Things We Think
Things others think, and what we think of the things others think.

One great trouble with churches is a lack of hims.

Some people get to be grouches from talking to themselves.

Your guess that was all wrong yesterday may be all right today.

There are some things anyone can make—noise, for instance.

The man who is always suspicious attracts suspicion.

Too many advertisers are like the hen—they only cackle when business is good.

Moments of success are never so precious as when you look back on them from failure.

Salt water is good for the skin, and best when it comes in the form of perspiration.

Men and women do not use so many superlatives after they have been married a year.

The fast young man is the one who finds it hardest to keep up with his running expenses.

Realization of some of our fondest hopes is the only way in which we can learn how vain they are.

Try to emulate the rose, which withers and dies only to leave seed for many more just as beautiful.

Why not advocate the disarmament of private citizens. It would save much needless bloodshed.

It is about time to resolve to keep the good resolutions you are going to make the first of the year.

Bandits held up a summer resort hotel a short time ago. There is no honor among thieves.

Sunshine is the great purifier. The sunshiny face always looks sweet and pure.

No matter how small the home, there is always a big place for father to fill in the evenings.

The hog is one of our ultimate consumers that doesn't worry about his lot.

The man who does not leave some unrealized ambitions behind when he dies has not really lived.

The price of dreadnaughts has been reduced \$100 a ton. Pretty soon every baby will have one for a trinket.

Woman should not appear to be what she really is. She is not nearly so pleasing to the eye of man in closely-fitting skirts as she is in the fuller kind.

Three hundred set speeches were delivered in the last session of congress. We presume this means that they were set up in type for the Congressional Record.

Lillian Russell says most actresses owe much to their dressmakers. In that case the actresses should give credit to the dressmakers, instead of vice versa.

Geographers will soon have to make a startling change in their maps of the western hemisphere. It is said that the completion of the Panama canal will bring the west coast of South America several thousand miles nearer to New York.

A New York professor says many women spend 60 per cent of their time trying to make themselves attractive. He might have added that the other 40 per cent they spend in allowing men like the Prof. to admire them.

Don't brag of success. It is at best but an uncertainty—and those you are crowing over today may be cackling over your carcass on the morrow.

Saving a Drowning Person.
In trying to save any one who may be drowning a swimmer should never approach the victim in front, as a drowning man will clutch at a straw, and he will grab the would be rescuer and drown both, but the swimmer should dive under him and seize him from behind. Should he struggle, the rescuer has to be cruel only to be kind, so he should strike him between the eyes, stun him and tow him ashore. A drowning man always comes to the surface twice before he drowns, because it takes about that time for water to fill the lungs, and that forces the air out. As long as any air remains in the lungs the body will float.—Philadelphia Ledger.

An Urgeal.
"You never tell funny stories?"
"Never. When you tell a funny story it's always painful to watch the other fellow trying to conceal his impatience for you to get through and let him tell one."—Washington Star.

**IMPERIAL COUPLE
SHOT BY STUDENT**

Archduke Francis Ferdinand and Wife of Austria Victims of Assassins.

Serajevo, Bosnia.—Archduke Francis Ferdinand, heir to the throne of Austria-Hungary, and the Princess of Hohenberg, his morganatic wife, were shot dead by a student in the main street of the Bosnian capital a short time after they had escaped death from a bomb hurled at the royal auto.

The archduke was struck full in the face and the princess was shot through the abdomen and throat. They died a few minutes after reaching the palace, to which they were hurried with all speed.

Those responsible for the deed took care that it should be effective, as there were two assaults, the first with a bomb and the second with a revolver. The bomb was thrown at the royal automobile as it was proceeding to the town hall, where a reception was to be held. The archduke saw the missile hurtling through the air and warded it off with his arm. It fell outside the car and exploded, slightly wounding two aides-de-camp in a second car and half a dozen spectators.

It was on the return of the procession that the tragedy was added to the long list of those that have darkened the pages of the recent history of the Hapsburgs. As the royal machine reached a prominent point in the route to the palace an eighth-grade student, Gavrilo Princip, sprang out of the crowd and poured a deadly fusillade of bullets from an automatic pistol at the archduke and princess.

T. R. HEEDS DOCTOR'S ORDER
Physician Says Effects of Malaria May Be Permanent.

Oyster Bay, N. Y.—After hearing his physician's decree that he must either take a prolonged rest or incur the danger of permanent ill health, Theodore Roosevelt made plans to conduct the fall campaign, so far as possible, from Sagamore Hill.

Colonel Roosevelt is said to be suffering chiefly from the effects of malaria, contracted in South America. The physician said if he did not shake this off he might never recover his full strength.

Soft-Shell Crab Made Chemically.

Seattle, Wash.—During the past year I have succeeded in creating a live soft-shell crab and a live fish from chemicals," Dr. Charles W. Littlefield, of this city, said, when asked about his statement to this effect at the New Thought convention in Portland. "Previous to that I had created reptilian forms of life."

**AGUAS CALIENTES
GARRISON EVACUATES**

Zacatecas.—Aguas Calientes, capital of the state of the same name, has been evacuated by the federales, according to information reaching Villa's headquarters. Owing to this, his plan of campaign has been changed and the troops of the division are returning to Torreon.

Late reports show that the losses of the federales were much greater than at first supposed. While final figures have not been obtained, it is known that the number of prisoners taken by Villa's troops exceeded 4500. The number of killed was at least close to that figure. Nearly 2000 wounded federales are being cared for by the rebel hospital corps.

The latest casualty reports of the rebels were more than 700 dead and about 1100 wounded. These figures are not complete. Many of Villa's brigades maintain their special sanitary service and while reports have been made by them none are thought to be complete.

Girls Told Not to Spoon.

Chicago.—"Spoonng" is a crime against womanhood," John J. Alexander, a director, told 500 young women attending the older girls' conference of the international Sunday school convention. "Pass the word along to girls who love to 'spoon' that it is the most degrading thing they can do—one of the most degrading things they may permit.

"Make the boys clean-minded and wholesome by the way you dress. Young men take a girl at her own valuation."

Plague Case Found in New Orleans.

New Orleans.—Health officers announced that a case of bubonic plague had been discovered in New Orleans. Charles Lundene, a Swede, 49 years old, who has been in the city 11 days, is the victim.

Ten Die From Heat in St. Louis.

St. Louis.—Ten deaths from the excessive heat in 24 hours and 20 prostrations was the record here.

**NEWS FROM OUR
NATIONAL CAPITAL**

Japan's Protests Against California Alien Land Laws Is Absorbing Topic.

Washington.—Japan's protests against the California alien land law, brought conspicuously before the public again by publication of the correspondence between the Washington and Tokio governments, was discussed with absorbing interest in official and diplomatic circles.

One phase of the negotiations disclosed in the correspondence which attracted particular interest in official circles was said to suggest the possibility of an issue entirely new in the history of the United States. In Italics in connection with the promise by the Japanese government to grant land ownership to Americans, appeared the words, "reserving for the future, however, the right of maintaining the condition of reciprocity with respect to the separate states."

This, it was pointed out, appeared to be a distinct reservation by the Japanese government of the right to retaliate directly upon the Californians by singling them out among American citizens for exclusion from the right to possess real property in Japan.

May Rush Railroad Land Survey.

Surveying lands embraced within railroad grants will be pushed rapidly if the senate sustains an appropriation of \$100,000 made by the house.

The western members, with Secretary Lane, want to make sufficient appropriations each year to carry the work to a speedy termination. It was pointed out to the house that as long as the railroad lands remained un-

veyed they were virtually the property of the railroads, while title could not pass and the lands could not be taxed.

There is a demand in most of the western states to have the railroad lands surveyed so that they can be taxed by the states and made to bear their proportion of the cost of local government.

Senate Secrets Get Out.

Stirred to action by the apparent freedom with which the proceedings of the foreign relations committee in consideration of the Nicaraguan and Colombian treaties have been published from day to day, several senators agreed on a resolution asking for authority to subpoena senators and Washington correspondents to an inquiry to determine how the proceedings of the committee—which are supposed to be especially secret—get out.

Evidence that not all senators entirely approve the idea that the committee's proceedings shall be secret was given by Senator Norris, who is not a member of the foreign relations committee. He offered a resolution that all senators be furnished with copies of the daily testimony before the committee on the treaties, that senators who were to vote on the matter should have the benefit of it.

House Insists on Mileage Cut.

Amid a maze of parliamentary tangles that kept members guessing, the house sent back to conference the question of mileage of representatives in congress.

The body voted in favor of 5 cents a mile each way for senators, and the defeat, 184 to 59, of a motion to recede from disagreement to the senate proposition of continuing the present 20 cents a mile, sent the whole question back to be threshed out again by the conferees.

National Capital Brevities.

Despite the opposition of Turkey the house agreed to the senate amendment providing for the sale of the

battleships Idaho and Mississippi to the United States supreme court ruled that retail lumber dealers who black-list wholesalers for selling direct to the consumer violate the Sherman anti-trust act.

The interstate commerce commission suspended until January 10, proposed increased rates on melons from California to Oregon and Washington. Railroads are not liable for damages for personal injuries to interstate employees or their families who are hurt while riding on passes, according to a ruling of the United States supreme court.

It has been proposed to President Wilson that the name Culebra cut in the Panama canal be changed to the Gaillard cut in honor of the late United States engineer, who harnessed the mountain at that point.

For fear that the interests of the fall campaign would be affected, house leaders have decided not to force a vote now on the proposed Hobson amendment providing for nation-wide prohibition.

The new federal reserve banking system will not get in operation until some weeks hence, it is thought, as result of the delay of the senate in confirming the president's nominees on the board. The bank was to start August 1.

Give Baby a Drink.

Many mothers never think of giving baby a drink of water. Often when it frets and whines it is just thirsty. If food is given every time there is restlessness the little stomach becomes overloaded and great discomfort follows. Milk is a food, not merely a drink.

Canary Archipelago.

The Canary archipelago, a Spanish possession lying about 3,000 miles east of St. Augustine, Fla., consists of thirteen islands having a total area of 2,700 square miles and a population of about 400,000.
