## Stories of What Grove Country Is Doing Are Wanted

The Sentinel is at all times anxious to get stories of actual production showing profits that can be made on farm products in the Cottage Grove country. Farmers who know the profit that they have made on a field of grain, or a field of hay, a patch of potatoes, a crop of vegetables, from a flock of chickens or ducks, from a litter of pigs, or from anything else raised or grown on a farm, are invited to submit their figures to The Sentinel for publication. It is to the interest of the farmers themselves to do this, for several thousand copies of The Sentinel go east every year and already the stories of actual production published in The Sentinel have brought a number of families here. While stories of unusual production are solicited, the stories of average annual production are the better, as they show the new-comer what he may hope to do every year.  
Farmers do not need to write the story if they do not wish to do so. If they will submit the figures, The Sentinel will put them in proper shape for publication.
