**NONE ARE SO BLIND AS THEY WHO REFUSE TO SEE!**

"Because one billion people in this world say that a thing is a lie, and but one person claims it is the truth, it does not follow that the billion are right."

Hundreds of years ago Galileo claimed that the world was round and revolved. A billion called him a maniac. Near the middle of the last century Morse said that it would be possible to send messages over a wire by means of electricity. A billion called him a fraud. Bell in our own time said that soon the sound of the human voice could be transmitted from New York to San Francisco, and Bell was branded a dreamer. Marconi's prediction that a telegraphic message could be flashed over the trackless miles of sea separating Japan from San Francisco without wires was hailed as the joke of the century. Those who talked of cars, automobiles and radio roads and electric traction were smiled at.

Who was right and sane, the billion or the one man?

Although the cataphoric treatment is being extensively used in Europe and throughout the East in the treatment of chronic, difficult and long standing cases, it has never before been introduced in the West. You can not afford to overlook this opportunity to get well.

Tennyson and Shakespeare.

Tennyson loved Shakespeare. The last thing the dying author did was to call for a copy of Shakespeare and read "Cymbeline." "I looked at the book at midnight," wrote his son "when I was sitting by him lying dead, and found he had opened on one of the passages which he called the tenderest in Shakespeare. We could not part with this volume, but buried a Shakespeare with him. We had the book inclosed in a metal box and laid by his side."

**Real Sorrow.**

Arthur Bourchier, the actor, was once discussing stage emotion with a friend.

"Many of our emotional actresses shed real tears on the stage," said his friend.

"Yes," Mr. Bourchier agreed, "especially if they happen to have their own money in the production!"—London Globe.

Three of the members represent the general public, three the employers and three organized labor.

 Hood River.—An especial effort will be made by State Game Warden Evans, who has been here conferring with State Game and Fish Commissioner Duncan, to protect the China pheasants of the valley.

Forest rangers on the Umatilla forest are engaged in erecting a 65-foot "fire tower" on the top of Lookout mountain, one of the highest peaks in the forest. Owing to the fact that only the raw material to be found in the forest was available for building the tower, its construction was a difficult task. It is nearing completion, however, and will be equipped with a powerful glass and "fire finder." A man will be on duty constantly and with the aid of the equipment at his command will be able to locate every fire within a radius of 75 miles, almost as soon as it is started.

# Individuality!

## Distinctiveness!

The man who attracts attention in this old world is the one who is different from the ordinary run of mankind; the man with individuality---with a personality peculiarly his own. It is the same with job printing---to attract attention it must have individuality---distinctiveness---personality---it must be The Sentinel kind.

**Got it in the Bill.**

"There was a rare spectacle in South Kensington the other night---that of a plumber at a loss how to enter a certain item in a bill to a customer," says the London Mail. "The plumber had been called in to locate the source of an unfortunate odor. He promptly hauled the house about, but he failed to find a dead rat or anything else to cause the trouble. Then he put the place together again and departed to build the bill. For what could he charge? He had discovered nothing, achieved nothing, yet a charge must be made. This is the bill received by the householder: 'To looking for smell, eightpence.'"

It is the common opinion of the average person contemplating building that he must use wallpaper, because of the prevailing idea that it is cheaper. We will prove to you that plastering is cheaper than wallpaper, besides being more sanitary, more attractive, warmer in winter and cooler in summer.

There are many other reasons which we shall be glad to take up in detail with you. Let us talk it over.
