose statesmanship was of another sort. But his keen sense of humor would not permit him to regard the difficult subject as too profound for an occasional joke.

One day Secretary Chase of the treasury department found on a desk in his office what at first appeared to be a picture of an "infernal machine."

It looked like a goose, but on further examination it proved to be a drawing of an ingenious invention for turning gold eagles into greenbacks, with the secretary himself working it and slowly feeding it with "yellow boys" at one end, while the government currency came out at the other end, whirling about like the leaves of autumn.

While he was examining it the president came in, as he daily did, for consultation. Mr. Chase handed him the drawing, and his eyes twinkled as he recognized the likeness of the secretary.

"Capital joke, isn't it, Mr. Chase?" he exclaimed.

"A joke," repeated the late secretary. "I'd give a thousand dollars to know who left it here!"

"Oh, no," said Mr. Lincoln temperately, "you would hardly do that."

"Yes, I would!" stoutly asserted the secretary.

"Would you, though?" inquired the president, with that deliberate manner which characterized him when he was really in earnest. "Well, which end would you pay from?"—Youth's Companion.

FREEZING BOILING WATER.

It Sounds Queer, but to Science It Is an Easy Matter.

Water may be boiled and frozen both at the same time. The idea is a little startling, but the explanation is simple enough.

The temperature at which water boils depends purely on the air pressure of its surface. If the air pressure is high the water must be made a good deal hotter to boil than is necessary at low pressure.

On mountains, where the air pressure is lower than at sea level, water boils easily at low temperature. In cooking vegetables of all kinds a certain degree of heat is required, and where water boils before that temperature is reached, consequently they have to be put in a closed boiler so that the generated steam will create pressure for the water to boil beyond the required temperature.

For an experimental proof of this fact the water is placed in a vessel and the air exhausted above the surface of the water. As the process of pumping goes on the water will boil violently, the steam congealing on the sides of the exhaust vessel. If the pumping is continued long enough and the outside is cooled below the freezing point of the water the water will continue boiling and bubbling until it is a mass of ice.

This fact is made use of in estimating the height of mountains. At sea level water boils at 212 degrees F. This principle does not apply to water alone, but to all liquids.—Chicago Tribune.

Surprised Both Ways.

"It is impossible to satisfy some sight-seers," said a man who has country relatives. "A cousin visited me last week. One of the sights I showed him was the crowds. The thousands and hundreds of thousands of people struggling for a foothold at bridges and subway stations struck him momentarily dumb. When his voice came back the first question he asked was, 'Where on earth do you get enough stuff to feed all those people?'"

"I answered that by taking him on a trip through the produce district. I steered him for miles through head high ramps of meat, poultry, vegetables and fruit. At the end of the trip his first astonishment had been absorbed in a deeper wonder."

"Where on earth," said he, 'do you find the people to eat all that stuff?'"—New York Sun.

The Primary Colors.

Primary colors are the colors into which white light is separated by the dispersion of a prism. Those named by Newton are red, orange, yellow, green, blue, indigo and violet. Artists reduce these to three—red, yellow and blue. Scientists generally consider red, green and blue to represent the primary color sensations, and in the theory there are supposed to be three sets of nerves in the retina which can respond to these three colors. The idea of three primary colors is that from the combination of these three all hues may be produced which are to be found in white light.

Paying the Pope's Physicians.

By a long established custom the physicians of the pope are paid every week by the pope's chamberlain. When his holiness is seriously sick the physician does not receive this emolument. From this custom no physician of the pope has departed since the time of Sixtus V.—Le Cri de Paris.

When She Naps.

It is not always a sign of ill temper when a woman "naps." Sometimes the most unselfish and sweet tempered fall into this dreiful habit. Nine times out of ten the woman is tired.

Rose to the Emergency.

News—Did you sew the button on my coat, love? Mrs. News—No, darling. I couldn't find the button so I just sewed up the buttonhole.—Boston Transcript.

A Good Investment.

W. D. Magli, a well known physician of Whittemore, Wis., says he is able to supply them to his patients. After receiving them he was taken sick and says that he and Diarrhoea Remedy was the only thing that saved him from these medicines. For sale by all dealers.
