Would Settle Mexican Problem.

If John Lind fails, it is not too late for the President to try J. Adam Bede's plan. Adam said some years ago that two husky American book agents would make Mexico peaceful, by giving the folks other things on

which to waste their energy.—St. Paul Dispatch.

Large Train of Logs. Twenty-three car loads of logs were brought in by the O. & S. E. Monday evening, constituting the record haul for a number of years.

Calling cards—The Sentinel.

An experiment in the long-distance shipment of perishable fruit is about to be tried within a few days. An entire carload of peaches is to be dispatched to Europe from the Yakima country, and in this shipment only the finest selected Elbertas will be used. While the regulation boxes will be used, the layers of fruit will be separated by a cushion of wood fibre as a protection against rough handling and possible damage. If this trial shipment proves a success, it is probable that an extensive business in peaches will be developed by Pacific Northwest fruit exchanges. It is likely that the opening of the Panama Canal will result in increased movement of the softer varieties of fruit, as they can then be shipped direct with a consequent saving in time.

The value of a paper's advertising is gauged by the number of people it reaches. No other paper reaches more than a quarter as many Cottage Grove people as does The Sentinel.
