I Can Succeed

"What other men have accomplished through I. C. S. help, I can accomplish. If the I. C. S. have raised the salaries of these men, they can raise MY salary. If others have won out through I. C. S. help, I can win out. To me, I. C. S. means 'I Can Succeed.'"

Get the "I-Can-Succeed" spirit; for the I. C. S. can raise your salary—whether you are a dollar-a-day man or a dollar-an-hour man; a long-hour man or a short-hour man; a young man or an old man; an inside man or an outside man; or whether you live in Europe, Asia, Africa, America, or Australia.

On an average, 300 students every month voluntarily report bettered positions and increased salaries as the direct result of I. C. S. help. Through I. C. S. help failures have become successes. Through I. C. S. help men already in good positions have advanced to still better positions. A responsible position is awaiting you. To learn all about it, mark and mail the attached coupon.

If you can read and write, the I. C. S. will go to you and train you in your spare time for a well-paid position in the line of work you like best. I. C. S. students do not have to leave home nor lose even an hour from work. I. C. S. Courses are prepared especially to suit the requirements of those having to get their technical education in spite of difficulties. The I. C. S. way makes everything clear and simple. No matter what time of day or night your spare time comes, the International Correspondence Schools are ready when you are. To mark and mail the attached coupon will cost you nothing but postage and place you under absolutely no obligation.

Send the coupon NOW.

Name _____

Street and No. _____

City _____ State _____

Crossing the creek and getting pretty close to the calves, he would stop suddenly again to watch three or four rabbits at their morning romp in the dewy grass. Farther on he might find a strange flower or shrub and study it over so long, trying to determine the name of it. Sam and Florence were both nature enthusiasts, and there were few flowers or trees the names of which they didn't know.

Finally, the young farmer would find the calves and start them home, and he might get there by sunrise if he didn't find something else to interest him.

When he came in, fresh, bright eyed and hungry from his walk and found breakfast waiting, his mother would ask:

"Why, what makes you so late getting back, Sam?"

"Oh, I've been watching ol' Br'er Rabbit and Br'er Possum," he would reply. He had read the stories of Uncle Remus and always called animals by the names the old darky gave them.

One Saturday morning Bill Googe climbed over the fence and came to where Sam was at work.

"Hello, Sam!" he greeted. "Say, let's go fishin' this evenin'."

"Are you up with your work?" asked Sam.

"You bet. I've quit loafin' round when they's work needin' doin'. Everything's right up to now."

"All right, then," said Sam; "I'll be glad to go. I was just thinking about it."

"Well, I'll git the bait and be 'long 'bout 1 o'clock after you. Say, Sam, you shore are raisin' a powerful lot o' truck on this place. I declare, I don't see how you do it. Of course I know now that it's a good deal in the way you work the land, but I didn't think anybody could raise crops like this. And you never let up—fast as you git one crop off you've got another comin' on."

"Yes," said the boy farmer, "I'm doing pretty well. Everything's been favorable, though, and we've had plenty of rain. As for growing more than one crop, you've got to do that if you want to make any money. Besides, land needs something on it all the time to keep down the weeds and keep humus in the ground. When I get my corn and cotton gathered I want to hire you again to plow this land and sow it with some kind of a cover crop for the winter."

"All right," agreed Bill. "I'll do it. And since you mentioned it I guess I'll sow my field in something—wheat or rye. I could use it for pasture, too, couldn't I?"

"Certainly," replied Sam. "It would not hurt to pasture it even if you were going to let it stand. But speaking of land producing stuff, why, man, this place hasn't done half what it can be made to do. Here's something I clipped from a farm paper. It'll give you an idea what land produces when it's handled right." Sam took from his pocket a little slip of paper and read:

"There are few who know the possibilities of the soil when well manured and watered. One acre has produced

The Two Put Off Down the Creek to Fish For Perch.

216 bushels of corn, and three bales of cotton have rewarded another man. On Long Island 400 bushels of Irish potatoes is not an excessively large crop, and at Greeley, Colo., 400 bushels is not an uncommon yield. In the Sacramento valley, California, Mr. Cleek has for the past thirty years made a good living and saved an average of \$400 per year from one acre. On the island of Jersey rents are as high as \$200 and \$300 per acre, and near the city of Paris they are higher still. Near San Diego, Cal., there is a colony of "littlelanders" who believe that one acre is enough, and many of them are making good with their small farms. With good soils, plenty of manure and all the water needed the possibilities of the soil are enormous, and one crop follows another in rapid succession.

"What do you think of \$200 and \$300 an acre for rent?" Sam asked when he had finished reading. "They've got to raise something on that land, haven't they?"

"I should say they have!" exclaimed Bill.

That afternoon at 1 o'clock Bill Googe came by for Sam, and the two put off down the creek to fish for the perch and cat that were to be found in the blue pools of the little stream.

Curative Value In Food?

"Recalling that 90% of disease results from errors in diet, then foods properly prescribed by the physician can justly be said to have curative value"

Dr. Henry B. Hollen, in *The Medical Standard*.

One of the errors in the diet of many people is the use of foods robbed of the vital mineral salts (phosphate of potash, etc.) which are absolutely necessary for proper balance of body, brain and nerves. The result is a long list of ills, including nervous prostration, kidney trouble, constipation, rickets in children, and so on.

Twenty years ago a whole wheat and barley food, containing all the nutriment of the grain, including the priceless mineral elements, was devised especially to correct errors in diet. That food is

Grape-Nuts

It fulfills its mission admirably.

Another physician says:

"Nearly half the year my breakfast consists of a dish of Grape-Nuts, one or two eggs, or fruit. I RECOMMEND IT TO MY PATIENTS CONSTANTLY, and invariably with good results."

This wholesome food not only builds sturdy health and strength, but fortifies the system against disease. Ready-to-eat, nourishing, economical, delicious—

"There's a Reason" for Grape-Nuts
