CULINARY VERSE

Always have lobster sauce with salmon, And put mint sauce your roasted lamb on.

Veal cutlets dip in egg and bread crumb, And fry until you see a brownish red ome.

Grate Gruyere cheese on macaroni, Make the top crisp but not too bony; In dressing salad mind this law: With two hard yolks use one that's raw. Roast veal with rich stock gravy serve, And pickled mushrooms too, observe, And roast pork sans apple sauce—past doubt Is "Hamlet" with the "Prince" left out.

Your mutton chops with paper cover, And make them amber brown all over. Broil lightly your beefsteak; to fry it Argues contempt of Christian diet. Buy stall fed pigeons, and when you've got 'em,

The way to cook 'em is to put 'em, Wood grouse are dry when gump have marred them—

Before you roast them always lard them. To roast spring chickens is to spoil 'em; Just split them down the back and broil 'em.

It gives true epicures the vapors To see boiled mutton without capers. Boiled turkey, gourmands know, of course,

Is exquisite with celery sauce. The cook deserves a hearty cuffing Who serves a fowl with tasteless stuffing.

Egg sauce (some make it right, some not) Is good with codfish or turbot. Shad, stuffed and baked, is most delicious;

'Twould have electrified Aspicuous. —From The Country Home.

KAISER'S WORLD WAR PLOTS ARE NOW LAID BARE

Alliance With Mexico and Japan for Conquest of American Territory is Conceived Through Diplomatic Agents Stationed Here.

Washington, Feb. 28.—The Associated Press is enabled to reveal that Germany in planning unrestricted submarine warfare and counting its consequences, proposed an alliance with Mexico and Japan to make war on the United States if this country should not remain neutral.

Japan, through Mexican mediation, was to be urged to abandon her allies and join in the attack on the United States.

Mexico, for her reward was to receive general financial support from Germany, re-conquer Texas and Arizona—lost provinces—and share in the victorious peace terms Germany contemplated.

Details were left to German Minister von Eckhardt, in Mexico City, who by instructions signed by German Foreign Minister Zimmerman, at Berlin, January 19, 1917, was directed to propose the alliance with Mexico, to General Carranza and suggest that Mexico seek to bring Japan into the plot.

These instructions were transmitted to von Eckhardt through Count von Bernstorff, former German ambassador here, now on his way home to Germany under a safe conduct obtained from his enemies by the country against which he was plotting war.

Germany pictured to Mexico by broad intimation, England and the entente allies defeated; Germany and her allies triumphant and in world domination by the instrument of unrestricted warfare. A copy of Zimmerman's instructions to von Eckhardt, sent through von Bernstorff, is in possession of the United States government.

Lane Convict in Attempted Break.

William Bowen, alias Alfred Hadley, committed from Lane county last November, was one of the insane asylum patients who, on Sunday afternoon, with several other criminal inmates confined in the institution, attacked the guards and made an attempt to escape. J. M. Devers, former district attorney, who was in office at the time of Bowen's arrest and at the time of his commitment to the asylum, says that he doubted very much that the man was insane at that time and believes now that he was shamming in hopes of being able to make his escape more easily from the asylum than he could hope to from the penitentiary.

that he shall do so and so, that such a system would be impracticable, would not be favorably received by the farmer, that the government would not permit that kind of work and that the carrying on of such a system would not leave the county agent any time for other work that accomplishes something.

The county agent, Mr. Robb stated, is always ready to answer calls from the farmers and to give all possible assistance in solving the problems and meeting emergencies upon which his advice is asked, but the greatest work of the agent is accomplished in developing project methods, such as developing a better and a larger corn crop for the county, getting farmers to cooperate in selling and buying and in handling such problems as the eradication of pests of different kinds. As an example of the latter he referred to the scourge among sheep a year ago when over 1500 sheep of the county were inoculated against a disease which had never before appeared in the county.

Mr. Robb said that county agent work was started in Europe as far back as 1870 and that the discovery of the milk test, the discovery of new crops and methods of dealing with insects pests, and the like, were the result of investigations conducted by county agents or experimental stations.

FALL OF SNOW IS DEEPEST SINCE YEAR 1852

broke one of the show windows, ruining cakes and pies and upsetting things in general.

W. G. Perry, of the People's meat market, lost a bunch of cattle in Oakland, the snow causing the roof of the building which sheltered them to cave in.

The Sentinel's correspondents report the giving away of many barns and sheds under the weight of the snow.

The children enjoyed the storm, whether anyone else did or not and had many a jolly snow fight. A number of groups from eastern states improvised skis and did some fancy stunts on reservoir hill north of the city where there was plenty of snow and a fine grade for that kind of sport.

The greatest sufferers were probably the birds and owners of livestock. The feeding of the birds was not a particularly serious problem but those having large herds of cattle on ranges, which are usually open the entire winter, have been put to considerable expense in providing feed. Feed usually being unnecessary, no great quantity of it is on hand and a protracted feeding period would mean much suffering for the stock. It being impossible to get wood into the city over the present roads, together with the fact that the mills are closed and not cutting any tie blocks, has caused some little inconvenience to those who did not put in their winter's fuel.

But there is no cloud without a silver lining. Listen to what the weather optimist says:

"This snow is a mighty good thing. The heavy snow in the mountains assures the rivers and creeks plenty of water in the summer. The miners in the mountains have water to work with, which makes the development of the mines possible. The moisture makes danger from fires less, and it also makes the climate better in hot weather."

"In the valley the snow keeps the fruit and flower buds back and prevents them from coming out too quickly and exposing themselves to the early spring frosts later. It also furnishes needed moisture for the soil, for you know we are several inches of rain short this season counting from September."

Chas. Cochran Buys Farm.

Charles S. Cochran, the well known Eugene musician, has exchanged two good residence properties in this city for the 100-acre farm of Mrs. Powers located on the Coburg-Harrisburg road, southeast of Harrisburg, near the farm

home of Fred Lamb, formerly of this city. Mr. Cochran will take personal charge of his newly acquired farm property and it is his intention to move his family from Eugene to the farm soon. He also owns a small farm near Cottage Grove, which will be operated by a tenant this season.—Eugene Register.
