'Tis the star spangled banner,  
Oh! long may it wave  
O'er the land of the free  
And the home of the brave.

## UNDESIRABLE CITIZENS.

IT IS in trying times like these that citizens of this great land of the tree and home of the brave show up in their true colors. It is in times like these that we show whether or not we are true and patriotic citizens of a country in which we enjoy the greatest liberties granted to any people in the world.

It is a time when we have the opportunity to demonstrate whether or not we are willing to make the necessary sacrifices to preserve for future generations the heritage which past generations have handed down to us through great sacrifices.

This is the time above all others when the undesirable citizen stands out in bold relief and receives the condemnation of a great patriotic people. Lines are closely drawn and there is no difficulty in distinguishing the desirable from the undesirable.

Thank God the latter are so few! We may differ in our opinions about the war. Many of us may feel that the war could have been averted by a firm stand taken before the destruction of the Lusitania.

Others may feel that we should have been kept out of the war at any price. Others may feel that we should have stopped the shipment of arms and supplies to Europe.

It is possible that some of these are right, but whether such opinions are right or wrong does not alter the fact that we have accepted citizenship under the Stars and Stripes and have sworn to uphold and support the government of which we are a part. We who were born here, by participating in the affairs of government, are just as surely and strongly bound as the citizen who took the oath of naturalization.

Having accepted that citizenship, having taken part in the election of those who govern us, we are as firmly bound to answer a call to duty as if the acts of our government had been our own. Duty to country is clear, either in peace or war; but acts that will pass without censure in time of peace, become treasonable in time of war.

Disrespect for the flag is punishable at any time; but the person who in such times as these pays it any discourtesy is not fit to live with the lowest savages of darkest Africa. He who now shows disrespect for the flag which has protected his worthless carcass and given him a liberty enjoyed by no other people in the world is too lacking in gratitude to be a fit associate even for Satan himself.

Among the undesirable citizens are those who would interfere in any way with the carrying forward of the war in which we are now engaged—a war deemed necessary by the government which these same people have helped to make.

But there is still another undesirable citizen who, to us, seems to surpass all the others.

Young men by the thousands, and many older ones, are ready to serve their country on the battlefields of Europe in order to keep war from our own shores; they are ready to support the government in the overthrow of military monarchy which menaces the liberty of the world; they are ready to offer life, if necessary, in the fight for human liberty; they are ready to battle for the millions at home.

In doing this many of them will be killed and many will be wounded. The lives of nearly all the wounded may be saved by prompt relief. The only organization that can take this relief to the wounded is the Red Cross, which can receive support only by private contributions.

It seems to us that there is a double call—that of country, and that of humanity—and it seems to us that the person who is so lost to duty to country and so completely lacking in common humanity as to damn the Red Cross—that great society of mercy—is one of the most undesirable of the undesirables, his only equal being the one who hoards the necessities of life with the hope of making a fortune out of the blood of our patriots who are offering life for their country.

Persons of these two classes are so lacking in appreciation of the privileges and responsibilities of citizenship that

they should have their citizenship taken from them, should be declared alien enemies, interned until after the war, and then deported to some barren island in mid-ocean where they would never come in contact with decent and respectable people.

## PUTS JACKSON FOLLOWING LINCOLN.

THE Portland Spectator used to take considerable pleasure in finding fault with the grammar and orthography of the country newspapers until some months ago. The Spectator picked out and called attention to a few of the more glaring errors in The Spectator; and ever since then that cultured sheet, for it really is such, has had not a word to say regarding the errors of its country brethren. Feeling pity for the humbled exponent of culture, The Sentinel has not for a long time pointed out any further errors in that magazine, but in the most recent issue The Spectator attempts to tear all history to pieces by making Andrew Jackson the president "following Lincoln." The Spectator has tried many innovations and has put some of them over, but this is too much. The American people will not stand for any such attempt to distort the history of the sacred past. The Spectator is also endeavoring, evidently, to remodel the dictionaries, for in the same issue we find the word "neice," which does not appear in any of the standard works.

Salt water is good for the skin, and best when it comes in the form of perspiration.

## GOETHALS MAY FOLLOW HOBSON.

GENERAL Goethals is likely to get in as bad as did Richmond Pearson Hobson. It will be remembered that Hobson lost in his kissing escapades and in his Japanese bugaboo most of the glory won at Santiago. General Goethals' Panama canal glory is being rapidly dimmed by his apparent pig-headedness regarding the construction of vessels for carrying on the war. This job is entirely different from the building of the canal. It that case immediate results were not so necessary, and a delay in starting that insured better results in the end was justifiable. In this case, immediate results are necessary or the end may never be reached. Time wasted now in fussing as to whether vessels shall be of wood or steel may mean the needless loss of many of our boys by extending the war, and too great delay may mean the loss of the war. The great Goethals seems just now to be acting a whole lot like a small boy with a swelled head.

No matter how small the home, there is always a big place for father to fill in the evenings.

## UNGRATEFUL UNCLE SAM.

IT SEEMS like Uncle Sam is a mighty ungrateful old fellow. During the past few months he has made call after call upon the newspapers for free advertising space. The newspapers have responded with millions of dollars' worth of such space, and through the giving of that space, the food preparedness campaigns were made a success; through this free space the liberty loan was oversubscribed 50 per cent; through this free space the war census was successfully conducted, and through this free space the \$100,000,000 asked for the Red Cross was oversubscribed. Yet after all this, congress proposes to put a tax on advertising. Talk about in gratitude!

A school is suggested for the teaching of kissing. Teachers in a school of that kind would have to get down to the level of the students.

## A FIENDISH OUTRAGE.

WE HAVE heard of nothing more dastardly than the attempt of the German government to inoculate the people of this country with leprosy germs through the medium of contaminated plaster sold by itinerant peddlers. German "kultur" certainly has been directed during the past few years to the most fiendish of purposes.

There is a lesson to be learned from this latest outrage, and that is that it is never as safe to buy from peddlers as from merchants who are in your city to stay.

A father who does not learn to translate the strange language of baby tongues is not doing his duty to himself or family.

During the Red Cross drive many said that the money would not be needed for months, perhaps for years, and some expressed the opinion that when our men arrived on the battlefields would be time to subscribe the money. Hardly had the big drive been completed when the announcement came that the first army had already arrived in Europe.

Ralph D. Hetzel, for many years head of the extension department of Oregon Agricultural college, has been elected to the presidency of the New Hampshire Agricultural college. It is only natural that Hetzel, after all those years with the extension department, should have learned to extend himself, but this, although deserved, is more than we expected.

If some folks don't keep their mouths shut they are going to be given stone walls to talk to until after the war.

It is the duty of every patriotic citizen to report every unpatriotic word or act of which he has knowledge.

With Uncle Sam it is now a case of "those who are not for me are against me."

# HAIG SMASHES LINE ON BELGIAN FRONT

## Germans First Blown up and Then Rolled Back in New Drive.

London.—The wiping out of the German salient at Messines appears merely the prelude to a projected battle of a far mightier description.

The Germans, though apparently aware that the blow was coming and seemingly prepared to meet it, were driven from their nearly three years' hold on Messines ridge, opposite "Poor Old" Ypres, the last remnant of an important Belgian town, which, with the help of the French and British in turn, has held out against all the massed attacks the Germans could fling against it, including the first great surprise of poison gas as a means of supposed civilized warfare.

All the prisoners say the Germans had been expecting the attack, but were taken completely by surprise by the hour at which it was launched and the fury with which it was carried forward. They had been completely dazed by the most gigantic mining operation yet carried out in the world war.

More than 1,000,000 pounds of high explosives had been placed under the German forward positions during the last twelve months and the upheaval of a score of separate mines spread panic among the troops, already harassed, as they were, to the point of distraction by seven days and nights of fire from the greatest concentration of guns on a given front since the war began. The battle of Arras apparently had reached the ultimate in this respect, but today's bombardment was especially gung of heavy caliber.

# BRITISH AIRPLANES HELP WIN VICTORY

London.—The manner in which the British flying corps dominated the air during the battle of Messines Ridge and completely smothered the German aviation service for the time being is one of the most thrilling and remarkable stories of the entire war. Hundreds of British planes were well behind the German lines when the battle broke into its fury at dawn. In addition to shutting the German airmen out of any early participation in the battle, the British airplanes were in a large degree responsible for the fact that the Germans could not launch a counter attack of appreciable strength until 40 hours after the battle for the ridge began and every bit of ground desired by the British in this particular operation had been taken and secured.

# RUSSIANS SPURN PEACE

Petrograd.—The council of soldiers and workmen has made public the fact that the German commander-in-chief on the Eastern front sent a wireless message inviting the Russian armies to a separate armistice, and proposing that they enter into secret parleys with the German leaders. The council denounces the proposals. The resolution of the soldiers' and workmen's council spurning the German wireless appeals for peace declared: "The German commander-in-chief wirelessed our troops a proposal for an armistice in order that secret parleys for peace might be held. It was argued that such an armistice did not offer Germany advantage. This is untrue. The German general forgets that Russia knows the overthrow of the allies would mean the overthrow of Russia and the end of her political liberty."

Russian Women to Fight in Trenches. Petrograd, via London.—The propaganda in favor of a "women's fighting regiment" has made considerable progress. Eight hundred volunteers have already enlisted, among whom, it is reported, is the wife of the war minister, A. P. Kerensky.

Redmond's Brother Killed in Battle. London.—William Redmond, Irish Nationalist leader, brother of John Redmond, died in an ambulance while on the way to a hospital, back from the firing line where he was wounded.

Perishing Aides in France. Boulogne Sur Mer, France.—A number of officers of Major General John J. Pershing's staff have arrived here to begin the work of organizing the bases of the American army in France.

# CONTRIBUTIONS TO RED CROSS

In the list of contributors to the Red Cross fund last week the contribution of M. H. Anderson of \$15 was unintentionally overlooked.

Below is given a list of the contributions from the Cottage Grove country outside of the city itself. The committee has endeavored to give credit to each community for the money coming from that community. If any errors have been made, the committee would be pleased to have the opportunity to correct them.

# Pretty Materials for Wash Dresses

## RESPOND TO THE CALL

The Spirit of Patriotism and Service has stirred the heart of Dame Fashion herself, as well as the hearts of men, for she has called forth hordes of pretty wash fabrics and evolved from them wonderfully becoming modifications of the picturesque dresses of Grandmother's Days.

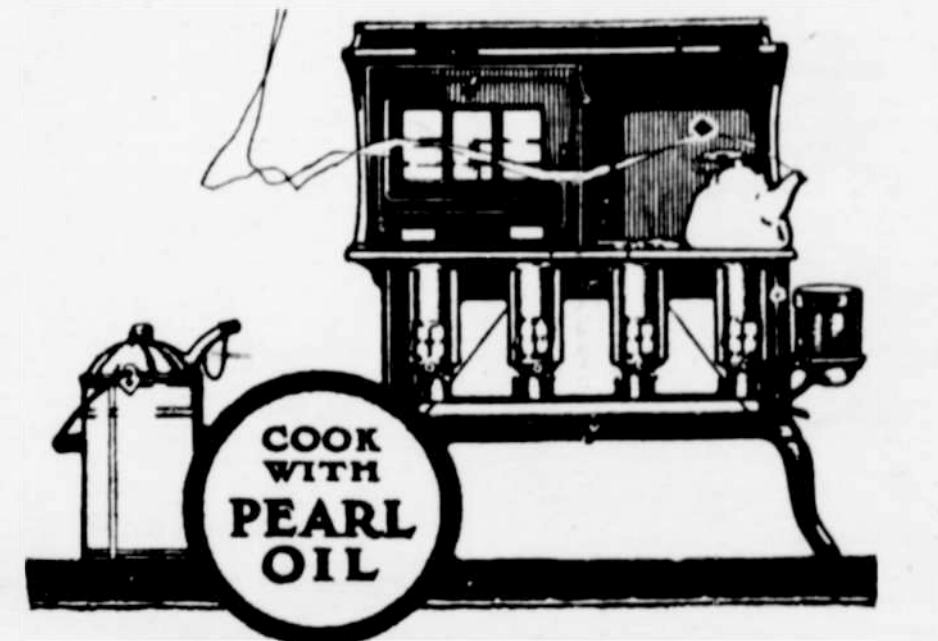

Never have washable dresses received greater recognition than during these days. Never have they so well responded to the call of the times in serviceable qualities, dainty styles and various colorings.

Displays are now ready for inspection. New washable linene suiting in yard-wide widths are attracting wide attention and are very fashionable. Patterns here shown are in combination of stripes of blue and tan, green and tan, gray and blue, etc. Most every woman is delighted with the attractive appearance of the cloth when made up, and the price is trivial—a yard—25c

—Delightfully new and different are the pretty new yard wide bench cloth fabrics in the popular sport patterns; narrow and wide stripes, large polka dots, etc. The prices are very reasonable—a yard—25c, 30c, 35c

—We are showing a wide range of bright, new pongee, percale, madras cloth, voile, lawn, organdie, etc., in vogue for the dressier dresses. Most of these fabrics are shown in wide widths of thirty, thirty six to forty inches. Prices range—15c to 65c

COOK WITH PEARL OIL  
ECONOMY  
An oil cook-stove is cheaper to buy than a wood or coal stove and it's much cheaper to operate. Meals in a jiffy, and a cool kitchen in summer.

All the convenience of gas—economical for all the year 'round cooking. Bakes, broils, roasts, toasts. Steady, evenly-distributed heat, the best for cooking.  
The long blue chimneys prevent all smoke and smell.  
In 1, 2, 3 and 4 burner sizes, with or without ovens. Also cabinet models. Ask your dealer today.
