Nickels and Dimes Go to Destitute.

Close to the ticket window in the depot is a glass globe which bears above it the legend, "For the Albertina Kerr Home." This globe was placed there by the Women's Bible Class of the Baptist church of this city, though the home itself is entirely nonsectarian, and the nickels and dimes which are slipped into it eventually find their way to Portland where the home is located and go to help take care of the babies of abandoned and destitute mothers. The home is maintained by the Pacific Coast Rescue and Protective Society, a purely nonsectarian organization for the betterment of men, women and children on the coast. The Albertina Kerr home is but one of the institutions through which it does public good and all five of its branches are entirely supported by voluntary contributions.

Seeds Sent School Children.

Five hundred packages—one hundred and twenty-five pounds—of garden seeds have been sent out to the rural schools of the county from County Superintendent Moore's office. The seeds were procured from the government by Senator Harry Lane and sent to Mr. Moore for the children. Each of the packages contains muskmelon, onion, turnip, sweet corn, carrot and lettuce seeds.

The pupils in some of the rural districts, though very anxious to make gardens, have been prevented in some cases by the cost of the seed and the sending of these seeds by Senator Lane solves the problem for them.

Great Northern Issues Oregon Booklet.

In order to reach those who are most interested in the west and most likely to become settlers, the Great Northern Railway Co. is requesting through its immigration agent, E. C. Leedy of St. Paul, that Oregon people send in names of eastern friends who might be influenced. The railway company has just had printed 200,000 descriptive booklets which they will distribute to these people and will issue a series of about 500,000 which will be sent out from time to time to the addresses furnished.

The Sentinel—A Live Wire.

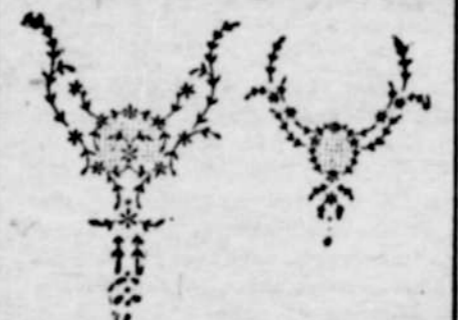

Fitzhenry Says Job Is His.
Extreme optimism is felt by N. L. Fitzhenry, candidate for county commissioner, one of the numerous candidates who were in the city Saturday. According to his statement the fight for commissioner is all over but the shouting. In an interview, he said: "All indications point to a big vote for me from all parts of Lane County. I would not be satisfied with the nomination by a light majority, but I anticipate the voters of Lane County will put the stamp of approval on my good roads policies by giving me a handsome vote. I believe they are convinced that I have made a conscientious study of our highway problem and that if elected will give them the best and all there is in me for a thorough business administration. If the people want to continue in the old rut of haphazard, makeshift road building, they had better vote for some one else."

work. Explicit directions for working are given with the pattern.

When making solid or satin stitch pad by darning backward and forward lengthwise, then cover closely with over and over stitching, working in the opposite direction from the padding. To make daisy petals and leaves as eyelets run a thread around the outline, cut a slight slit lengthwise, then crosswise, push the material back and work closely over and over. To make the centers of the daisies as eyelets first encircle by running a thread around the outline, then pierce with a stiletto and work closely over and over. To outline the stems take short stitches, keeping the needle toward the right, and work upward. Outline the slits by running a thread closely around, then cut a slit in the goods and work closely over and over.

This May Manton pattern can be had by sending 10 cents to this office, giving number, and it will be promptly forwarded to you by mail. If in haste send an additional two cent stamp for letter postage. When ordering use coupon.

New Bottle Stopper.

There is a new bottle stopper which is ideal. It could not be described as an automatic cork, and yet it almost amounts to this. There is a cork, or rather stopper, arrangement of nickel that has a rubber socket cap. This caps down over the mouth of the bottle from which the original cork has been removed. The stopper fits firmly, for the reason its supporting mechanism is fitted to the neck of the bottle by means of an easily adjusted collar that will fit any size bottle. By pressing a lever at the side the stopper is instantly released.

HOT LUNCHES SUCCESSFUL IN RURAL SCHOOL

Hot lunches for rural schools have been proven a highly practical innovation by the Dexter school near Eugene. There are twenty-two pupils in this school and the girls take turn each day, two at a time, in preparing the lunch. They are excused from their classes at 11:30 and go to the kitchen, which has been built into the school house, cook the meal and set the table in the dining room, also specially built, and have the lunch ready for all the pupils at twelve.

Supervisor A. L. O'Reilly was greatly surprised, when he paid the district an unannounced visit a few days ago, to find a luncheon of bean soup, potato salad, baked potatoes, green beans, apple sauce, blackberries, cake and bread set before him by the youthful cooks. The teacher, Miss Blanche Brerton, some time ago, attended a lecture given by Mrs. Mary Hartung at the Springfield high school in which Mrs. Hartung outlined a plan for serving hot lunches in the rural schools. She determined to put the information into use and the lunches now being served at Dexter are the result. The system works excellently, the girls more than enjoy their work and the entire school has the benefit of a good, fresh, wholesome meal. The expense incurred in serving these lunches is very small and nothing is charged to the children by the district for them.

State Superintendent Churchill is interested in the hot lunch plan and is making an investigation of the Dexter school with a view to recommending the establishment of the system in other rural schools in the state.
