

Society

Mrs. Lora Robinson of Dorena and William Henry Hubbard of Aberdeen, Wash., were married in Eugene Wednesday, July 1, Justice of the Peace J. G. Wells officiating.

A number of the younger girls met one afternoon last week at the home of Mrs. Mary Smith and organized a sewing club which they named "Busy Bee Club." They plan to meet every two weeks on Tuesday afternoon at 2:30. The officers elected were: Rouanna Armstrong, president; Clara Milne, vice-president; Ruth Bede, secretary; Eva Hartung, treasurer. At the next meeting the club will be entertained by Helen Rudolph.

A large number of women gathered Friday afternoon at the Spencer Grove, near the home of Mrs. E. R. Spencer, at the invitation of Mrs. W. H. Abrams, Mrs. Herbert Eakin, Mrs. George Hall, Mrs. C. C. Cruson, Mrs. George Kerr, Mrs. B. Lureh, Mrs. J. S. Medley, Mrs. H. A. Miller, Mrs. C. H. Vandenburg, Mrs. E. R. Spencer and Miss Esther Sibley. The entertainment took the form of an old time Fourth of July celebration in travesty and carried out every number of the usual program in parody. There was a parade of surprising and stunning floats with a regulation marshal of the day, a baby parade, etc. Speeches, including one by the temporary mayor in the person of Mrs. J. H. Chambers, races, singing and a comb-and-tissue-paper-band were among the other "fixin's" that made up the celebration. At a typical Fourth of July "stand" the hostesses cried their wares and dispensed copious quantities of pink lemonade, peanuts, ice cream cones and cracker-jack.

A Fourth of July picnic was held at the John Cooley place under the famous chestnut trees. Those who participated were John and Alex Cooley, Mr. and Mrs. J. C. Porter, Mr. and Mrs. C. F. Cooley, Virgil White and family, Curran Cooley and family, Robt. Shields and family, the latter being of Davenport, Wash.

CHURCH NEWS

[Every religious organization is invited to use this column for announcement of its services and other news. Contributors are requested to omit exhortations and other editorial matter, and to make the announcement of services as concise as possible. Social functions, etc., and news outside of the weekly announcement may be elaborated upon.]

Services at the Christian Science Hall every Sunday at 11, and Wednesday evening at 7:30. All are welcome.

FREE METHODIST.

Rhoda Burnett, Pastor. Preaching service the first and third Sundays of every month at 3 and 7:30. Prayer meeting every Wednesday at 7:30, and on second and fourth Sundays at 3.

ST. MARY'S CATHOLIC CHURCH. Next Sunday: High mass and sermon at 10:30; devotions and benediction at 7:30. All welcome.

BAPTIST CHURCH

A. M. Williams, Minister. Preaching services morning and evening second, fourth and fifth Sundays of every month. Bible study and prayer meeting every Thursday evening, present study, "Jesus Is Coming." Sunday school at 10. Next Sunday, sermon topic, "The Priest and His Robes," evening subject, "The Relation of Man To God."

CHRISTIAN CHURCH

J. W. Jenkins, supply pastor. Services: Bible school at 10; preaching services at 8; prayer meeting each Thursday at 8. Quarterly business meeting of the church Friday evening. Subject of morning sermon, "Jesus as a Man of Prayer"; evening subject "Why Should I Be a Christian?" All are cordially invited to attend these services.

METHODIST EPISCOPAL

Horace N. Aldrich, Pastor. Services next Sunday as follows: Sunday School at 10; sermon at 11; Junior League at 3; Epworth League at 7; evening service at 8. Morning theme, "A Normal Type of Life"; evening subject, "Hearing and Earing," an illustrated sermon. Thirty-five slides will be used, including the illustration of the hymn, "Abide With Me." Epworth League topic, "Loyalty Fundamental to Noble Character," leader, Miss Nancy Whitsett.

A live wire newspaper—The Cottage Grove Sentinel.

CELEBRATION AT LORANE IS BIG AFFAIR

Speakers, Base Ball Team and Many Others Attend from Cottage Grove.

Lorane, Ore., July 4.—Five hundred people from all over the western part of Lane county celebrated the Fourth of July at Lorane today, and it was a happy and good natured crowd. Safety and sanity marked the observance of the day, although small fire-crackers were largely in evidence. Addresses were made by Colonel Lochwitzky, who appeared at the Cottage Grove chalet, the Reverend Mr. Aldrich, and Judge Shinn, of Cottage Grove.

The athletic events of the day included horse races, foot races, and other athletic features and a baseball game between Lorane and Cottage Grove. At noon a dinner was served to the visitors by the people of Lorane. The meal was spread on a table over 200 feet long, and the entire crowd was fed in a short space of time. An especially large number of the visitors were from Cottage Grove, as Cottage Grove had given up her celebration to attend the one here. Music was furnished by the Creswell band.

The festivities of the day were concluded with a dance held this evening at the Grange Hall.

VANITY'S VAGARIES.

Sport coats have broad, soft collars. Shirring seems to be popular. For hair ornaments peacock feathers are worn. Batterflies are worn on evening gowns and on hats. The high Henry II. and renaissance collars of lace or mousseline appear on all classes of costumes. Taffeta and crape dresses are trimmed with collars and cuffs of ecru batiste, embroidered. Sealing wax red is a new shade. Handkerchief linen blouses are made in colors—green, rose, pink, maize. Some have white organdie frillings. The silk petticoats with yokes are new. Coat buttons are of metal, bone or wood. Sleeves grow less and less and very sheer.

BUYING A REFRIGERATOR.

The Selection Should Be Based on Common Sense.

The summer refrigerator or ice chest is the most important item of the kitchen outfit. A refrigerator should not be kept in the cellar. If there is no other place for it the cellar must be very dry, the floor level and a place found near a window so that light and air will be at hand.

A shed or outer kitchen is the best place for a refrigerator. Here it is within convenient reach and well ventilated.

Select an oak or white pine exterior. These are more durable than ash, and oak is superior to any casing unless one feels like providing real white porcelain.

It is possible to buy a good sized oak refrigerator from \$15 upward which contains a separate ice chamber within convenient reach. Some models have the ice chamber at the top reached by a lid, so that it is necessary for the average woman to stand on tiptoe to look inside and remove the interior support for cleansing purposes.

With such an arrangement it is often necessary to remove the entire interior arrangement to get at the drain, and anything so awkward and complicated must be avoided, even if its care is not to be intrusted to the maid. In such a case the old fashioned ice chest is easier to handle, but the advantage of the ice chest is that while cheaper it is all practically one compartment, whereas the up to date refrigerator has its chambers all separate, with a well regulated system of cold air drafts reaching down from the ice chamber and outside air currents passing behind the side walls to give proper circulation.

DON'TS.

Don't stoop to anything that degrades a man. If you do you rue. Don't think money is all of life. While money in life has its part, it cannot take the place of heart. Don't forget Mother Hen's comfort. She can't take good care of the chicks if you take poor care of her.

Horse Dentists.

Horse dentists do a lucrative business in New Zealand by traveling from district to district in the country and examining teams of horses and treating them if necessary.

The Other Side.

"I tell you, being married is mighty expensive." "True, but it's absolute economy compared with being engaged."

NEW ART FABRICS

They Make Striking and Attractive Summer Draperies.

NOVEL COLOR SCHEMES USED

Black and White Designs Carried Out in Geometrical Patterns So Fine They Look as if Etched—Novel and Attractive Gift Boxes.

Cretonne is a fabric we could ill do without in these days of brown bungalows and black furnishings. It gives the note of brightness and airiness to the somber and simple interior.

The importance of these fabrics in our furnishing scheme is due to the popularity of the rattan, reed, willow and wood sets with which we are adorning the summer porch and furnishing the summer home. Custom calls for cushions on the airy chairs and settees, and what material so useful as gay cretonne, which may be easily cleaned when soiled?

Seldom have these materials attracted so much attention as this season. They come in a wide range of colors and designs, but the fad is for the new art patterns, for which we have the German and Viennese schools to thank.

Black and white, dark blue and white and dark green and white are favored by the artists to whom the creation of the color schemes and patterns of these fabrics is an important matter. Each minute part is worked out with infinite care. The designs on some of these stuffs are as fine as though they had been etched there.

Flowers in their natural forms or in conventionalized shapes are the favorite motifs. Quilt uses are also made of birds and animals. One of the most remarkable of these fabrics is adorned with a forest scene in which deer, foxes, birds, etc., are cleverly intermingled. With such art are these interesting animals arranged that at a distance it looks like a Persian pattern.

Striped and square patterns are favored in these fabrics, which are carried out in geometrical lines, even when nature subjects are used for the backgrounds.

Not only is furniture for the summer upholstered with such art materials, but the fabrics are used for hangings, couch and table covers and for porch or hammock pillow covers.

They are useful for creating the many fancy articles which are usually fashioned with cretonne, their novelty making them especially popular.

In Paris the large dressmaking houses are giving away boxes covered with new art fabrics and handsomely lined.

FANCY GIFT BOXES.

The boxes hold gifts and may be used for the accessories of the toilet, such as neckwear, corsage bouquets, necklaces, etc. Some of them are large enough to be used as hat boxes.

Cretonne sets are useful for the table. They are easily made, and if the cretonne is of a cool pattern in blue or one of yellow and the centerpiece of yellow or blue flowers to match a most attractive result will be obtained. Mark the plate size with the largest dinner plate and either crochet an edge to these or apply one of Irish crochet that can be bought for very little a yard at any of the shops.

Most attractive breakfast sets could be made of cretonne with a crocheted edge. The different sizes wanted are cut out of the cretonne. The edge is slightly rolled and worked with double crochet. Any desired edge of simple construction can be added.

Any particular color scheme can readily be carried out in these mats, and a simple crochet scallop would be a sufficient finish.

These cretonne sets are not only nice for breakfast use, but they are very appropriate for summer and seaside cottages. If one would not care to crochet, a buttonholed scallop done in colored mercerized floss or a narrow braid could be used as a finish for the edge.

Every girl enjoys having dainty boxes in which to keep her belongings, and the handy needlewoman can easily make the chintz and cretonne covered boxes not only for herself, but as gifts for her less ingenious friend. Boxes of this kind can be made any size or shape, although the oblong ones are more easily constructed.

THE DAIRYMAN.

The cow is a beautiful machine, but the engineer must be on his job to get proper results and satisfaction.

In the morning before they go to pasture give the cows a good feeding of hay.

Full feeding must be practiced now if paying results are to be expected during the summer.

A herd of sleek cows on a green meadow is a picture calculated to stir the heart of the most unimaginative.

Warm cream should never be mixed with cold.

If the churn is likely to remain idle for some time keep it filled with lime water.

Cow testing proves that many cows considered the highest are really the lowest.

HALTER PULLING COLT.

Loin Tie Recommended as a Cure For This Bad Habit.

Halter pulling is a very aggravating habit, easily acquired and often practically impossible to overcome, says M. W. Harner, New York Agricultural college, in the American Agriculturist. Many hitches have been suggested, of which the loin tie is as efficient as any. This can be made from a half inch rope about fifteen feet long. Tie a stationary loop in one end and place about the horse's body just in front of the hips with the loop under the abdomen. Now run the free end through the loop, then forward between the front legs, up through the ring at the halter, then around a post and back and tie into the ring at the halter.

With this device, as the horse pulls, pressure is brought about the body, which usually causes him to bound forward and stand close to the post. In case of the confirmed halter puller some horsemen excite the animal to pull on this device, thus causing pain about the body. In the hope that the horse will remember the pain and not try again. It frequently happens that the halter puller gives little trouble when tied with a weight.

GOOD BLOOD TELLS.

Experience of a Sheep Breeder With a Pure Bred Ram.

Most every agricultural lecturer on live stock topics tells the farmers who hear him that the male is half the flock, says the Iowa Homestead. A German sheep breeder tested out this statement a few years ago and proved that with sheep at least the ram may be the making of the flock.

The shepherd purchased four ewes from a Wyoming range. At the time of the purchase it was almost impossible to determine the breed of the sheep because they were so scrubby and so much run down. Nothing was known to their parentage, but it was very apparent from their appearance that they were the scrubbiest of the scrubby.

He mated these four ewes with a ram of very high character. He was unusually vigorous, a pure bred and with breeding of the very highest quality. The first crop of lambs told the story. Seven were born to the four ewes, and all of them resembled the ram. Of course, they were not pure bred and were not perfect in all respects, but they were so far in advance of their mothers that you would scarcely recognize any relationship.

Not only were these lambs of high quality, according to the judgment of the shepherd, but they proved to be

Lincoln sheep are the largest of the various breeds. They thrive on good pasture, but are not adapted to rough and hilly lands. When crossed on ordinary ewes they get big, strong lambs that graze well and feed out quickly and economically. Rams of this breed sometimes attain a weight of nearly 600 pounds, and they produce a heavy fleece of good long wool. The sheep shown is a typical Lincoln of pure blood.

all he thought when he took one of them to the international live stock exposition the following winter. In a class containing thirty-eight lambs of various breeding one of these took second prize.

In selecting a ram of any mutton breeds, you naturally look for a well built body. More important than this is the vigor. The ram should have a bright eye, a fearless expression and a masculine appearance throughout. His body should be blocky, because it is the blocky body that produces the most meat. In fact, he should be nearest the ideal type of mutton sheep it is possible to secure, with the addition of unusual vigor and constitution.

A ram with a narrow heart girth should not be used in a flock under any conditions. Narrowness just back of the fore legs indicates lack of constitution, which is almost sure to have a downward tendency in the flock. Just remember that in the same way a good ram can bring up a flock, a poor ram will pull down the standard just as rapidly.

Special Dress Goods Sale!

This Ideal Summer Frock Can Be Made at Home for \$2.63

The triple tunic is ideal for the sweet summer frock that requires only the color and an edging of lace to complete a dress suitable for lawn fetes, Sunday services and summer holiday occasions.

As illustrated the triple tunic skirt and tucked lace trimmed blouse require 5 yards of 30 inch dimité at 14c a yd., 3/4 yard 18 inch net at 45c a yard, 3/4 yard ribbon for belt at 30c a yard, and 8 1/2 yards of lace at 10c a yard.

The above figures include everything necessary for making size 36, and the two McCall patterns Nos. 6035-6037.

The well cut lines of this pattern eliminate the trouble of fitting, the home dress maker has only to select the size of pattern and sew the seams according to simple directions on the pattern envelope.
