Just a Tilt of the Pail

Women don't mind filling the knee-high supply can of the new Suction-feed. Only a few inches to lift. No straining of back or arms.

THE NEW SHARPLES SUCTION-FEED

Separator gets all the cream all the time. Any other separator will lose cream when the speed slackens. You can't always turn at exactly the right speed. No one can. It's impossible. Speed indicator or no speed indicator. The Suction-feed skims clean, fast or slow, and delivers even cream. Capacity increases with the speed. Come in and let us show you how it works.

STERLING FEED CO.

The judicious advertiser not only takes the surest means of directly benefiting his own business but his support is a great aid to the newspaper in its work in upbuilding a community, and in its efforts to give the city a newspaper the quality and character of which advertises the city as a live one from which the merchant gets an indirect return.

"You Get The Job"

"We've been watching you, young man, and we know you're made of the stuff that wins. The man that cares enough about his future to study an I. C. S. course in his spare time is the kind we want for responsible positions. You're getting your promotion on what you know, and I wish we had more like you."

The boss can't take chances. When he has a responsible job to fill, he picks a man trained to hold it. He's a wiser man. Of course, now, hoping you'll be ready when your opportunity comes.

Start today and train yourself to do some one thing better than others. You can do it in spare time through the International Correspondence Schools. Over 1,000 men reported advancement last year as a result of their I. C. S. training.

The first step those men took was to mark and mail this coupon. Make your start the same way—right now.

THE WORLD'S RECORD CLOSE SKIMMING
UNITED STATES CREAM SEPARATOR

A Clean Proposition

If every dairymen's wife could vote when cream separators are used for election, a U. S. CREAM SEPARATOR would always win, handle down.

If the creamery managers knew the unsanitary condition of many separators which serve them, they would be even more urgent for the use of U. S. SEPARATORS.

If the buyers of creamery products knew that the poor-keeping qualities of butter can usually be traced to imperfectly cleaned separators, they would call even still louder for the U. S. SEPARATOR, with its unequalled reputation for cleanliness.

If you will let me show you how much easier it is to keep the U. S. SEPARATOR clean and rustless inside and out than other similar devices, how quickly the mechanical washer scrubs, scales and dries the skimming parts, then you will be as pleased to own a U. S. SEPARATOR as I am to introduce them.

After I show you, see if you can find any other separator as satisfactory. If you cannot—then buy a U. S. the World's Record close skimming separator.

KNOWLES & GRABER AGENTS

GERMAN ATTACK IN CHAMPAGNE FAILS

French Repulse 40th Attempt to Take Chemin des Dames Since May 4.

Grand Headquarters of the French Army in France.—The watchword of the French troops at Verdun—"they shall not pass"—has applied equally to the Champagne, and the French showed the crown prince's army that the Chemin des Dames was a closed road to them.

On Sunday morning the Germans, in great force, made their 40th attempt since the French captured Craonne on May 4, to secure possession of the famous road. This effort was one of the biggest offensive movements they had made since Verdun, so far as artillery was concerned and proved an undoubted failure.

At 5 o'clock the German infantry started from their trenches. Rifle and machine gun fire began cracking while the trench mortars hurled torpedoes and the rifle grenadiers opened a wicked barrage fire as soon as the Germans, who had been awaiting the prearranged signal to spring forward, began to leave their jumping-off parallels.

German shock units, as usual, led the way, followed by waves of ordinary infantry, who were to occupy and organize any ground captured. The attacking forces soon melted to a thin line under the withering French fire which met them, and those still able retreated hurriedly to their own line, which meanwhile came under an inferno of French shell fire that made the German trenches untenable.

ENGLISH PREMIER ANSWERS MICHAELIS

London.—The British prime minister, David Lloyd George, speaking at a great patriotic demonstration, in commemoration of "Belgian independence day" characterized the speech of the German chancellor, Dr. Georg Michaelis, as a mere sham and declared that he did not want the Germans to "harbor any delusions that they are going to put Great Britain out of this fight until liberty has been re-established throughout the world."

Far from being starved by the U-boats, Mr. Lloyd George declared, Great Britain's food supply for 1917-1918 was already obtained, production was increasing and losses at sea were diminishing. He had sought in the chancellor's speech for something upon which he could base a hope for the ending of the bloody struggle.

"But," he declared, "I see in it a sham independence for Belgium, a sham democracy for Germany, a sham peace for Europe, and I say that Europe has not sacrificed millions of her gallant sons to set up a sanctuary for sham."

TEUTONS TURN SOUTHWARD

Effort to Encircle the Russians is Under Way.

Copenhagen.—The Austro-German flood in eastern Galicia has been turned southward in an endeavor to get in the rear of Russian armies between Berezany and the Dniester, Austrian correspondents report.

The Teutonic forces engaged in this operation, they declare, have reached Koseva station, 10 miles east of Berezany, which is in Austro-German hands. The Koseva-Tarnopol railroad has been crossed by them in several places. These dispatches forecast the Russian army's stand behind the Sereth and reiterate the reports that Tarnopol is in flames.

A Berlin dispatch says Emperor William has departed for the eastern front.

First Address by German Chancellor.

Copenhagen.—With the statement that Germany's wish is to conclude peace as combatants who have successfully accomplished their purpose, yet admitting the severity of the food situation, Dr. Georg Michaelis, the new imperial chancellor of Germany, made his first address before the Reichstag.

Dr. Michaelis declared adherence to the submarine campaign as a means of hastening the end of the war, and looked lightly upon the entry of the United States into the war.

Declaration of Independence by Finns.

Helsingfors, Finland.—A conflict with Russia is regarded as inevitable because of the action of the Finnish diet in adopting a bill granting independence to Finland.

Loan Shows Faith in Russia.

Washington.—The United States emphasized its faith in the Russian government by extending it a further credit of \$75,000,000.

Government Lets Contract for Cycles.

Washington.—The war department has contracted for 5000 motorcycles for the new army.

FOOD CONTROL BILL PASSED BY SENATE

Minimum Price of \$2 a Bushel for Wheat is Guaranteed By Measure.

Washington.—Virtually re-written as it came from the house a month ago, the administration food control bill, modified but still giving the president broad authority to regulate foods, feeds and fuels; providing for a board of three food commissioners instead of a single individual and authorizing a minimum guaranteed price of \$2 a bushel for wheat, was passed by the senate.

Prohibition provisions, prohibiting further manufacture of distilled beverages and directing the president to buy all distilled beverages in bond, were left unchanged. The final vote on the bill was 81 to 6.

Those voting against the bill were: France, Penrose, Sherman, Sutherland, republicans, 4.

Hardwick and Reed, democrats, 2. Total, 6.

President Wilson asked congress to eliminate from the food control bill a senate amendment creating a joint committee of senators and representatives to confer and advise with executive officials on war expenditures.

In a letter to Chairman Lever, of the house agriculture committee, the president pointed out in frank terms that such a committee would be likely to harass constantly those directly responsible for the conduct of the war. Retention of the section, he notified congress, he would be compelled to interpret as signifying "a lack of confidence in myself."

MEN WILL BE DRAFTED BEFORE SEPTEMBER 1

Washington.—Before September 1 thousands of men sifted from the top of the draft list will be in khaki, it was officially predicted here.

As a result of the drawing, every registered man receives a definite place in the liability for service list. Already 687,000 have been ordered to the colors to fill to war strength the regular army and national guard and to constitute the first increment of the national army.

To obtain that total 1,374,000 men will be called for examination within a few weeks, officials estimating that two registrants must be called for every soldier accepted. These 1,374,000 will be taken from the head of the liability list.

Provost-Marshal-General Crowder ruled that posting at the board headquarters of the list of men ordered to appear constitutes legal notification. It therefore is incumbent upon all registered men to learn their red ink numbers at once and to see that the board headquarters is watched when the list is posted. Those ordered up also will be notified by mail, but the period allowed for appearance will count from the posting of the list.

SHIPPING BOARD CHANGED

Goethals, Denman and White Are Eliminated.

Washington.—President Wilson cleaned house in the shipping board. He eliminated Major General Goethals, William Denman and John B. White from the board and the emergency fleet corporation, accepting the proffered resignations of Goethals and White and requesting the resignation of Mr. Denman.

The president then appointed Edward N. Hurley of Chicago, former member of the federal trade commission, to succeed Mr. Denman.

Bainbridge Colby of New York to succeed Mr. White.

Rear Admiral Washington L. Capps to succeed General Goethals.

With the changes in the board will come a complete reorganization of methods. It was stated officially that the president now will insist that the work of building a merchant fleet by the United States proceed without any delay.

Eighteen Injured in Train Wreck.

Baker, Or.—Eighteen were injured when the O-W. R. & N. crack Overland Limited passenger and mail train No. 17 crashed head-on into a 2200-ton freight at Hindman, 16 miles east of here.

Canada Grain Price Fixed.

Toronto, Ont.—The board of grain supervisors for Canada has ruled that, dating from August 1 next, the maximum price of wheat, basis No. 1 Northern, in store at Fort William, shall not exceed \$2.40 a bushel.

Aviation Measure Passed.

Washington.—The house bill appropriating \$640,000,000 for the aviation service was passed by the senate without amendment or a record vote and with less than an hour's discussion.

Chopin and the Children.

A chronicler of the life of Chopin, the great pianist, tells the following anecdote: On one occasion the pupils in his father's school, freed temporarily from the restraint of the elder Chopin, arranged to have some fun with their tutor. When the commotion was at its height Chopin entered and set himself to quell it. He told the boys that if they would remain quiet he would play for them. He darkened the room and started his improvisation, telling the skylarkers a romantic story of a band of robbers who approached a house, mounted by ladders to the windows, but were frightened away by a noise within. They fled into a dark wood, where they fell asleep under a starry sky. Chopin by this time was playing more and more softly, as if seeking to lull the robbers in the wood and incidentally the children in the schoolroom to rest. When he had satisfied himself that his hearers had actually fallen asleep Chopin crept from the room and brought his parents to look at them. He turned up the lights, and the boys slept on until he reentered himself at the piano and struck a thrilling chord, at which they all awakened with a start.

Presidential Candidates.

Both political parties have a habit of selecting comparatively poor men for president. In this generation there has not been a rich presidential candidate at least not rich as defined by the American lexicon.

Roosevelt is the richest Republican who was ever president or Republican nominee for a sojourn in the White House. Wilson, Taft, McKinley, Cleveland, Harrison, Garfield, Grant, Arthur, Hayes, Johnson and Lincoln were not rich.

Nor were the nominees, including Bryan, Blaine and Hancock, possessed of great fortunes.

Samuel J. Tilden, however, was an exception to the general rule. He was a millionaire and was much the wealthiest nominee of either party since before the civil war. In fact, he was the richest man who ever ran for president with any hope of getting the office.

Washington was a rich man for his day, but his wealth was far less than that possessed by Tilden.—Girard in Philadelphia Ledger.

Stairs Waste Effort.

Elevators and other conveyances utilized ordinarily for handling materials may be used also in conserving the strength and increasing the efficiency of the workpeople. It is nothing less than stupid to make tired employees climb down several flights of stairs at the end of a long day's work when there are elevators available and even more stupid to make these people climb up the stairs in the morning, using unnecessarily a large amount of energy which might otherwise help to tide them over the critical fatigue point during the day. It would be part of wisdom to install elevators merely for use of the workers, even if they were of no use for handling materials. Some of the best recently constructed mills have installed elevators for this purpose.—Engineering Magazine.

The Hundred Years' War.

The origin of the Hundred Years' war was the king of England's claim to the crown of France. Philip of France left three sons, all of whom died without issue, and the nearest male heirs were Edward III, who was the nephew of the three sons, and Philip de Valois, who was their cousin. The law in Edward's claim is the Salic law, which passed over women, and Edward owed his blood relationship to his mother. Edward claimed that, though Salic law applied to his mother, being a woman, it could not apply to him, being a man. On this dispute he saw the war that lasted nearly a century, ending with the many victories of Joan of Arc, which crushed the English authority in France.

Bigger Game.

Booth Tarkington, while in New York recently, was discussing the subject of debt with a playwright friend known for impeccableness.

"About \$1,200 would see me clear of debt," said the playwright. "And I tell you, Tark, if I ever get out of debt once I'll never get \$1,200 in the hole again. It will be \$12,000 next time. No more poker games for me."—New York Globe.

Salesmanship.

The mere selling of an article is not always proof of good salesmanship. One observer declares, "If a customer is persuaded into buying something she does not want she will not come back." The best salesmanship is that which looks to the future—in other words, which is based on the sound policy of honesty.—Youth's Companion.

London's Electric Service.

London has the most complicated electric service in the world. It is asserted, being dependent upon seventy generating stations, under seventy different authorities, these delivering energy generated at thirty-two different voltages and ten different frequencies.

No Clew.

"Is the new bookkeeper married?" "I dunno. He's one of them close mouthed fellows. If he has any trouble he keeps it to himself."—London Telegraph.

Savage Advice.

Ella—What would you advise me to do with my voice, love? Lily—Oh, when the man comes round you might have it tuned!

Measure your mind's height by the shade it casts.—Browning.

Boiling Points Determine Quality of Gasoline

"Then I might just as well throw my gravity hydrometer away?"
"You said it, Mr. Motorist."
"Listen, the boiling points of gasoline absolutely control its starting qualities, accelerating qualities, power-giving qualities. Gravity has nothing to do with it."
"To get the most out of your motor, your gasoline must have the correct series of boiling points in a gradually rising, unbroken chain—low boiling points for easy starting, medium boiling points for quick and smooth acceleration, high boiling points for power and mileage."
"And only straight-distillation can give this. No mixture can embody all the hundreds of intervening fractions necessary for a perfect motor fuel."
"To be certain of straight-distilled, unmixed gas, buy

THE
COTTAGE GROVE SENTINEL
Makes Clubbing Arrangement With
The Oregon Farmer
Offers Unusual Opportunity to Its Readers

AMONG our large circle of readers there are a great many who are interested directly or indirectly in fruit growing, dairying and other branches of farming. All of these naturally wish to keep in close touch with agricultural activities throughout the state; and to know about any fight which is being waged for the measures Oregon farmers want and against all sorts of schemes that are detrimental to the people and agricultural interests of this state.

We have, therefore, made a special clubbing arrangement with THE OREGON FARMER whereby any farmer or fruitgrower, who is one of our regular subscribers and who is not now a subscriber to THE OREGON FARMER, will be entitled to receive THE OREGON FARMER in combination with this paper at the same rate as for this paper alone.

This offer applies to all those who renew or extend their subscriptions as well as to all new subscribers. If you are interested directly or indirectly in Oregon agriculture, do not miss this unusual opportunity, but send your order in now.

THE OREGON FARMER is the one farm paper which is devoting itself exclusively to the farming activities and interests of Oregon. It has a big organization gathering the news of importance to farmers, dairymen, fruitgrowers, stockraisers and poultrymen; and it has the backbone to attack wrongful methods and combinations and bad legislation, and support honest leaders and beneficial measures. We are confident that our readers will congratulate us on our being able to make this splendid and attractive clubbing offer.
