GOOD BACKS FOR BAD.

Cottage Grove Residents Are Learning How to Exchange the Old Back for a Stronger One.

Does your back ache, feel weak and painful? Do you suffer headaches, languor and depression?

Is the urine discolored, passages irregular?

The kidneys may be calling for help. Weak kidneys cannot do their work. Give them the help they need.

To cure kidney backache you must cure the kidneys.

Use a tested and proven kidney.

Doan's Kidney Pills have stood the test.

Convincing proof of merit in the following endorsement:

G. M. Jones, Roseburg, Ore., says: "I suffered greatly from pains and stiffness in my back and other annoying kidney ailments. I used Doan's Kidney Pills and found them to be just what I needed. Now my health is good."

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Jones had. Foster-Milburn Co., Props., Buffalo, N. Y.

A Medicine Chest for 25c.

In this chest you have an excellent remedy for Toothache, Bruises, Sprains, Stiff Neck, Backache, Neuralgia, Rheumatism and for most emergencies. One 25c bottle of Sloan's Liniment does it all—this because these ailments are symptoms, not diseases, and are caused by congestion and inflammation. If you doubt, ask those who use Sloan's Liniment, or better still, buy a 25c bottle and prove it. All Druggists.

It's surprising how much news The Sentinel gets when there are so many who know news that they do not tell.

Who Defended the Works?

By F. A. MITCHEL.

When the Germans were besieging Paris in 1871 one part of the force came to the very outskirts of the city and encountered a portion of the defenses, something like a revolutionary barricade blocking a street. There was only room for a single company, and its captain before making an attack stood off and, raising a pair of binoculars, examined the works.

They were composed of paving stones, pieces of timber and such other articles as had been brought together for an improvised fortification. But the captain could not see a single man on the parapet. This he did not like. There was the look of a trap about it. If he moved his troops forward he must do so over a distance of some 500 or 600 yards between two walls not thirty feet apart and straight as an arrow. He could not deploy his men by the flank, and as for scattering along the street they would be one behind another, and a shot would bring down every man in line.

Moreover, the captain noticed a dark spot in the works, which indicated that a single stone had been removed in the very center of the fortification. He assumed at once that the aperture was for the muzzle of a cannon, which would sweep the street, doubtless, with the scattering projectiles of the period. That meant that before a force of eighty men—the number under the captain's command—could reach the barricade a large proportion of them would be killed or wounded.

The captain called his first lieutenant, handed him his glass, directed him to take a look at the breastworks and then asked him what he thought about an attempt to carry them. The lieutenant examined the works, then, lowering his glass, remarked:

"What are the orders, captain?"

"The orders are to move forward."

"Then we must move forward, but those who live will have moved backward."

The captain's only response was an order to advance.

Shoulder to shoulder, the men marched on—for, as has been said, they could not scatter—till about a third of the distance had been traversed. Then a puff of smoke issued from the dark spot in the center of the works, and a storm of missiles broke upon the advancing line of Germans. A third of the company fell, and another dozen limped or staggered to the rear.

The rest pressed on, but a few minutes were lost in reforming, or, rather, closing, the gaps that had been made. With steady step they marched till they had covered half the distance between their starting point and the fort. There was light where the dark spot had been, and they knew that the piece had been retired to be reloaded. This gave them courage. It was an old-fashioned muzzle loader, and time must be spent after every discharge in reloading. The captain gave the order to double quick, but before they had covered a dozen yards there came another hailstorm, and another twenty men were put out of the fight.

This was terrible slaughter, and the force recoiled. Some stood ready to retrace their steps; others started back. The second lieutenant stood in rear and, striking some of the fugitives with his sword, drove them back toward the enemy. The captain was among the wounded and lay in a pool of his own blood. The first lieutenant cried at the top of his voice "Forward, men!" and started at the head of some thirty soldiers to make the rest of the distance and storm the fort, though the move was now a forlorn hope, for he expected that on reaching it he would find it defended by double the number of those who were making the attack.

When within fifty yards of the barricade there came another storm of missiles. Half the Germans were laid on the stones of the street, while the other half broke and fled. The lieutenant called to them in vain. Preferring death to following them in flight, he turned and ran forward to the fort, expecting every moment to be shot down. He reached the barricade and, with a pistol in one hand, his sword in the other, climbed to the summit. There he stood, bewildered by the sight that met his view.

Not a man was behind the stones. The gun which the recoil from the last shot had driven backward a few feet was there, a thin film of smoke issuing from its vent. Leaning against it was a girl about twenty years old. She looked up at the lieutenant as though expecting instant death. Involuntarily he uncovered.

"Mademoiselle," he stammered in broken French, "where are the men who have been defending this barricade?"

"I have been defending this barricade, monsieur," was the reply.

"You—alone?"

"I—alone. Through a blunder the force that was to have held this work was ordered elsewhere."

"Moin Gott! Has a whole company been driven back by a—girl?"

At this moment a company of French soldiers came around a corner at double quick. The lieutenant succeeded in making good a retreat, hearing cheers behind him:

"Vive mademoiselle!"

Having joined his commander, he led them again to the attack and finally captured the barricade. He looked for the girl who had defended it alone, but she was not there.

FOR YOUNG FOLKS

Proud Moment For a Boy on the Dreadnought Wyoming.

ASTRIDE A BIG WAR GUN.

Master Samuels Is Photographed With One of Uncle Sam's Jack Tars—Game of Telegrams Is Fun—Many Things to Interest Children.

Recently Uncle Sam's fleet of warships that guard the Atlantic coast steamed into New York harbor. It was composed of super-Dreadnoughts, Dreadnoughts, battleships, destroyers, torpedo boats, submarines and many other vessels that go to make up a powerful fleet of sea fighters. The

Photo by American Press Association. WINSTON A. W. SAMUELS.

Wyoming, a Dreadnought, was the flagship of Admiral Fletcher, who is in supreme command of all the ships. When the ships came to anchor in the Hudson river they were visited by thousands of persons, old and young, who were anxious to see what a warship looked like. Among the visitors was Master Winston A. W. Samuels, who recently traveled from England all alone. While on board one of the sailors lifted Winston on to one of the big guns and then the photographer snapped them both as well as the muzzle of the huge gun. Winston looks highly pleased and almost any other boy would look the same. It was a proud moment.

Telegrams.

This is a game in which paper and pencil and some wit will be needed by each of the players.

The director of the game asks for a succession of players in turn a letter of the alphabet, chosen at random, and the ten letters are taken down in the order given.

A "from" person—some one well known to all—is next chosen, and then another well known person to whom the telegram is to be addressed. This telegram must consist of ten words, the words to begin with the letters given in the order in which they were taken down.

Each player writes a message, and when all are ready they are read aloud in turn by the writers or by the director.

For example, suppose the letters given were a, c, g, l, f, t, p, s, r, b, one of the telegrams might read "After Christmas geese laying four times per Sunday receive benedictions."

A Geographic Game.

A game which is entertaining as well as instructive is played as follows: There may be any number of players, and it will be enjoyed by people of all ages. Let the beginner give some geographical word—the name of a country, city, river or mountain. The next player continues with a name whose first letter is the last letter of the word given by the preceding player.

Thus, suppose the first word given is Albany, the second must begin with Y, Yucatan, for instance. No. 3 must give a place whose initial letter is N, and so on. When a player fails to have a name ready he is dropped from the game, and the one who can play the longest is, of course, the winner.

Conundrums.

Why is a hive like a spectator at a show? Because it is a bee holder.

What is the difference between an auction and seasickness? One is the sale of effects, the other the effects of a sail.

Why is a chicken pie like a gunsmith's shop? Because it contains fowl in pieces.

Why cannot a deaf man be legally convicted? Because it is unlawful to convict a man without a hearing.

A Problem.

A boy driving home some turkeys was asked how many he had. He replied, "When in line there are two turkeys ahead of a turkey, two turkeys behind a turkey and one turkey in the middle."

How many turkeys had he? Answer.—Five turkeys.

"A sensible cigarette—that's what I want"

There are a number of good, sensible cigarettes on the market—Fatimas are not the only ones.

But Fatimas are the best-liked and best-selling of all the cigarettes costing over 5c.

Of course, your taste may be different—you

may not like Fatimas as well as all these thousands of other men do.

But you can't deny that they are worth trying—not only for the delicious taste that has made them so famous, but also to see just how SENSIBLE they really are—how COOL and comfortable to the throat and tongue and how free they are from after-effects.

Clip out these tests and see if you can find any cigarette that meets them as well as good old Fatimas do.

Make this important test today.

Lyette M. ...

NO FOUNDATION FOR ...

TWO TESTS FOR ANY CIGARETTE

The taste of the cigarette—according to a leading tobacco journal—is up to the point that you are going to stick to for your steady smoke. There are a couple of tests that may help the average smoker to choose more wisely between different kinds of cigarettes.

The first test is for coolness, which means more comfort to the throat and tongue. Light any cigarette. Draw in a load of smoke—a small, ordinary puff in your mouth for a few seconds. Let it "float" around against your tongue. If the cigarette contains a high grade of mild tobacco leaves, combined in just the right proportion, it will always feel COOL and smooth both to your throat and to your tongue.

On the other hand, if the proportion of leaf is not right and if the cigarette contains inferior grades of tobacco or hidden strands of rank, dry leaf, you will find it burning stinging at the tip of your tongue or that "sawdust" tickle in your throat. Test number two—How do you feel after smoking all day?

If the tobacco in the cigarette includes all of the various grades, you will find it very mellowness by age—and if they have been so blended as to bring out the best qualities in each of the different types of tobacco, you will be able to smoke practically whenever you feel like it through the day without feeling any effect from it.

But with another cigarette in which the blend is less skillful, even though the tobacco are of the highest grade, you will find along towards the end of the day that you are likely to have that feeling of having "smoked too much."

Clip out these tests and try them on Fatima

Council Proceedings.

The water committee reported that the main across Pacific Highway had been lowered as ordered.

The matter of reducing the maximum rate for irrigating was referred to water committee to report at next meeting.

The marshal was instructed to see that the new dog ordinance is enforced.

The proposition of H. C. Veatch that the assessment on the south half of lot 8, block 9, J. H. McFarland's addition, be paid in ten annual payments, was accepted.

The engineer's estimate of \$640.06 on Jensen & Higgins' Second Street contract was approved.

On motion the street committee was given power to act in the matter of drainage on First and Second Streets. The reports of marshal and treasurer were accepted and ordered filed.

On motion street committee was instructed to select the best pavement for west approach to steel bridge and have approach paved.

On motion marshal was instructed to serve notice on property owners who have erected hitching racks on their property to have the street cleaned up and repaired at once.

On motion new sidewalks were ordered on west side of Pacific Highway between Nellis Place and Willamette Court and marshal was instructed to give legal notice to property owners to build sidewalks at once.

The following bills were audited and allowed:

G. B. Pitcher, salary and expense	72.20
G. G. Warner, salary	29.25
J. H. Brown, salary	25.00
W. W. Oglesby, salary	10.00
Cottage Grove Electric Co.	228.16
Knowles & Graber, hardware	5.20
Ike Ritchey, labor	12.50
Joe Watkins, labor	9.00
E. J. Watkins, labor	7.20
G. W. Wash, labor	.40
J. E. Young, salary	55.00
O. L. Nichols, engineer	12.50
A. E. Hamloth, blacksmithing	9.65
Leader, printing	2.70
Blackmore & McFarland, auditing	2.60
H. Weatherax, labor	1.00
A. Nelson, repairing	2.50
D. W. Cox, labor	2.00
H. Taylor, engineer	1.95
J. W. Stoops, cleaning park	13.50
Spriggs Bros., blacksmithing	4.00
H. J. Shinn, attorney	10.00
H. J. Jorgensen, labor	1.25
C. C. Newcomb, engineer	14.25
Fire Co.	29.00
H. A. Miller, repairing roller	3.50
Chas. Gettys, crushed rock	1111.02
Glauber Brass Works	69.03

Adjourning until August 30, J. E. YOUNG, City Recorder.

Some folks can't resist celebrating victory, even at the risk of informing the enemy of their position and of the fact that many are away from their guns.
